## JOINT COMMITTEE ON CAPITAL REVIEW

Tuesday, July 24, 2018
1:00 P.M.
House Hearing Room 1

## MEETING NOTICE

- $\quad$ Call to Order
- Approval of Minutes of April 25, 2018.
- DIRECTOR'S REPORT (if necessary).

1. ARIZONA DEPARTMENT OF ADMINISTRATION
A. Review of FY 2019 Building Renewal Allocation Plan.
B. Review of FY 2019 Capitol Mall Consolidation Fund Expenditures.
*C. Consider Recommending FY 2018 Partial Rent Exemptions.
2. ARIZONA STATE PARKS - Review of Buckskin Mountain State Park Project, Oracle State Park Project and FY 2019 Capital Improvements.
3. DEPARTMENT OF PUBLIC SAFETY - Review of Remote Housing Replacement.
4. *ARIZONA EXPOSITION AND STATE FAIR BOARD - Review of FY 2018 Capital Improvement Expenditures.
5. *ARIZONA DEPARTMENT OF CORRECTIONS - Review of FY 2019 Building Renewal Allocation Plan and Capital Projects.
6. *ARIZONA GAME AND FISH DEPARTMENT - Review of Ben Avery Shooting Facility Operation Center and Store.

* Consent Agenda - These items will be considered in one motion and no testimony will be taken.

The Chairman reserves the right to set the order of the agenda.

## MINUTES OF THE MEETING <br> <br> JOINT COMMITTEE ON CAPITAL REVIEW

 <br> <br> JOINT COMMITTEE ON CAPITAL REVIEW}1716 WEST ADAMS PHOENIX, ARIZONA 85007

HOUSE OF REPRESENTATIVES DAVID LIVINGSTON

April 25, 2018
Chairman David Livingston called the meeting to order at 9:07 a.m., Wednesday, April 25, 2018 in House Hearing Room 1. The following were present:

| Members: | Senator Kavanagh, Vice-Chairman | Representative Livingston, Chairman |
| :--- | :--- | :--- |
|  | Senator Allen | Representative Allen |
| Senator Cajero Bedford | Representative Alston |  |
| Senator Fann | Representative Cardenas |  |
|  | Senator Farley | Representative Carter |
|  | Senator Hobbs | Representative Leach |
|  | Senator Yee | Representative Rios |

## APPROVAL OF MINUTES

Hearing no objections from the members of the Committee to the minutes of December 19, 2017, Chairman David Livingston stated that the minutes would stand approved.

## CONSENT AGENDA

The following items were considered without discussion:

## ARIZONA STATE PARKS (ASP) - Review of Unisource Energy Services Easement.

ASP requested the Committee review ASP's proposed easement agreement with Unisource Energy Services (UES) at Lake Havasu State Park. Under this agreement, ASP will provide to UES an easement from an electrical box to a transformer to provide 13 cabins and a restroom shower building with electricity. The JLBC Staff provided options.

## ARIZONA DEPARTMENT OF TRANSPORTATION (ADOT) - Review of Safford Equipment Service Shop

 and Central Phoenix Impound Storage Yard.A.R.S. § 41-1252 requires Committee review of expenditure plans for monies appropriated for capital projects. ADOT requested Committee review of $\$ 4,000,000$ from the State Highway Fund for the construction of a new Safford Equipment Service shop. The department also requested review of $\$ 240,000$ from the State Highway Fund for the establishment of an impound storage yard in Central Phoenix. Funding for both projects was included in the FY 2018 Capital Outlay Bill (Laws 2017, Chapter 306). The JLBC Staff provided options and a potential provision:
A. ADOT shall report any project reallocations above \$100,000.

## ADOT - Review of De-icer Buildings Project.

A.R.S. §41-1252 requires Committee review of expenditure plans for capital projects with costs greater than $\$ 250,000$. ADOT requested Committee review of $\$ 1,100,000$ from the State Highway Fund for the construction of 2 de-icer buildings, as appropriated by the FY 2018 Capital Outlay Bill (Laws 2017, Chapter 306). The JLBC Staff provided options and a potential provision:
A. ADOT shall report any project reallocations above \$100,000.

Senator Kavanaah moved that the Committee give a favorable review with provisions as outlined in the JLBC Staff analysis, to the 3 consent agenda items listed above. The motion carried.

## REGULAR AGENDA

## NORTHERN ARIZONA UNIVERSITY (NAU) - Review of Science Annex Renovation.

Mr. Sam Beres, JLBC Staff, stated A.R.S. § 15-1671 requires Committee review of any non-debt financed university capital project paid for with funds from the university's Capital Infrastructure Fund (CIF). NAU requested Committee review of its plan to pay $\$ 17,400,000$ in cash to renovate its Science Annex Building. Of the $\$ 17,400,000$ total project cost, the university intends to utilize its FY 2019 and FY 2020 General Fund CIF appropriations totaling $\$ 9,100,000$. The JLBC Staff provided options and a potential provision:

## Standard University Financing Provision

A. A favorable review by the Committee does not constitute endorsement of General Fund appropriations to offset any revenues that may be required for debt service, or any operations and maintenance costs when the project is complete.

Ms. Katy Yanez, Associate Vice President, Government Affairs and Business Partnerships, NAU, responded to member questions.

Senator Kavanagh moved that the Committee give a favorable review of NAU's $\$ 17,400,000$ project to renovate the $3^{\text {rd }}$ and $4^{\text {th }}$ floors of its Science Annex Building with the provision. The motion carried.

## ARIZONA GAME AND FISH DEPARTMENT (AGFD) - Review of FY 2018 Building Renewal, FY 2017 Capital Improvements and FY 2017 Boat Structures.

Mr. Ben Murphy, JLBC Staff, stated A.R.S. § 41-1252 requires Committee review of expenditure plans for monies appropriated for capital projects and building renewal. The FY 2018 Capital Outlay Bill (Laws 2017, Chapter 306) appropriated $\$ 530,000$ from the Game and Fish Fund in FY 2018 for building renewal. The FY 2017 Capital Outlay Bill (Laws 2016, Chapter 126) appropriated $\$ 3,867,000$ from the Game and Fish Fund for capital improvements, of which the department designated $\$ 3,020,000$ for a Sterling Springs Hatchery renovation and $\$ 847,000$ for general capital improvements. The FY 2017 Capital Outlay Bill (Laws 2016, Chapter 126) also appropriated $\$ 874,900$ from the Watercraft Licensing Fund for boat structures projects. AGFD requested Committee review of the following items:

- $\$ 41,700$ for parking lot repairs at Page Springs Hatchery.
- $\$ 2,562,000$ for the remaining portion of its Sterling Springs Hatchery renovation project.
- $\$ 160,000$ for conference room improvements and a wildlife enclosure.
- \$245,100 for 3 statewide boat structure projects.

The JLBC Staff provided options and a potential provision.
Senator Kavanagh moved that the Committee give a favorable review to $\$ 41,700$ for parking lot repairs at Page Springs Hatchery, $\$ 2,562,000$ for the remaining portion of the Sterling Springs Hatchery renovation project, $\$ 160,000$ for conference room improvements and a wildlife enclosure, and $\$ 245,100$ for 3 boat structure projects. The favorable review included the following provision:
A. In accordance with A.R.S. §41-1252A(4), if AGFD adds a new project not listed in this request, the department must submit the proposed project and expenditure plan for Committee review.

The motion carried.

## ARIZONA EXPOSITION AND STATE FAIR - Review of FY 2017 Capital Improvement Expenditures.

Mr. Chris Gustafson, JLBC Staff, stated A.R.S. § 41-1252 requires Committee review of expenditure plans for capital projects. The Arizona Exposition and State Fair (AESF) Board requested Committee review of the scope, purpose and estimated cost of 4 capital projects with a total cost of $\$ 395,000$. The FY 2017 Capital Outlay Bill (Laws 2016, Chapter 126) appropriated \$1,000,000 from the Arizona Exposition and State Fair Fund to the AESF Board for capital improvements. Along with the $\$ 303,000$ reviewed by the Committee at its June 2017 meeting, the current request would leave $\$ 302,000$ remaining from AESF's FY 2017 capital appropriation. The JLBC Staff provided options and potential provisions.

Ms. Wanell Costello, Executive Director, Arizona Exposition and State Fair, responded to member questions.

Senator Kavanagh moved that the Committee give a favorable review to of 4 capital projects with a total cost of $\$ 395,000$. The favorable review included the following provisions:
A. AESF shall report to the JLBC Staff if the actual cost of any project included in the expenditure plan exceeds the estimated cost by more than $20 \%$.
B. If an emergency arises that is not addressed by the existing expenditure plan:

1. AESF shall notify the Chairman and the JLBC Staff that they plan to spend less than $\$ 50,000$ on an emergency project. AESF can proceed without Committee review.
2. The Chairman can allow AESF to move forward with an emergency project of greater than $\$ 50,000$ without Committee review.
3. The Chairman will notify AESF if he does not agree that the project is an emergency and that the project will require full Committee review.

An "emergency" project is defined as unforeseen, critical in nature, and of immediate time sensitivity.
C. It is the intent of the Committee to not review the $\$ 120,000$ allocation from the FY 2017 ADOA building renewal appropriation for the repair of the 1938 Works Progress Administration Civic Building until the provisions pursuant to Laws 2016, Chapter 126 are met. Statute does not permit ADOA to spend the $\$ 120,000$ until matching funds from the City of Phoenix are received. When ADOA and the Arizona Exposition and State Fair Board subsequently request review of the 1938 WPA Civic Building Project, they shall include information on how total project funds will be spent and if the repairs will be sufficient to make the building operational.
D. No monies from the FY 2017 (Laws 2016, Chapter 126) or FY 2018 (Laws 2017, Chapter 306) capital appropriation may be spent on projects related to the 1938 WPA Civic Building without prior Committee review.

The motion carried.
Without objection, the meeting adjourned at 9:31 a.m.
Respectfully submitted:

Representative David Livingston, Chairman

NOTE: A full video recording of this meeting is available at http://www.azleg.gov/ilbc/meeting.htm.

HOUSE OF REPRESENTATIVES

DAVID LIVINGSTON CHAIRMAN JOHN M. ALLEN
LELA ALSTON MARK CARDENAS heather carter VINCE LEACH rebecca rios

DATE: July 17, 2018
TO: Members of the Joint Committee on Capital Review

FROM: Morgan Dorcheus, Fiscal Analyst MD
Rebecca Perrera, Senior Fiscal Analyst RP
SUBJECT: Arizona Department of Administration - Review of FY 2019 Building Renewal Allocation Plan

## Request

A.R.S. § 41-1252 requires Committee review of expenditure plans for building renewal monies. The Arizona Department of Administration (ADOA) requests the Committee review its FY 2019 Building Renewal Allocation Plan.

The FY 2019 Capital Outlay Bill (Laws 2018, Chapter 277) appropriated a total of $\$ 11,000,000$ from the Capital Outlay Stabilization Fund (COSF) for building renewal. In addition, the FY 2019 Capital Outlay Bill directly appropriated $\$ 1,000,000$ from COSF to ADOA for demolition of the 1275 West Washington Street building.

ADOA is requesting a review of the full $\$ 12,000,000$ appropriation for building renewal and building demolition projects in FY 2019. The proposed expenditure plan is consistent with building renewal guidelines and appropriations.

## Committee Options

The Committee has at least the following 2 options:

1. A favorable review of the $\$ 12,000,000$ request.
2. An unfavorable review.

Under either option, the Committee may also consider the following provisions:
A. ADOA shall report any reallocations between projects as listed in Table 1 to the JLBC Staff. If there is significant change of scope in the reallocation reported by ADOA, the JLBC Staff shall recommend ADOA request Committee review of the reallocation.
B. The distribution of the emergency contingency allocation of $\$ 304,000$ be addressed as follows:

1. ADOA shall notify the Chairman and the JLBC Staff that they plan to spend less than $\$ 50,000$ on an emergency project. ADOA can proceed without Committee review.
2. The Chairman can allow ADOA to move forward with an emergency project of greater than $\$ 50,000$ without Committee review.
3. The Chairman will notify ADOA if he does not agree that the project is an emergency and that the project will require full Committee review.

An "emergency" project is defined as unforeseen, critical in nature, and of immediate time sensitivity. Prior reviews also included this provision.
C. If ADOA adds a new non-emergency project not listed in this request, the department must submit the proposed project and expenditure plan for Committee review.
D. The demolition of the 1275 West Washington Street and 1510/1520 West Adams Street buildings shall be bid as a single contract. The demolitions shall occur as soon as possible after the buildings have been vacated.
E. ADOA and the Department of Agriculture shall jointly report to the Committee by August 31, 2018 an update on the private lease agreement for the State Agricultural Laboratory, including location, square footage, cost per square foot, a proposed funding structure for any rent increase, and any improvements required to fit the needs of the lab.
F. Committee review does not include a commitment to fund any increase in rent or operating costs as a result of relocating the State Agricultural Laboratory to privately leased space.

## Key Points

1) The FY 2019 budget appropriates $\$ 11.0 \mathrm{M}$ from state agency rent funds ("COSF") for building renewal projects.
2) The main uses will be:

- HVAC Replacement, \$3.3 M
- Capitol Mall Elevator Repairs, $\$ 2.5 \mathrm{M}$
- Roof Replacement, \$1.6 M
- Fire Alarm Replacement, \$1.3 M

3) The budget also permits ADOA to use these funds for building demolition.
4) ADOA proposes using $\$ 700,000$ to demolish the $1510 / 1520$ West Adams building, which requires relocating the State Agricultural Laboratory to private space.
5) Relocation of the lab will likely increase annual rent costs by approximately $\$ 300,000$.
6) The budget also appropriates $\$ 1.0 \mathrm{M}$ directly for demolition of the old Attorney General building.

## Analysis

Building renewal appropriations provide for the major maintenance and repair of state-owned buildings. The building renewal formula takes into account the replacement value, age, and life-cycle of all structures in the ADOA building system. A total of $\$ 11.0$ million is appropriated to ADOA to fund $24.5 \%$ of the building renewal formula in FY 2019. In addition, $\$ 1.0$ million is appropriated to ADOA for building demolition. (These amounts exclude Department of Corrections' facilities as they received their own building renewal appropriation.) See Table 1 for the list of projects included in ADOA's FY 2019 Building Renewal Allocation Plan.

The following provides an overview of the amounts allocated to different categories of projects. Project categories include Fire and Life Safety, Building Shell, Major Building Services, Infrastructure, Building Interiors, Building Demolition, and Preventative Maintenance. Additionally, ADOA has allocated funding for project management and contingencies.

| Table 1 |  |
| :---: | :---: |
| FY 2019 Building Renewal Allocation Plan |  |
| Fire \& Life Safety Projects |  |
| ADOA Statewide Replace Fire and Life Safety Systems | \$ 1,300,000 |
| Building Shell Projects |  |
| ADOA Statewide Roof Repair, Roof Replacement, and Exterior Caulking | \$ 1,600,000 |
| Major Building Services Projects |  |
| ADOA Statewide HVAC Systems Replacement Statewide | \$ 3,320,000 |
| ADOA Capitol Mall Repair/Modernize Elevators | \$ $2,500,000$ |
| Subtotal | \$ 5,820,000 |
| Infrastructure Projects |  |
| ADOA Capitol Mall Replace/Repair Parking Lots | \$ 300,000 |
| Building Interior Projects |  |
| 400 W Congress - Carpet and Floor Covering Replacement | \$ 200,000 |
| Building Demolition Projects |  |
| 1275 W. Washington St. | \$ 1,000,000 |
| 1510/1520 W Adams St. | \$ 700,000 |
| Subtotal | \$ 1,700,000 |
| Preventative Maintenance Projects |  |
| ADOA Capitol Mall Preventative Maintenance | \$ 400,000 |
| Other Projects |  |
| Personnel Services/ERE Costs | \$ 275,000 |
| Building Renewal Project Scoping | 100,000 |
| Risk Management Insurance Premium | 1,000 |
| Emergency Contingency | 304,000 |
| Subtotal | \$ 680,000 |
| TOTAL | \$12,000,000 |

## Reasonableness of Estimates

The allocation plan represents ADOA's estimated cost of the proposed projects. ADOA estimates these costs based on past projects and project scoping services. ADOA uses state contracts and issues requests for quotes (RFQs) as necessary to procure vendors for each project. As a result, the project costs may change as the procurement process occurs.

The ADOA Building Renewal Allocation Plan lists potential projects within each category. ADOA states that all projects may not be funded. ADOA has indicated that they may need to add new projects not listed. In that circumstance, the JLBC Staff recommends the Committee adopt a provision requiring the department to submit any new non-emergency projects for Committee review.

To track ADOA's actual spending decisions, the FY 2019 Capital Outlay Bill included a footnote requiring ADOA to report to the JLBC Staff on the status of all building renewal projects and building renewal expenditures on or before January 31, 2019 and May 30, 2019.

## Fire and Life Safety Projects

A total of $\$ 1.3$ million will be allocated to fire and life safety system replacements statewide. ADOA has identified 2 priorities, including the 400 West Congress (Tucson) building and the 15 South $15^{\text {th }}$ Avenue building for fire alarm and suppression system replacement.

Fire alarm replacement has been a major building renewal priority for the past several years. ADOA has allocated approximately $\$ 15.7$ million in the last 6 years to repair or replace fire alarm systems at 52 state buildings. Fire alarm systems have a life-span of approximately 15 years.

## Building Shell Projects

A total of $\$ 1.6$ million will be allocated to 3 different projects to fund the repair or replacement of failing roofs and exterior caulking at agencies statewide within in the ADOA Building Renewal System. Building priorities include the 1700 West Washington Executive Tower, the Arizona Historical Society - Tucson History Museum, and Capitol Mall buildings.

## Major Building Services Projects

A total of $\$ 5.8$ million will be allocated to 7 different projects. Of this amount, $\$ 3.3$ million will be spent on 5 HVAC projects which include replacing chillers, cooling towers, boilers, and air handling units.

A sum of $\$ 2.5$ million will be spent on elevator repair or upgrade projects on the 1700 West Washington Executive Tower and 1700 West Washington-1938 Addition.

## Infrastructure Projects

A total of $\$ 300,000$ will be allocated to infrastructure projects. This amount will be used to replace or repair parking lot surfaces on the Capitol Mall and electrical infrastructure at Wesley Bolin Plaza.

## Building Interior Projects

A total of $\$ 200,000$ will be allocated to replacing carpet and floor coverings in the 400 West Congress building located in Tucson.

## Building Demolition

A total of $\$ 1,700,000$ is allocated to the demolition of 2 state buildings that have deferred maintenance costs higher than their replacement value. This amount includes asbestos testing and abatement, demolition and removal of buildings, asphalt, sidewalks, and retaining walls, and modification of existing
utility systems. One potential provision would require ADOA to bid the demolition of both buildings as a single contract. ADOA estimates that bidding the demolition of both buildings at the same time will save approximately $5-10 \%$ in total demolition costs (approximately $\$ 100,000$ to $\$ 200,000$ ). ADOA estimates the cost of demolition based on quotes from demolition contractors and statewide contracts for abatement and environmental oversight.

Generally, statute restricts building renewal appropriations for the repair and maintenance of existing building structures. Therefore, building renewal appropriations cannot be used for demolition projects. However, the FY 2019 Capital Outlay Bill permits ADOA to use monies appropriated for building renewal for building demolition.

Of the total $\$ 1.7$ million allocated for building demolition, $\$ 1.0$ million was appropriated specifically for demolition of the 1275 West Washington Street building previously occupied by the Attorney General. The building is currently vacant. Future site use has not yet been determined.

ADOA proposes using $\$ 700,000$ from the $\$ 11.0$ million building renewal appropriation for demolition of the 1510/1520 West Adams Street building, which share a common wall. 1510 West Adams Street is currently occupied by the State Data Center, which is in the process of being relocated to the IO Data Center in privately leased space. 1520 West Adams Street is currently occupied by the Department of Agriculture (ADA)'s State Laboratory. ADOA expects the building to be vacant by December 2018.

ADA plans to move the State Agricultural Laboratory to privately leased space. In addition to the space at 1520 West Adams Street, which totals 8,529 square feet, the department occupies approximately 3,227 square feet of space in the State Health Laboratory building operated by the Department of Health Services (DHS). ADA currently pays $\$ 132,100$ in annual rent, or $\$ 16$ per square foot, for space at the 1520 West Adams Street building and does not pay rent for space used in the DHS lab building. Both lab spaces ( 1520 West Adams and DHS location) will be consolidated and relocated to privately leased space.

ADOA reports that the department is currently working with ADA to identify a private lab space and negotiate a lease. ADOA expects rent payments to increase to approximately $\$ 30$ per square foot for an increase in annual rent costs of approximately $\$ 300,000$. A specific rent amount cannot be determined until a new location is identified.

After demolition, ADOA proposes that the 1510/1520 West Adams Street site be paved for parking until the best use of the site can be determined. The cost of paving is included in the $\$ 1.7$ million total building demolition estimate. ADOA plans to leave the 1275 West Washington site as a vacant lot.

Due to uncertainty surrounding the Agricultural Laboratory relocation, potential provisions include: a) a requirement for ADOA and ADA to provide a joint update on the project and b) a statement that JCCR review does not include a commitment to fund any increase in rent or operating costs.

## Preventative Maintenance Projects

A total of $\$ 400,000$ is allocated for planned electrical, mechanical, and plumbing maintenance on the Capitol Mall.

## Other Projects

The sum of $\$ 275,000$ will be allocated to cover project management costs for FY 2019 building renewal projects. Because some of the project costs listed above were based solely on agency estimates,
$\$ 100,000$ will be spent on contractors to better develop detailed scopes of work to implement projects in a cost-effective manner. A payment of $\$ 1,000$ will be paid for a Construction Insurance Premium. A total of $\$ 304,000$ is allocated for contingency.

Some of the amounts above are based on agency estimated scope and project costs, while some amounts are based on estimates from ADOA engineering studies, audits, and historical costs.

## FY 2018 Expenditures

The FY 2018 Capital Outlay Bill (Laws 2017, Chapter 306) appropriated a total of $\$ 8.3$ million for building renewal. This amount consisted of $\$ 5.7$ million from the General Fund and $\$ 2.6$ million from COSF. ADOA has spent $\$ 5.2$ million of the total FY 2018 appropriation. Of the remaining amount, $\$ 2.2$ million has been committed but unexpended, and $\$ 854,200$ is uncommitted and unexpended.

OFFICE OF THE DIRECTOR
100 NORTH FIFTEENTH AVENUE • SUITE 401
PHOENIX, ARIZONA 85007
(602) 542-1500

May 24, 2018

The Honorable John Kavanagh, Chairman
Joint Committee on Capital Review (JCCR)
Arizona State Senate

1700 West Washington Street
Phoenix, Arizona 85007
The Honorable David Livingston, Vice-Chairman
Joint Committee on Capital Review (JCCR)
Arizona House of Representatives
1700 West Washington Street
Phoenix, Arizona 85007
Dear Senator Kavanagh and Representative Livingston:
Section 41-1252, Arizona Revised Statutes, provides the Joint Committee on Capital Review (JCCR) shall review the expenditure of all monies appropriated for building renewal. Laws 2018, Second Regular Session, Chapter 277 (SB1522) appropriated \$12,000,000 to the Arizona Department of Administration (ADOA) to allocate to the ADOA Building System for building renewal projects. Chapter 277 which appropriated $\$ 10,000,000$ from the the capitol mall consolidation fund established by section 41-792.01 also requires ADOA to submit scope, purpose and estimated cost of the capital improvements to JCCR for its review prior to spending the appropriation.

ADOA requests JCCR review ADOA's FY 2019 ADOA Building System building renewal allocation plan for $\$ 12,000,000$ and capitol mall consolidation fund appripriation request for $\$ 10,000,000$.

To the extent possible, ADOA completes major maintenance and replacements to building systems before failures occur. Given the years of deferred major maintenance of an aging building

# The Honorable John Kavanagh 

The Honorable David Livingston
May 24, 2018
Page 2 of 2
infrastructure, it is difficult, if not impossible, to anticipate the timing and nature of building component failure. In the event of one or more unexpected critical breakdowns or imminent failures, ADOA may redirect all or some monies from an allocation to address critical priorities.

If you have any questions regarding ADOA's FY 2019 ADOA Building System building renewal allocation plan please contact Nola Barnes, Assistant Director, ADOA General Services Division (GSD), at 602-542-1954.

Sincerely,

$\mathbf{\$ 1 , 3 0 0 , 0 0 0}$ REPLACE FIRE AND LIFE SAFETY SYSTEMS to improve or eliminate an impending condition that threatens life or property in the ADOA Building System
A.R.S. §41-793.D. requires that the Arizona Department of Administration (ADOA) should give priority to fire and life safety projects. The ADOA Building System (Building System) has several fire alarm and suppression systems that have exceeded their life expectancy, are functionally obsolete and in various stages of failure, if not already failed. When fire alarm systems are out of commission for extended repair times, agencies must employ 24 -hour fire watch personnel, usually on an overtime basis, to achieve fire and life safety standards. This project will upgrade fire alarm and suppression systems necessary to bring state facilities into compliance with Federal, State, and Local fire and life safety regulations. The following list of deficiencies is a small portion of the work needed throughout the Building System.

Projected improvements include:

- ADOA-Replace Fire Alarm/Suppression-400 W Congress
- ADOA-Replace Fire Alarm/Suppression -15 S 15th Ave (including garage)
$\$ 1,600,000$ BUILDING SHELL for asset protection to address deficiencies in existing roofs, exterior closures, walls, windows and/or doors in the Building System

The deficiencies being addressed represent a small fraction of the deteriorating exterior systems where further repairs are not cost effective nor prevent leaks. Neglect of exterior roofs, walls, windows, and doors facilitates deterioration of building structural systems, leads to potential mold growth, and increases risk of damage to interior contents. Further, the costs of structure damage and mold abatement can often exceed the cost of replacing a roof membrane. This project is dedicated to proactively replacing failing roof systems throughout the Building System to mitigate negative impacts of interruption to mission critical functions and expensive "crisis-mode" emergency repairs and replacements.

Projected improvements include:

- ADOA-Repair Exterior Caulking-1700 W Washington Executive Tower
- ADOA-Repair or Replace Failing Roofs-Capitol Mall
- Historical Society, Arizona-Repair or Replace Failing Roofs-Tucson History Museum

## \$3,320,000 MAJOR BUILDING SERVICES in the Building System

The deficiencies in this project reflect the worsening condition of HVAC components, including large central plants, in the Building System. Many of the failing chillers and cooling towers are original to building construction, have surpassed their useful lives, and can no longer meet the cooling demands of the structures they support. Many systems are functionally unpredictable and imminent failure conditions threaten mission critical functions of public safety and institutional

> Arizona Department of Administration (ADOA) Building System FY 2019 Building Renewal Allocation Plan Laws 2018, Second Regular Session, Chapter 277 (SB1522) $\$ 12,000,000^{*}$
operations. Replacing aged and inefficient systems with new and more efficient systems will protect assets, provide comfortable climate control, and generate energy savings.

Various HVAC and energy management building controls throughout the Building System are lacking and/or equipped with disparate "front-ends" requiring multiple computers, workstations, and hardware to control major building systems. Some HVAC system components are inefficient, lack interconnectivity, and are failing. Replacing and integrating multiple systems into a single processing source will provide a centralized control of HVAC and energy management systems, decrease energy consumption, reduce equipment downtime, and improve allocation of personnel resources. Failure to address these aging systems could result in a shutdown of mission critical State services and increased costs for emergency procurement.

Projected improvements include:

- ADOA-Replace Failing HVAC-1600 W Monroe Cooling Tower
- ADOA-Replace Failing HVAC-1616 W Adams Air Handler Units
- Historical Society, Prescott-Replace Failing HVAC-Sharlot Hall Museum Heat Pumps
- Economic Security, Department of-Replace Failing HVAC- DES Statewide
- Public Safety, Department of-Replace Failing HVAC-DPS Statewide

## $\$ 2,500,000$ REPAIR/MODERNIZE ELEVATORS

Various building elevators within the Building System are obsolete and replacement parts are no longer available. Elevator failures would leave buildings without passenger or freight elevator services, placing the buildings out of compliance with ADA guidelines, increase emergency repair costs and have a detrimental effect on building safety and daily operations. The proposed allocation will address some of the critical needs on the Capitol Mall.

Projected improvements include:

- ADOA-Repair/Modernize Elevators-1700 W Washington Executive Tower
- ADOA-Repair/Modernize Elevators-1700 W Washington, 1938 Justice Addition

## \$300,000 INFRASTRUCTURE

This category of projects can include existing roadways, parking lots, pedestrian paving, site electrical and mechanical utilities, water supply and distribution, sanitary and storm sewers, waste treatment, electrical distribution, Service Entrance Sections (SES), site lighting, fencing, communications, and security.

Aging and obsolete Service Entrance Sections are subject to failure. Such failures can result in an arc flash or a blast that could present a life safety issue. Furthermore, a failure would result in a loss of electrical service and require costly emergency replacement.

Various parking lot repairs and replacements have been in "deferred indefinitely" status and are in an exhausted state of deterioration. The parking lot surfaces have succumbed to long-term

# Arizona Department of Administration (ADOA) Building System <br> FY 2019 Building Renewal Allocation Plan <br> Laws 2018, Second Regular Session, Chapter 277 (SB1522) <br> $\$ 12,000,000^{*}$ 

erosion, shifting, and settling caused by water penetration of the underlying pavement base and extreme weather conditions exacerbated by the weight of passing traffic. In most cases, interim measures such as patch repairs and sealants are ineffective and the only option is to remove and replace the asphalt. The proposed allocation will address critical needs throughout the Building System.

Projected improvements include:

- ADOA-Repair or Replace Infrastructure-SES at Wesley Bolin Plaza
- ADOA- Repair or Replace Parking Lots - Capitol Mall

## $\mathbf{\$ 2 0 0 , 0 0 0}$ BUILDING INTERIOR PROJECTS in the Building System

Replacement of floor coverings have been in a "deferred indefinitely" status for many years because limited building renewal monies are directed at keeping failing roofs, HVAC, electrical and plumbing systems, fire alarms, sewer and water systems operational. Many floor coverings-some as old as 20 years-have exhausted a deferred status and are in such poor condition they require immediate attention to avert or eliminate safety hazards. The expected useful life of most carpet in a typical office building is five to ten years. Conditions include floor coverings completely worn through to the floor, trapped dirt accumulation, patch maintenance, stains, unraveling seams and tears, unsuccessful duct tape repairs, and extensive rippling. Further, some carpet cannot be cleaned as an interim alternative because it so deteriorated the cleaning process further damages worn or torn fibers, and water penetrates and compresses "wet" dirt onto the floor surface underneath.

Projected improvements include:

- ADOA-Replace Carpet \& Floor Coverings-400 W Congress

## $\mathbf{\$ 1 , 7 0 0 , 0 0 0}$ BUILDING DEMOLITION in the Building System

Notwithstanding Arizona Revised Statutes Title 41, Chapter 4, Article 7; Laws 2018, Second Regular Session, Chapter 277, Section 5.B (SB 1522) authorizes ADOA to use monies appropriated for building renewal in fiscal year 2018-2019 for building demolition.

In FY 2016, ADOA procured the services of a consultant to perform Facility Condition Assessments (FCA) on all ADOA managed and or operated buildings in the Capitol Mall area, in Phoenix, and in Tucson. The Facility Condition Index (FCI) is an industry-standard measurement of facility condition calculated as the ratio of the costs to correct a facility's deficiencies to the facility's Current Replacement Value (CRV). It ranges from $0 \%$ (new building) to $100 \%$ (building beyond Service Life). A facility with an FCI of $60 \%$ or higher is typically recommended for complete replacement.

The analysis of the overall conditions of ADOA's Capitol Mall buildings indicate that even though the ADOA buildings are not as old as most of the buildings assessed by the engineering firm, they are in worse overall condition because of the higher than normal percentage of

> Arizona Department of Administration (ADOA) Building System
> FY 2019 Building Renewal Allocation Plan Laws 2018, Second Regular Session, Chapter 277 (SB1522) $\$ 12,000,000^{*}$
deferred maintenance. Most, if not all, renewable building system components have exceeded their statistical life cycle after 20-30 years of service, in some cases by 15 years. The poor condition and the continued deterioration of State facilities has resulted in costly reactive emergency repairs, underutilization of space, unanticipated vacancy, reactive leasing decisions, and unnecessary spending to lease privately owned facilities.

The Facility Condition Assessment for 1275 W Washington and 1510/1520 W Adams St identified a combined $\$ 24.3$ million of accrued long term, ongoing deferred maintenance. Demolition of these sites will reduce the State's liability for deferred maintenance.

Upon JCCR review, ADOA will combine these two demolition projects to achieve savings in procurement, overhead, mobilization and economies of scale.

Scope consists of the following:

- Test and abate any and all asbestos material
- Demolish and remove building debris, foundation slabs and foundation footings
- Remove all existing site work including asphalt, sidewalks and retaining walls
- Remove underground utilities
- Modify and disconnect building from the existing chilled water system
- Cap sewer and water utilities
- Bring site to a flat rough grade

## 1275 W Washington St - \$1,000,000

In December of 2017, the Arizona Office of the Attorney General vacated the 1275 W Washington St facility. With a FCI rating in excess of $60 \%$, it is more fiscally prudent to demolish and replace the building rather than correct the $\$ 15$ million in deferred maintenance. ADOA does not recommend investing in the repair and renovation of this building. In addition, the building configuration of approximately $100,000 \mathrm{SF}$ on two floors is inefficient and does not provide adequate secure onsite parking for visitors and employees. Buildings that remain vacant and in chronic decline, create an attractive nuisance that facilitates trespass and vandalism. Demolition of the 1275 W Washington building will represent an initial step in a long term strategy to improve the Capitol Mall.

## 1510/1520 W Adams St - \$700,000

In 2017, ADOA completed a Reuse Assessment and Cost Analysis for 1510/1520 W Adams St. As a result of this analysis, ADOA does not recommend investing in the repair and renovation of these buildings. Due to the ongoing $\$ 9.3$ million of deferred maintenance and the inherent nature of their purpose built design ( 1510 originally built as an office building was retrofitted over 30 -years ago to a data center and 1520 originally constructed to house the State Health Laboratory), these buildings are functionally obsolete in purpose, are not well suited, and are cost prohibitive to repurposing for alternative uses. The FCI comparing the cost of repair and renovation versus a new building project is more than $110 \%$ for these buildings.

$$
\begin{aligned}
& \text { Arizona Department of Administration (ADOA) Building System } \\
& \text { FY } 2019 \text { Building Renewal Allocation Plan } \\
& \text { Laws 2018, Second Regular Session, Chapter } 277 \text { (SB1522) } \\
& \qquad \$ 12,000,000^{*}
\end{aligned}
$$

The building at 1510 is expected to be vacant December 2018. Due to the persistent deteriorating condition of the 1520 building, the Department of Agriculture is currently pursuing a strategy to privately lease a modern purpose-built lab space for the State Agricultural Laboratory. The building will be vacant by the end of the second quarter of FY 2019.

Since there is no practical strategy for the reuse of these buildings, it is recommended to demolish the structures and pave the site for parking until such time that the highest and best use of the site would be determined.

## \$400,000 PREVENTATIVE MAINTENANCE of ADOA Managed Facilities

ADOA plans to spend this allocation on preventative maintenance for planned electrical, mechanical, and plumbing maintenance on the Capitol Mall.

## \$100,000 PROJECT SCOPING/PROFESSIONAL SERVICES for Building System-Building Renewal Project Priorities (FY 19 and Prospective FY 20)

Due to state agency attrition, some of the building renewal requests ADOA receives for funding consideration have deficient or very broad scopes of work, no supporting documentation, and insufficient, unreliable, or aged cost estimates. The proposed allocation supports ADOA in the development and implementation of appropriate scopes of work that adequately and cost effectively address the requirements of an agency project request.

## \$275,000 CONSTRUCTION SERVICES PROJECT MANAGEMENT COSTS for ADOA General Services Division (GSD) Personnel Services or Employee Related Expenditures

ADOA may allocate up to up $\$ 275,000$ in Personal Services and Employee Related Expenses for up to 5 FTE positions for building renewal project management.

## \$1,000 RISK MANAGEMENT INSURANCE PREMIUM for ADOA Risk Management Construction Insurance

The ADOA GSD pays a $0.34 \%$ Construction Insurance Premium from each fiscal year's building renewal appropriation to ADOA State Risk Management for Errors and Omissions (E\&O) insurance premiums associated with Engineering and Architectural (A\&E) services contracts. The premium is not paid for direct construction costs or reimbursable expenses.
\$304,000 BUILDING RENEWAL EMERGENCY AND CONTINGENCY ALLOCATION for Building System Statewide Priorities
ADOA will expend monies from allocation to repair or replace failed or failing HVAC, plumbing, electrical, and other building systems in mission critical structures as the need arises.

DATE: July 17, 2018
TO: Members of the Joint Committee on Capital Review
FROM: Rebecca Perrera, Senior Fiscal Analyst RP

SUBJECT: Arizona Department of Administration - Review of FY 2019 Capitol Mall Consolidation Fund Expenditures

## Request

A.R.S. § 41-792.02 requires Committee review of expenditure plans for monies appropriated from the Capitol Mall Consolidation Fund. The FY 2019 Capital Outlay Bill (Laws 2018, Chapter 277) appropriated $\$ 10,000,000$ from the Capitol Mall Consolidation Fund for the renovation of state-owned buildings.

The Arizona Department of Administration (ADOA) requests Committee review of its expenditure plan for $\$ 1,000,000$ from the Capitol Mall Consolidation Fund in FY 2019 to begin renovations of 1400 W. Washington.

## Committee Options

The Committee has at least the following 2 options:

1. A favorable review of the request.
2. An unfavorable review of the request

Under either option, the Committee may also consider the following provisions:
A. ADOA shall prioritize tenants moving from privately-leased space into 1400 W . Washington in its tenant relocation plan.
B. ADOA shall submit its finalized tenant list to the JCCR when requesting review for the remaining \$9,000,000 FY 2019 appropriation.
C. ADOA shall not use FY 2019 Building Renewal monies for the 1400 W. Washington without first requesting Committee review.

## Key Points

1) The FY 2019 budget appropriated $\$ 10 \mathrm{M}$ from for major building renovations to consolidate state space.
2) ADOA proposes to renovate 1400 W . Washington.
3) ADOA's plan appear in flux:

- On May 29, ADOA requested review of $\$ 10 \mathrm{M}$ and reported ADE will move from its privately-leased space on Central Avenue.
- On June 1, ADOA revised its request to $\$ 1 \mathrm{M}$ and reported it had not finalized the tenant relocation plan.

## Analysis

## Current Request

The FY 2019 Budget Procedures Budget Reconciliation Bill (BRB) (Laws 2018, Chapter 279) establishes A.R.S. §41-792.02 which created the Capitol Mall Consolidation Fund. The fund is administered by ADOA and is used for the renovation and repair of state-owned buildings. As session law, the bill directs the sale proceeds from the properties at 2910 N 44th Street in Phoenix, 2162 Vickey Street in Flagstaff, and the northeast corner of South Horne Street and East Baseline Road in Mesa. ADOA reports that all 1 property is in escrow and 1 property has an offer for a total of $\$ 10.4$ million (see Table 1 ).

| Sale of State Property Status <br> Capitol Mall Consolidation Fund Revenue |  |  |
| :---: | :---: | :---: |
| Property | Amount | Status |
| 2910 N 44th Street (Phoenix) | 9,340,000 | Escrow closes August 2018 |
| 2163 Vickey Street (Flagstaff) | N/A | No current offer. Appraised for $\$ 1.9$ million. |
| Horne Street/Baseline Road (Mesa) | 1,022,000 | Offer pending. Escrow would close October 2018 |
| Total | \$10,362,000 |  |

The JLBC Staff notes that the FY 2019 Budget Procedures BRB allows ADOA to direct the proceeds from the sale of 2162 Vickey Street in Flagstaff. However, ADOA intends to sell 2163 Vickey Street. The JLBC Staff is consulting with Legislative Council to address the error in next year's budget legislation.

The FY 2019 Capital Outlay Bill appropriated $\$ 10.0$ million from the Capitol Mall Consolidation Fund to ADOA for the renovation of state-owned buildings. ADOA plans to renovate 1400 W Washington which was vacated in FY 2018 when agencies moved into the renovated building located at 1740 W Washington. The building consists of approximately 63,450 square feet and includes 4 floors.

On May 29, ADOA requested that the JCCR review the entire $\$ 10.0$ million appropriation with the intent of relocating the Arizona Department of Education (ADE) from privately-leased space to the Capitol Mall. On June 1, ADOA lowered its requested review to $\$ 1.0$ million. ADOA plans to complete interior demolition and asbestos abatement, design major building systems such as HVAC and fire alarm systems, and upgrade the elevators as identified in Table 2 below.

| Table 2 |  |
| :---: | :---: |
| 1400 W Washington Building Renovation |  |
| Estimated Cost |  |
| Current Request |  |
| Asbestos Abatement/ Interior Demolition | \$ 400,000 |
| Major Building System Design | 150,000 |
| Elevator Repairs | 450,000 |
| Total | \$ 1,000,000 |

## Tenant Relocation

In its June 1 plan, ADOA no longer has a finalized its tenant relocation plan for the renovated building. Previously, ADOA reported that ADE would relocate from its privately-leased space at 3300 N Central Avenue. Currently, 260 FTE Positions occupy 83,100 square feet at the Central Avenue location. ADE would reduce its space requirements to approximately 250 square feet per FTE Position in 1400 W Washington, which is consistent with ADOA's new workspace standard. ADE currently pays $\$ 1.7$ million for its private lease. Once relocated, ADE would pay approximately $\$ 862,300$ to the Capital Outlay Stabilization Fund for rent. ADE's rent would be reduced by (50)\%. ADE's lease expires May 2019.

ADOA now reports that it will consider potential tenants for the building based on its overall plans for the Capitol Mall which could include relocating agencies already in state-owned space on the Capitol Mall. The FY 2019 Capital Outlay Bill requires ADOA to submit a report to the Committee for review by November 15, 2018 on its plans to relocate state agencies to the Capitol Mall and the planned disposition of vacant state buildings. The Committee may consider a provision requiring ADOA to prioritize tenants moving from private space into 1400 W . Washington. In addition, the Committee may consider a provision requiring ADOA to submit its finalized tenant list to the Committee when requesting review for the remaining $\$ 9.0$ million FY 2019 appropriation.

## Prior Renovation Projects

In FY 2017, ADOA was appropriated $\$ 4.2$ million to renovate 1740 W Adams. Ultimately, total renovation costs totaled $\$ 8.2$ million. To complete the project, ADOA utilized $\$ 4.0$ million from its FY 2016, FY 2017, and FY 2018 building renewal appropriations to update major building systems. Because the scope and budget of the current 1400 W . Washington project is not yet finalized, the Committee may consider a provision prohibiting ADOA from using its FY 2019 building renewal appropriation for the 1400 W. Washington project without Committee review.

## OFFICE OF THE DIRECTOR

100 NORTH FIFTEENTH AVENUE • SUITE 401
PHOENIX, ARIZONA 85007
(602) 542-1500

May 24, 2018

The Honorable John Kavanagh, Chairman
Joint Committee on Capital Review (JCCR)
Arizona State Senate

1700 West Washington Street
Phoenix, Arizona 85007
The Honorable David Livingston, Vice-Chairman
Joint Committee on Capital Review (JCCR)
Arizona House of Representatives
1700 West Washington Street
Phoenix, Arizona 85007
Dear Senator Kavanagh and Representative Livingston:
Section 41-1252, Arizona Revised Statutes, provides the Joint Committee on Capital Review (JCCR) shall review the expenditure of all monies appropriated for building renewal. Laws 2018, Second Regular Session, Chapter 277 (SB1522) appropriated $\$ 12,000,000$ to the Arizona Department of Administration (ADOA) to allocate to the ADOA Building System for building renewal projects. Chapter 277 which appropriated $\$ 10,000,000$ from the the capitol mall consolidation fund established by section 41-792.01 also requires ADOA to submit scope, purpose and estimated cost of the capital improvements to JCCR for its review prior to spending the appropriation.

ADOA requests JCCR review ADOA's FY 2019 ADOA Building System building renewal allocation plan for $\$ 12,000,000$ and capitol mall consolidation fund appripriation request for $\$ 10,000,000$.

To the extent possible, ADOA completes major maintenance and replacements to building systems before failures occur. Given the years of deferred major maintenance of an aging building

The Honorable John Kavanagh
The Honorable David Livingston
May 24, 2018
Page 2 of 2
infrastructure, it is difficult, if not impossible, to anticipate the timing and nature of building component failure. In the event of one or more unexpected critical breakdowns or imminent failures, ADOA may redirect all or some monies from an allocation to address critical priorities.

If you have any questions regarding ADOA's FY 2019 ADOA Building System building renewal allocation plan please contact Nola Barnes, Assistant Director, ADOA General Services Division (GSD), at 602-542-1954.

Sincerely,

# FY 2019 Capitol Mall Consolidation Fund Appropriation 

\$1,000,000 1400 W WASHINGTON BUILDING RENOVATION

## Project Summary

The Arizona Department of Administration (ADOA) is requesting review of $\$ 1$ million of the $\$ 10$ million appropriated for building renovation on the Capitol Mall. The $\$ 1$ million will allow ADOA to fund interior demolition, asbestos abatement, elevator modernization and procurement of design services for major building systems. Review of the remaining $\$ 9$ million will be deferred until ADOA receives review by JCCR of the proposed tenant relocation plan.

Located on the Capitol Mall in Phoenix, the building at 1400 W Washington was constructed in 1976. The $62,449 \mathrm{sf}$, four-level office building includes three stories above ground and a full basement. In February 2018, the building was vacated by tenants relocated into the newly renovated 1740 W Adams office building.

In FY 2016, ADOA procured the services of a consultant to perform Facility Condition Assessments (FCA) on all ADOA managed and or operated buildings in the Capitol Mall area, in Phoenix, and in Tucson. The Facility Condition Index (FCI) is an industry-standard measurement of facility condition calculated as the ratio of the costs to correct a facility's deficiencies to the facility's Current Replacement Value (CRV). It ranges from 0\% (new building) to $100 \%$ (building beyond Service Life). A facility with an FCI of $60 \%$ or higher is typically recommended for complete replacement. The 1400 West Washington facility currently has an FCI of $49.15 \%$, indicating the need for a full building renovation.

Below is a breakdown of the proposed $\$ 1$ million:

| Description of Service | Estimated Costs |  |
| :--- | ---: | ---: |
| Asbestos Abatement'Demolition | $\$$ | 400,000 |
| Major Building Systems Design Only | $\$$ | 150,000 |
| Elevator Modernization | $\$$ | 450,000 |
|  | TOTAL $\mathbf{S}$ | $\mathbf{1 , 0 0 0 , 0 0 0}$ |

DATE: July 17, 2018
TO: Members of the Joint Committee on Capital Review
FROM: Josh Hope, Fiscal Analyst IB for
SUBJECT: Arizona Department of Administration - Consider Recommending FY 2018 Partial Rent Exemptions

## Request

A.R.S. § 41-792.01D, authorizes the Director of the Arizona Department of Administration (ADOA), on recommendation from the Joint Committee on Capital Review, to grant a full or partial exemption from the payment of state-owned rental fees if an agency has vacated its space or lacks the financial resources to make a payment. ADOA requests the Committee recommend a partial Capital Outlay Stabilization Fund (COSF) rent exemption of $\$(800)$ for the Arizona Department of Emergency and Military Affairs (DEMA) and a corresponding increase of $\$ 800$ for the Arizona Department of Environmental Quality (ADEQ) for the office space at 400 West Congress, Tucson, Arizona in FY 2018.

## Committee Options

The JLBC Staff recommends that the Committee recommend a partial rent exemption of $\$(800)$ for DEMA and a corresponding increase of \$800 for ADEQ in FY 2018.

## Key Points

1) Statute allows ADOA to grant rent exemptions to agencies who have vacated rentable space or lack resources to make a payment.
2) ADOA has reallocated 241 square feet of office space from DEMA to the ADEQ.
3) $\operatorname{ADOA}$ is requesting a partial rent exemption of $\$(800)$ for DEMA and a corresponding increase of $\$ 800$ for ADEQ for office space at 400 West Congress.

## Analysis

Office Space at 400 W Congress, Tucson
DEMA was appropriated $\$ 9,000$ for its FY 2018 occupancy of 690 square feet of office space at 400 W Congress, Tucson. DEMA vacated approximately 241 square feet, which was backfilled by ADEQ, effective April 1, 2018. Beginning in FY 2019, ADOA will include the 241 square feet in the ADEQ annual space allocation and rental amount at 400 W Congress, Tucson.

Phoenix, Arizona 85007

## Re: Capital Outlay Stabilization Fund (COSF) Rent Exemption; Arizona Department of Emergency and Military Affairs

Dear Representative Livingston and Senator Kavanagh:
The Arizona Department of Administration (ADOA) requests the Joint Committee on Capital Review (JCCR) favorable review and recommendation of a partial Capital Outlay Stabilization Fund (COSF) rent exemption for the Arizona Department of Emergency and Military Affairs (ADEMA) of \$800 for FY 2018.
A.R.S. § 41-792.01(D) provides that the ADOA Director, on recommendation of the JCCR, may authorize a whole or partial exemption of COSF rent if the agency does not occupy or vacates space after the beginning of the fiscal year. Agencies that occupy state-owned buildings shall pay the higher of the amount reported by Joint Legislative Budget Committee (JLBC) Staff or the pro rata share based on actual occupancy.

The ADEMA was appropriated $\$ 9,000$ for its FY 2018 occupancy of 690 rentable square feet (RSF) of office space at 400 West Congress, Tucson, Arizona. The ADEMA vacated approximately 241 RSF of office space at 400 West Congress, Tucson, Arizona, which was

The Honorable David Livingston
The Honorable John Kavanagh
April 10, 2018
Page 2 of 2
backfilled by the Arizona Department of Environmental Quality (ADEQ) effective April 1, 2018. The ADOA will refund (exempt) the ADEMA $\$ 800$ for FY 2018 and bill the ADEQ $\$ 800$ for its pro rata occupancy of the increased space for FY 2018. In the future, beginning with FY 2019, ADOA will include the 241 RSF in the ADEQ annual space allocation and rental amount at 400 West Congress, Tucson, Arizona.

If you have any questions regarding $A D O A$ 's proposed $\operatorname{COSF}$ rent exemption, please contact Nola Barnes, Assistant Director, ADOA General Services Division, at 602-542-1954.

DATE: July 17, 2018
TO: $\quad$ Members of the Joint Committee on Capital Review
FROM: $\quad$ Ben Murphy, Fiscal Analyst SB for
SUBJECT: Arizona State Parks - Review of Buckskin Mountain State Park Project, Oracle State Park Project and FY 2019 Capital Improvements

## Request

A.R.S. § 41-1252 requires Committee review of expenditure plans for monies appropriated for capital projects. Arizona State Parks (ASP) is requesting Committee review of the following items:

- $\$ 2,500,000$ for a redevelopment of Buckskin Mountain State Park.
- $\$ 4,000,000$ for a redevelopment of Oracle State Park.
- \$2,000,000 for capital improvements.

These items were funded in the FY 2019 Capital Outlay Bill (Laws 2018, Chapter 277). In the Buckskin Mountain State Park project's case, the FY 2019 Capital Outlay Bill provided partial funding of $\$ 1,500,000$, with the remaining $\$ 1,000,000$ funded from the non-appropriated State Lake Improvement Fund.

## Committee Options

The Committee has at least the following 2 options:

1. A favorable review of the request.

1a. A favorable review of the request for $\$ 2.0$ million in capital improvements and a deferral of the Oracle State Park project and Buckskin Mountain State Park project reviews until December 2018, when the projects' master plans are to be completed.
2. An unfavorable review of the request.

Under either option, the Committee may also consider the following provisions:
A. On or before May 31 and November 30 of each year, ASP shall report to the JCCR Chairman and the JLBC Staff on all projects reviewed by JCCR since June 2016 that have not yet been completed. The report shall include the project expenditure to date, the expected completion date, any change in project scope and reasons for any delay in meeting the original project timeframe. Based on the ASP submission, the Chairman may decide whether to place any of the uncompleted projects on the agenda for further discussion at the next meeting.
B. A favorable review does not constitute endorsement of appropriations to pay for future development costs or operating costs.

## Key Points

1) ASP proposes spending $\$ 2.5 \mathrm{M}$ at Buckskin State Park for more RV/cabin sites and providing water and electrical service to new sites.
2) ASP plans to spend $\$ 4.0 \mathrm{M}$ at Oracle State Park for overnight camping and RV/cabin sites.
3) The Buckskin and Oracle Master Plans will not be complete until December 2018.
4) ASP proposes spending $\$ 1.3 \mathrm{M}$ on 5 statewide capital improvements projects and $\$ 700,000$ on major repairs.

## Analysis

## Buckskin Mountain State Park Redevelopment - Phase 1

Located on the Colorado River in Parker, Buckskin Mountain State Park provides opportunities for boating recreation, camping and hiking. The main components of the 1,700-acre park are 68 camping and recreational vehicle sites, 21 riverside cabanas, a 2 -lane boat launch ramp, a visitor center, a concessionaire, 3 restroom/shower buildings, hiking trails, picnic areas and wildlife viewing. In FY 2017, the park had 100,100 visitors and earned $\$ 862,300$ in revenue.

ASP is implementing a $\$ 7$ million redevelopment project, which will be completed in 3 phases over 3 fiscal years. Each phase corresponds with a geographical section of the park, with Phase 1 in the southeast land-locked section, and Phases 2 and 3 in the coastal northern and southwestern sections, respectively. The redevelopment project will include new cabin/RV sites, a new boat ramp, infrastructure renewal, new beach areas and facility restoration. Phase 1 will focus on demolition of existing infrastructure; water and electrical service upgrades; site work; a restroom/shower building; and RV/cabin sites. As part of the agreement with the concessionaire at Buckskin Market, the concessionaire will demolish the market building with its own funds. The construction and delivery of the as yet undetermined amount of pre-engineered cabins will be funded through the statewide 100cabin installation proposal favorably reviewed by JCCR in September 2016.

The agency will fund Phase 1 with $\$ 1.5$ million appropriated in the FY 2019 Capital Outlay Bill from the State Parks Revenue Fund (SPRF) in FY 2019 and $\$ 1.0$ million from the State Lake Improvement Fund (SLIF). SPRF generates revenues from state parks user fees, concession sales, gift shop sales and donations. ASP uses SPRF monies for operations and for capital projects subject to JCCR review. The non-appropriated SLIF generates revenues from a statutory distribution of state gas tax collections and the watercraft license tax. ASP uses SLIF revenues for operations and for capital projects at parks with boating sites, subject to JCCR review.

ASP plans to spend $\$ 2.5$ million for Phase 1 on 5 categories (see Table 1):

- $\$ 200,000$ for demolition of 11 RV/camping sites and mountain grading in the vicinity for site preparation.
- $\$ 450,000$ for potable water systems infrastructure and trenching, pedestals and transformers for electrical service systems.
- $\$ 450,000$ for sewage piping systems, earth grading and road infrastructure.
- $\$ 500,000$ for the installation of a pre-engineered

|  |  |
| :---: | :---: |
| Buckskin Mountain Phase 1 Expenditure Plan Summary |  |
|  |  |
| Category | Cost |
| Demolition | \$ 200,000 |
| Water \& electrical service upgrades | 450,000 |
| Site work \& infrastructure | 450,000 |
| Restroom/shower building | 500,000 |
| Installation of RV/cabin sites | 900,000 |
| Tota | \$2,500,000 | restroom/shower building.

- $\$ 900,000$ for the installation of $22 \mathrm{RV} /$ cabin sites, which includes paving, subgrading, ramadas, shade structures, and concrete pads.

ASP plans to organize a technical advisory committee in July 2018, which will provide stakeholder insight into the park's planning process. In fall 2018, the agency will conduct public meetings for further input on the park's draft plan. Using those insights, the park will develop a final master plan in December 2018, issue construction documents in June 2019 and complete construction in spring 2020.

The full 3 -year development plan will add 38 new RV/cabin sites (bringing the total number of sites to 127) and 3 new tent camping sites. ASP estimates an annual revenue increase of $\$ 1.3$ million. ASP's projections assume average occupancy rates for nearby parks; standard fees for cabins, RVs, camping; and projects increases in other fees commensurate to their expected increase in visitation.
Due to the projected higher volume of visitors, as well as increased staff, facility upkeep and utility usage, ASP also projects increased operating expenditures of $\$ 126,000$. This results in an estimated annual profit increase of $\$ 1.2$ million.

## Oracle State Park Redevelopment

Oracle State Park is a 4,000-acre desert landscape situated in the Santa Catalina Mountains in Pinal County. The day-use park is characterized by a historic ranch house with 2 rustic cabins; 15 miles of hiking, biking and equestrian trails; star-gazing opportunities; and wildlife resources. The park currently offers day use areas with ramadas, picnic areas, restrooms and grills, but does not offer any overnight camping.

The FY 2019 Capital Outlay Bill appropriated $\$ 4.0$ million from the State Parks Revenue Fund in FY 2019 for a redevelopment of the park. The redevelopment plan will include group campgrounds, RV/cabin sites, hiking and biking trails connected to the Arizona Trail, and new facilities to accommodate increased visitation, such as a contact station and restroom/shower building. The construction and delivery of the tentatively planned 20 pre-engineered cabins will be funded through the statewide 100cabin installation proposal favorably reviewed by JCCR in September 2016.

ASP plans to spend $\$ 4.0$ million for project on 6 categories (see Table 2):

- $\$ 400,000$ for a new electrical system for the historic ranch house and rustic cabins and electrical wiring and trenching for cabin/RV sites.
- $\$ 500,000$ for a new contact station consisting of a new entry sign, master sign and gatehouse. Contact stations are the first point of contact for park visitors, where they pay their fees and receive guidance on their stays.
- $\$ 500,000$ for the installation of 30 RV sites and 20 cabin sites including
- \$800,000 for a pre-engineered restroom/shower building.
- $\$ 900,000$ for site work and infrastructure, including sewage systems, plumbing, concrete pads, and improvements to roads, campgrounds and trails.
- \$900,000 for new wastewater and potable water systems.

The schedule for Oracle State Park development is similar to that of Buckskin State Park. ASP plans to organize a technical advisory committee in July 2018, which will provide stakeholder insight into the park's planning process. In fall 2018, the agency will conduct public meetings for further input on the park's draft plan. Using those insights, the park will develop a final master plan in December 2018, issue construction documents in June 2019 and complete construction in summer 2020.

The redevelopment plan will add 30 RV sites, 20 cabin sites, 20 tent camping sites, an equestrian group camp, and is projected by ASP to result in increases in day use, annual passes, special event permits and wedding rentals. Considering those additions, ASP estimates an annual revenue increase of $\$ 1.2$ million. ASP's projections assume average occupancy rates for nearby parks; standard fees for cabins, RVs, camping; and projects increases in other fees commensurate to their expected increase in visitation.

Due to the projected higher volume of visitors as well as increased staff, facility upkeep and utility usage, ASP also projects increased operating expenditures of $\$ 324,500$. This results in an estimated annual profit increase of $\$ 875,500$.

## FY 2019 Capital Improvements

The FY 2019 Capital Outlay Bill appropriated $\$ 2.0$ million from the State Parks Revenue Fund in FY 2019 for capital improvements. Of that amount, ASP plans to expend $\$ 1.3$ million on 5 statewide capital improvement projects (See Table 3):

- $\$ 200,000$ for Phase 1 of a campground improvements project at Lost Dutchman State Park. Phase 1 will include basic site preparation and design of a new campground area. Phase 2 is planned to include final site preparation and a restroom/shower building.
- $\$ 250,000$ for the replacement of the HVAC and backup power generator at Kartchner Caverns State Park. These systems provide climate control and backup power for the park's visitor center, along with backup power to caverns lighting.
- $\$ 250,000$ for Phase 2 of a maintenance building replacement project at Red Rock State Park. Phase 1, which was favorably reviewed by JCCR in September 2016, included the demolition of an existing maintenance building and procurement of new building materials. Phase 2 will fund utility relocations and site work for the new building.
- $\$ 250,000$ for the replacement of a main sewer pipe at Alamo Lake State Park connecting to 2 campgrounds, a contact station and maintenance building.
- $\$ 350,000$ for Phase 2 of a playground and amphitheater project at Dead Horse Ranch State Park. Phase 1, which was favorably reviewed by JCCR in September 2017, included the addition of a small amphitheater and new playground equipment. Phase 2 will fund utility relocations and site work for the playground and amphitheater.

| Table 3 |  |  |
| :---: | :---: | :---: |
| Statewide Capital Improvements |  |  |
| Park | Project | Amount |
| Lost Dutchman | Campground Improvements (Phase 1) | \$ 200,000 |
| Kartchner Caverns | HVAC and Backup Power Generator | 250,000 |
| Red Rock | Maintenance Building Replacement (Phase 2) | 250,000 |
| Alamo Lake | Sewer Pipe Replacement | 250,000 |
| Dead Horse Ranch | Playground \& Amphitheater (Phase 2) | 350,000 |
| Total |  | \$ 1,300,000 |

ASP proposes using the remaining $\$ 700,000$ of the appropriation on statewide major maintenance. Of this amount, the agency proposes $\$ 500,000$ for emergency repairs split between its north, south and west regions, $\$ 100,000$ for statewide boating dock repair and replacement, and $\$ 100,000$ for 3 repair projects associated with security gates, roofs and walls.

May 29, 2018
The Honorable, Representative Livingston, Chairman
Joint Committee on Capital Review
1716 West Adams
Phoenix, AZ 85007
RE: Arizona State Parks and Trails Fiscal Year 2019 Capital Development Projects

## Dear Representative Livingston,

Arizona State Parks and Trails (ASPT) requests review by the Joint Committee on Capital Review of the agency's Fiscal Year 2019 Buckskin Mountain State Park Capital Development Project. This recommended project is based on the amount approved by the Legislature in the recently enacted State Budget, which includes:

| Phase 1 Funding | Amount |
| :--- | :---: |
| State Park Revenue Fund (SPRF) | $\$ 1,500,000$ |
| State Lake Improvement Fund (SLIF) | $\$ 1,000,000$ |
| Total | $\$ 2,500,000$ |

ASPT is ready to move forward with this recommended Capital Development Project pending favorable review by the JCCR. If you have any questions regarding the proposed projects, please contact me at (602) 542-4174, or sblack@azstateparks.gov.

Sue Black,
Executive Director

"Managing and conserving Arizona's natural, cultural and recreational resources for the benefit of the people, both in our parks and through our partners."

## Proiect: Buckskin Mountain State Park - Park Renewal

Budget: $\$ 2,500,000$
Funding Type: $\$ 1.5 \mathrm{M}$ SPRF $\& \$ 1.0 \mathrm{M}$ SLIF
Category: Infrastructure Renewal \& Revenue Generation

## Project Description:

This 1,677-acre park has been operated by Arizona State Parks and Trails since 1967 and commands one of the finest views along the Parker strip, an 18-mile stretch between Parker Dam and Headgate Dam. Mountains line the river on both the Arizona and California sides, and the wildlife is as varied as the recreational opportunities along the river.

This picturesque park provides a scenic respite, mountain hikes, a desert escape and fun-filled water adventure. The park has a campground, cabana sites, beach, hiking trails, restrooms, showers, boat ramp, picnic area, basketball and volleyball court, playground, restaurant, camp store, arcade, gas dock, and ranger station. In the summer, Buckskin is popular for boating, jet skiing, swimming and camping. In the winter, visitors appreciate the mild climate and enjoy camping, fishing and hiking in the park. Both areas are year-round destinations for those looking to discover a variety of recreational and cultural resources.
Beginning in FY2019, Arizona State Parks and Trails (ASPT) will begin Phase 1 of renewing the 50 year old infrastructure of the park with the recently approved $\$ 2.5$ million two-year appropriation. In order to minimize the construction impacts to park users and revenues, the proposed redevelopment of the park has been modified into phased construction rather than full closure construction.

The Buckskin Mountain State Park revitalization project will be divided into three phases. Phases 1 and 2 will utilize $\$ 2.5$ million each and Phase 3 will require $\$ 2.0$ million. The phases will be completed over (3) consecutive years totaling $\$ 7.0$ million of improvements.

Phase 1 will includes new RV/Cabin sites, electrical service, water system upgrades and new shower/restroom facilities along the Southeast Section.
Phase 2 of the project will include new RV/Cabin sites, extension of the north day-use beach area and the installation of a new shower/restroom facility along the Northern Section of the park.

The final phase of the work will include the revitalization and expansion of the existing parking lot, installation of a new boat ramp and the restoration of the shoreline along the Northwest Section.

Beginning in early FY19, Arizona State Parks and Trails (ASPT) staff will begin the final planning process for the project based on the attached conceptual plan. ASPT staff will assemble a Technical Advisory Committee (TAC) comprised of stakeholder organizations to discuss updates and revisions to the base plan. The ASPT staff will also conduct public meetings throughout the remainder of 2018 to allow the public to participate in the planning process. Based on feedback received, ASPT staff will revise and develop the final Master Plan for the park. The final Master Plan should be completed this year and construction documents will be developed once the plan is final. The preliminary Phase 1 timeline is:

| Phase 1 Task List | Completion Date |
| :--- | :---: |
| Assemble TAC | July 2018 |
| Conduct Public Meetings | Fall 2018 |
| Master Plan Complete | December 2018 |
| Construction Documents | June 2019 |
| Construction Complete | Spring 2020 |

Buckskin Mountain State Park currently attracts over 70,000 visitors and generates revenue over $\$ 700,000$ annually. It is anticipated that visitation will increase to over 100,000 and generated revenue will approach $\$ 2.0$ million annually.

RE: Arizona State Parks and Trails Fiscal Year 2019 Oracle State Park Capital Development Project
Dear Representative Livingston,
Arizona State Parks and Trails (ASPT) requests review by the Joint Committee on Capital Review of the agency's Fiscal Year 2019 Oracle State Park Capital Development Project. This recommended project is based on the amount approved by the Legislature in the recently enacted State Budget, which is $\$ 4.0$ million from the State Park Revenue Fund (SPRF).

ASPT is ready to move forward with our recommended Capital Development Projects pending favorable review by the JCCR. If you have any questions regarding the proposed projects, please contact me at (602) 542-4174, or sblack@azstateparks.gov.

Sue Black,
Executive Director
cc: Richard Stavneak, Director, JLBC
Matthew Gress, Director, OSPB

## Project: Oracle State Park - New Park Development

Budget: $\$ 4,000,000$
Funding Type: SPRF
Category: Infrastructure Renewal \& Revenue Generation
Project Description:
The Park is located in the Northern Foothills of the Santa Catalina Mountains near the community of Oracle in Southern Pinal County. The park is 4,000 acres and contains various native plant communities, interesting geological formations, abundant wildlife resources, and the Kannally Ranch House, a historical architectural feature.
The park offers day-use picnic areas and over 15 miles of trails for use by hikers, mountain bikers and equestrians. A section of the Arizona Trail (a trail that traverses the state south to north) crosses through the park, and it is a designated International Dark Sky Park. With that status, sky viewing has become one of the primary environmental education activities at the park.
The preliminary development plan will include construction of the following amenities: group campgrounds, RV/cabin sites, hiking and biking trails connecting to the Arizona Trail, along with new facilities to support increased visitations (eg: Contact Station and Restroom Shower/Buildings)
Beginning in early FY19, Arizona State Parks and Trails (ASPT) staff will lead the planning process for the project. ASPT staff will assemble a Technical Advisory Committee (TAC) comprised of stakeholder organizations to assist in developing project goals and objectives, evaluate different conceptual designs, and discuss updates and revisions. The ASPT staff will also conduct public meetings late in 2018 to allow the public to participate in the planning process. Based on feedback from the TAC meetings and the public, ASPT staff will revise and develop the final Master Plan for the park. The final Master Plan should be completed this year and construction documents will be developed once the plan is final. The preliminary timeline is:

| Phase 1 Task List | Completion Date |
| :--- | :---: |
| Assemble TAC | July 2018 |
| Conduct Public Meetings | Fall 2018 |
| Master Plan Complete | December 2018 |
| Construction Documents | June 2019 |
| Construction Complete | Summer 2020 |

Oracle State Park currently attracts over 11,000 visitors and generates revenue of $\$ 40,000$ annually. When complete, it is anticipated that visitation will increase to over 50,000 and generated revenue will be approximately $\$ 1.2$ million annually.

## Arizona State Parks \& Trails

## Cost Estimate Sheet

| Project Name: | Year | Life Expectancy in Years |
| :--- | :---: | :---: |
| Oracle State Park | 2019 | 50 |

Description of Project:
The newly developed Oracle State Park will offer RV/cabin sites, visitor center, primitive and group camping, day use areas, and new restroom and shower facilities.

| Description | No | Cost | Cost Estimate |
| :--- | :---: | ---: | ---: |
| Electrical service upgrades | 1 | $\$ 400,000$ | $\$ 400,000$ |
| New entry, master sign \& gatehouse | 1 | $\$ 500,000$ | $\$ 500,000$ |
| Installation of RV/cabin sites | 2 | $\$ 500,000$ | $\$ 500,000$ |
| Restroom shower/building | 2 | $\$ 400,000$ | $\$ 800,000$ |

RE: Arizona State Parks and Trails Fiscal Year 2019 Capital Development Projects

## Dear Representative Livingston,

Arizona State Parks and Trails (ASPT) requests review by the Joint Committee on Capital Review of the agency's proposed Fiscal Year 2019 Capital Development Projects. These recommended projects are based on the amount approved by the Legislature in the recently enacted State Budget, which is $\$ 2.0$ million from the State Park Revenue Fund (SPRF).

ASPT is ready to move forward with these recommended Capital Development Projects pending favorable review by the JCCR. If you have any questions regarding the proposed projects, please contact me at (602) 542-4174, or sblack@azstateparks.gov.

Sincerely,

Sue Black,
Executive Director

cc: Richard Stavneak, Director, JLBC<br>Matthew Gress, Director, OSPB

Table 1: FY2019 Capital Development Projects

| Park Name | Project Description | Amount |
| :--- | :--- | ---: |
| Lost Dutchman | Phase 1 - New Campground Loop \& Restroom Shower Building | $\$ 200,000$ |
| Kartchner Caverns | HVAC \& Backup Power Generator | $\$ 250,000$ |
| Red Rock | Phase 2 Maintenance Building Replacement | $\$ 250,000$ |
| Alamo Lake | Sewer Pipe Replacement | $\$ 250,000$ |
| Dead Horse Ranch | Phase 2 Playground \& Amphitheater Site Work | $\$ 350,000$ |
| Statewide | Major Maintenance | $\$ 700,000$ |
| Total |  | $\$ 2,000,000$ |

## Proiect 1: Lost Dutchman State Park - Phase 1, New Campground Loop \& Restroom Shower <br> Building

Budget: \$200,000
Funding Type: SPRF
Category: Revenue Generator
Project Description: This request will fund Phase 1 of a new campground loop \& restroom shower building at Lost Dutchman State Park. Phase 1 funding will be used for the campground loop design and basic site preparation.

## Project 2: Kartehner Caverns State Park - HVAC \& Backup Power Generator Replacement

 Budget: \$250,000
## Funding Type: SPRF

Category: Infrastructure Renewal
Project Description: This request will fund the replacement of both the HVAC system and the backup power generator. The HVAC system provides climate control for the Discovery Center and the backup generator that provides backup power to both the Discovery Center and the Cave. Both systems are over 20 years old and have become unreliable as they have outlived their useful lives.

## Proiect 3: Red Rock State Park - Phase 2, Maintenance Building Replacement

Budget: $\$ 250,000$
Funding Type: SPRF

## Category: Infrastructure Renewal

Project Description: This request will fund the utility relocations and site work for the Maintenance Building Replacement Project at Red Rock State Park. The existing facility does not meet current safety standards or the needs of the park and has outlived its useful life. A portion of the Phase 1 funding included resources to procure the new maintenance building materials.

## Proiect 4: Alamo Lake State Park - Sewer Pipe Replacement

Budget: \$250,000
Funding Type: SPRF
Category: Public Health \& Safety
Project Description: This request will fund the replacement of the existing force main sewer pipe that provides sewer services to Campgrounds A \& B, the Contact Station and the Maintenance Building. The existing sewer main has deteriorated to the point of becoming a health and safety hazard.

## Proiect 5: Dead Horse Ranch State Park - Phase 2, Playground \& Amphitheater Site Work

Budget: $\$ 350,000$
Funding Type: SPRF
Category: Infrastructure Renewal \& Revenue Generation
Project Description: This request will fund the utility relocations and site work for the Playground \& Amphitheater at Dead Horse Ranch State Park. The Phase 1 funding has been expended on the Outdoor Education Amphitheater and the Playground equipment.

## Project 6: Statewide Major Maintenance

Budget: \$700,000
Funding Type: SPRF
Category: Infrastructure Renewal \& Public Health \& Safety
Project Description: This request will fund statewide major maintenance projects. It will be used to address emergency repairs in State Parks that arise throughout the year. The preliminary allocations are as follows:

| Park Name | Project Description | 2019 Amount |
| :--- | :--- | ---: |
| *North Region | Emergency Repairs | $\$ 200,000$ |
| *South Region | Emergency Repairs | $\$ 200,000$ |
| *West Region | Emergency Repairs | $\$ 100,000$ |
| Statewide | Boating Dock Repair \& Replacement | $\$ 100,000$ |
| Patagonia Lake | Main Entrance Security Gate Repair | $\$ 40,000$ |
| Jerome | Retaining Wall Repair | $\$ 30,000$ |
| Red Rock | House of Apache Fire Roof Repair | $\$ 30,000$ |
| Total |  | $\$ 700,000$ |

* Regional funding amounts may change based on statewide needs.

SUBJECT: Department of Public Safety - Review of Remote Housing Replacement

## Request

A.R.S. § 41-1252 requires Committee review of expenditure plans for monies appropriated to capital projects. The Department of Public Safety (DPS) is requesting review of $\$ 2,000,000(\$ 1,200,000$ from the General Fund and $\$ 800,000$ from the State Highway Fund) for the construction of at least 6 and up to 8 remote housing units, as appropriated by the FY 2019 Capital Outlay Bill (Laws 2018, Chapter 277).

## Committee Options

The Committee has at least the following 2 options:

1. A favorable review of the request.
2. An unfavorable review of the request.

Under either option, the Committee may also consider the following provisions:
A. The department shall report to the JLBC Staff on or before May 31 and November 30 of each year until the project is completed. The report shall include the status and the construction timeline of the units.
B. Upon completion of the procurement process, the department shall report to the JLBC Staff the cost and selected location of each unit.

## Key Points

1) DPS currently has 60 remote housing units for highway patrol troopers.
2) DPS proposes spending $\$ 2.0 \mathrm{M}$ to construct $6-8$ new housing units across the state to replace existing units.
3) The cost of the actual manufactured home is less than half of the project price.
4) DPS and ADOA have agreed to bid out this round of construction, but may seek to put this service on a list of preferred vendors in the future.

## Analysis

## Background

DPS currently has 60 housing units in remote locations across the state to station troopers closer to their patrol areas. These troopers, along with their immediate family, live full-time in the units. The troopers are responsible for paying rent to DPS of $\$ 50-\$ 100$ per month depending on the age of the unit, along with paying the full cost of utilities.

DPS reports that these units have a useful life of 20-25 years, but they believe that many exceed their useful life. According to DPS, temporary fixes are not cost effective and the units need to be replaced.

The FY 2018 Capital Outlay Bill (Laws 2017, Chapter 306) allowed the Arizona Department of Administration (ADOA) to use a portion of its FY 2018 building renewal appropriation to replace modular offices and remote housing units for DPS. DPS is working with a vendor to replace a housing unit in Wikieup and projects the final cost at $\$ 307,400$.

## Current Request

The FY 2019 Capital Outlay Bill appropriates a total of $\$ 2,000,000$ to DPS to replace remote housing units. This amount includes $\$ 1,200,000$ from the General Fund and $\$ 800,000$ from the State Highway Fund.

DPS proposes to use this funding to purchase and install at least 6 and up to 8 new manufactured housing units. According to DPS, the most critical remote housing locations in need of replacement are Dateland, Salome (2), Gila Bend (2), Gray Mountain (2), and Kayenta.

Based on the costs of the Wikieup housing unit, DPS expects the per unit cost to range from \$270,000 to $\$ 457,000$ (see Table 1 for cost detail).

| Table 1 |  |  |
| :---: | :---: | :---: |
| Projected Cost of Remote Housing Units |  |  |
| Category | Low Range | High Range |
| Manufactured home (3 bedroom) | \$ 120,000 | \$ 140,000 |
| Professional Services (i.e engineering) | 4,000 | 12,000 |
| Earthwork | 10,000 | 30,000 |
| Foundations and site concrete | 18,000 | 28,000 |
| Shed | 4,600 | 5,200 |
| Stairs and Awnings | 22,000 | 31,500 |
| Utilities | 24,000 | 80,000 |
| Tax and Bond | 17,600 | 28,300 |
| Abatement and Demolition | 30,000 | 72,000 |
| Contingency | 20,000 | 30,000 |
| Projected Total with Options | \$270,200 | \$457,000 |

## Procurement Process

The FY 2019 Capital Outlay Bill also requires that DPS submit a report on the procurement process for the new housing units to the Committee for review. DPS and ADOA have agreed to use an "Invitation for Bid" method of procurement, which uses price as the primary factor in awarding the contract.

DPS will select a standard floor plan that minimizes construction costs and install requirements. The expected plans call for 1,600 square foot, 3 -bedroom, 2 -bath units with a covered patio on both the front and back. The selected floor plan will be sent out for a competitive bidding process and a single vendor will be selected to build and install the 6 housing units. DPS believes that by purchasing all units from a single vendor, the per unit cost could be less than the Wikieup unit. As a result, the contract will also include 2 additional homes subject to available funding.

As part of the bidding process, the State Procurement Office will require any prospective bidder to visit and inspect each site to ensure that bids include the costs of all required and incidental work. The price submitted by bidders will include all incidental costs, such as demolition of existing unit, abatement, and utility relocation/hookup.

DPS plans to explore with ADOA if a statewide contract for these modular housing units would result in savings to the state for future units. DPS believes that an "all-in-one" contract would be difficult because of the many variables involved, such as the location and condition of the sites, the need for foundation work, abatement and related conditions.

DOUGLASA. DUCEY FRANKL, MILSTEAD Governor Director

May 29, 2018

Representative David Livingston, Chairman
Joint Committee on Capital Review
1716 West Adams
Phoenix, Arizona 85007

# ARIZONA DEPARTMENT OF PUBLIC SAFETY <br> 2102 WEST ENCANTO BLVD. P.O. BOX 6638 PHOENIX, ARIZONA 85005-6638 (602) 223-2000 

"Courteous Vigilance"

Dear Representative Livingston:
Laws 2018, Chapter 277 (Senate Bill 1522) appropriates $\$ 2,000,000$ for remote housing replacement. Funding is appropriated as follows: $\$ 1,200,000$ from the state general fund and $\$ 800,000$ from the state highway fund established by section 28-6991, Arizona Revised Statutes. Our intent is to purchase a minimum of six to eight housing units to be placed in identified areas of the state that strategically service the needs of the motoring public.

As shown in the attached, "Remote Housing Replacement," we intend to install a minimum of six new housing units by leveraging the procurement bidding system and attaining the most costeffective housing units through an identified standard housing plan.

Per A.R.S. 41-1252(c), the JCCR must review the intended scope, purpose, and estimated cost of this project before the Department can expend the monies. With this letter, we request placement on the next available agenda. We understand that the JCCR is tentatively scheduled to meet on June 19, 2018.

We can provide additional information to your staff prior to the meeting date. If you have any questions, please contact Phil Case, DPS Comptroller, at (602) 223-2463.

Sincerely,

Frank L. Milstead, Colonel
Director

# Arizona Department of Public Safety (DPS) 

Remote Housing Replacement
Laws 2018, Second Regular Session, Chapter 277 (SB1522)
$\$ 2,000,000$

## \$2,000,000 REMOTE HOUSING REPLACEMENT

To support Arizona's vast highway system (improving highway safety and providing emergency response), state troopers are stationed at reasonable travel intervals throughout the State. With great distances between Arizona's populations centers, remote housing compounds are necessary. The most cost-effective solution at these remote locations is modular housing. This appropriation is just a small piece of an ongoing plan to improve existing remote housing units in rural Arizona. Newer units are far more energy efficient and cost less to operate and maintain. Better living conditions offer more incentive for state troopers and their families to relocate to rural areas of the State.

DPS has approximately 60 residential units across the State. With a useful life of 20-25 years, approximately three units require replacement each year. Due to budget limitations, numerous units far exceed their useful life, with some units exceeding 50 years old. Older units are poorly insulated, no longer code compliant, and have rapidly deteriorating building systems. Temporary fixes to these units are not cost effective and immediate replacement is required.

Below are the most critical remote housing locations:

1. Dateland (P-043), 1,334 sf, remote duty house constructed in 1962.
2. Salome (M-171), 971 sf, remote duty house constructed in 1974.
3. Salome (M-172), 960 sf, remote duty house constructed in 1974.
4. Gila Bend (M-060), 1,080 sf, remote duty house constructed in 1973.
5. Gray Mountain (M-068), 1,152 sf, remote duty house constructed in 1978.
6. Gray Mountain (M-069), 1,152 sf, remote duty house constructed in 1978.
7. Kayenta (M-280), 1,056 sf, remote duty house constructed in 1987.
8. Gila Bend (M-061), $1,080 \mathrm{sf}$, remote duty house constructed in 1973.

In addition to the purchase of replacement manufactured homes, the following scope of work is required:

- Demolition/abatement of existing unit
- Site preparation/upgrade on-site utilities
- Foundation/masonry stem walls
- Sidewalks

DPS expects that each manufactured 3 bedroom unit will cost between $\$ 120,000$ and $\$ 140,000$. After including other costs such as utility instillation, landscaping, and the demolition of existing structures,

# Arizona Department of Public Safety (DPS) <br> Remote Housing Replacement <br> Laws 2018, Second Regular Session, Chapter 277 (SB1522) 

$$
\$ 2,000,000
$$

DPS expects the per-unit cost to range from approximately $\$ 270,000$ to $\$ 457,000$ (See Figure 1 for detailed cost estimates).

Figure 1

| Residantial Unit | Projected Low Range | Projected Upper Range |
| :---: | :---: | :---: |
| Manufactured home 3 bedroom | \$120,000,00 | 140,000,00 |
| Professional services (i,e. Engineering) | \$ 4,000.00 | \$ 12,000.00 |
| Earthwork | \$ 10,000.00 | \$ 30,000.00 |
| Foundations \& site concrete | \$ 18,000.00 | \$ 28,000.00 |
| shed | S 4,600,00 | 5,200.00 |
| Stairs \& Awning | \$ 22,000.00 | \$ 31,500.00 |
| Utilities | \$ 24,000.00 | \$ 80,000.00 |
| Tax erend | \$ 17,569.00 | \$ 28,307.00 |
| Projected Total | \$220,109,00 | \$ 355,007.00 |
| Optional Abatement \& Demolition of existing | \$ 30,000,00 | 72,000,00 |
| Optional Contingency | \$ $20,000.00$ | \$ 30,000,00 |
| Projected Toul with Options | \$270,169.00 | \$ $457,007,00$ |

The estimates are based on ADOA projections for procurement of one manufactured home. DPS expects that per-unit costs will decrease as a result of procuring multiple units. The expected costs are consistent with one recent DPS housing replacement project with expected costs of $\$ 307,365$ to replace a home in Wikieup, Arizona (See Figure 2 for detailed actual expenditures).

# Arizona Department of Public Safety (DPS) <br> Remote Housing Replacement 

Laws 2018, Second Regular Session, Chapter 277 (SB1522)

$$
\$ 2,000,000
$$

Timelines to complete the replacement build of all eight houses will be within the two-year timeline of June 30, 2020 as prescribed by Laws 2018, Senate Bill 1522, Section 25D. More specifically, each unit will have an approximate two-month build time once procurement, planning and development is completed. It is expected that the project site work will be performed simultaneously at each of the sites. The following is an example of a timeline for a current state housing unit replacement in Wikieup.

# Arizona Department of Public Safety (DPS) 

Remote Housing Replacement
Laws 2018, Second Regular Session, Chapter 277 (SB1522)
$\$ 2,000,000$

## PROCUREMENT PLAN

With assistance from ADOA, DPS will proceed with the replacement of critical units from the provided list. A standard floor plan will be selected to minimize costs and the amount of site work required for install. The standard housing unit will be a 1,600 square foot, three-bedroom, two bath unit to include a covered patio on both the front and back of the unit. Fencing and covered carports may be added, dependent on funds, but are not included in the standard floor plan.
ADOA and DPS have agreed that utilizing the Invitation For Bid method of procurement will be the best and most competitive means to procure these homes. The selected floor plan will be sent out for competitive pricing and a single bidder will be selected to provide and install the first six (6) modular homes from the list based on priority. Two (2) additional manufactured homes will be included in the main solicitation as additive alternates to be awarded based on the availability of funds. ADOA-GSD Procurement will require that any prospective bidder visit and inspect each future home site to ensure all pricing is inclusive of all required and incidental work.
The contract shall be awarded to the lowest bidder whose bid conforms to the requirements and criteria set forth in the Invitation For Bids. Once the selected bidder has been awarded, they will be required to provide a detailed construction schodule for each project site.
For future housing unit purchases, the DPS intends to increase purchasing leverage by working with the ADOA to pursue a statewide modular home contract and provide cost efficiencies to the State.

## BACKGOUND: FY 2018 REMOTE OFFICE/HOUSING REPLACEMENT

In 2017, the Legislature authorized DPS to use $\$ 550,000$ in building renewal monies to construct manufactured offices or remote housing units (Laws 2017, Chapter 306). DPS is utilizing the $\$ 550,000$ plus $\$ 46,200$ in operating budget for furniture, fixtures, and equipment monies to construct one replacement home in Wikieup (see Figure 2) and one replacement area office in Nogales (see Figure 3). The Wikieup home is expected to be completed in July and the Nogales office in September.
ADOA currently does have a statewide contract to purchase modular office space; however, the contract does not include modular housing units.
Laws 2018, $2^{\text {nd }}$ Regular Session, Chapter 277 did not include an appropriation to replace any manufactured offices.

Arizona Department of Public Safety (DPS)
Remote Housing Replacement
Laws 2018, Second Regular Session, Chapter 277 (SB1522)
$\$ 2,000,000$
Figure 3

| General Req̧uirements for office | \$204,152.93 |
| :---: | :---: |
| Stte Work | \$ 3,623.44 |
| Concrete | \$ 9,438.19 |
| Masoniy | \$ 6,425.85 |
| Metals | \$ 7.936.52 |
| Thermal \& Moisture Protection (Awning) | \$ 11,384.07 |
| Finishes | \$ 906.47 |
| Specialties | \$ 80.20 |
| Plumbing | \$ 1,242,40 |
| HVAC | \$ 1,223.08 |
| Electrital | \$ 967.75 |
| Earthwork | \$ 10,597,40 |
| Exterior Improwments | \$ 2,781.78 |
|  | \$260,750.08 |
| Estimate on furniture | \$ 25,000.00 |
| Estimated Total Cost | \$285,760.08 |

The total cost for this unit was less than the expected range for future manufactured offices because the Arizona Department of Transportation (ADOT) completed the demolition of the prior ADOT-owned building. In addition, site conditions were very favorable.

DATE: July 17, 2018
TO: Members of the Joint Committee on Capital Review
FROM: Chris Gustafson, Senior Fiscal Analyst $\mathcal{L}$
SUBJECT: Arizona Exposition and State Fair Board - Review of FY 2018 Capital Improvement Expenditures

## Request

Pursuant to A.R.S. § 41-1252 the Arizona Exposition and State Fair (AESF) Board requests Committee review of the scope, purpose and estimated cost of 10 capital projects with a total cost of $\$ 810,000$. The FY 2018 Capital Outlay Bill (Laws 2017, Chapter 306) appropriated $\$ 1,000,000$ from the Arizona Exposition and State Fair Fund to the AESF Board for capital improvements. The appropriation is nonlapsing through FY 2019.

## Recommendation

The Committee has at least the following 2 options:

1. A favorable review.
2. An unfavorable review.

Under either option, the Committee may also consider the following provisions:
A. AESF shall report to the JLBC Staff if the actual cost of any project included in the expenditure plan exceeds the estimated cost by more than $20 \%$.
B. If an emergency arises that is not addressed by the existing expenditure plan:

## Key Points

1) The State Fair is requesting review of $\$ 810,000$ of their $\$ 1.0 \mathrm{M} \mathrm{FY} 2018$ capital appropriation.
2) The FY 2018 Capital Appropriation is available until the end of FY 2019.
3) Projects include a new roof, a water treatment system, portable restrooms and other repairs.
1. AESF shall notify the Chairman and the JLBC Staff that they plan to spend less than $\$ 50,000$ on an emergency project. AESF can proceed without Committee review.
2. The Chairman can allow AESF to move forward with an emergency project of greater than $\$ 50,000$ without Committee review.
3. The Chairman will notify AESF if he does not agree that the project is an emergency and that the project will require full Committee review.

An "emergency" project is defined as unforeseen, critical in nature, and of immediate time sensitivity.
C. It is the intent of the Committee to not review the $\$ 120,000$ allocation from the FY 2017 Arizona Department of Administration (ADOA) building renewal appropriation for the repair of the 1938 Works Progress Administration Civic Building until the provisions pursuant to Laws 2016, Chapter 126 are met. Statute does not permit ADOA to spend the $\$ 120,000$ until matching funds from the City of Phoenix are received. When ADOA and the Arizona Exposition and State Fair Board subsequently request review of the 1938 WPA Civic Building Project, they shall include information on how total project funds will be spent and if the repairs will be sufficient to make the building operational.
D. No monies from the FY 2018 (Laws 2017, Chapter 306) or FY 2019 (Laws 2018, Chapter 277) capital appropriation may be spent on projects related to the 1938 WPA Civic Building without prior Committee review.

Provisions A-D repeat existing conditions from prior JCCR review of AESF projects.

## Analysis

## Background

The AESF requests the Committee review the following 10 projects:

1. Repair Agriculture Center Roof

The roof of the Agriculture Center, the main building for exhibitions during the State Fair, is 25 years old and leaks when it rains. Vendors have expressed concern that the leaks may damage merchandise and AESF believes that the roof is beyond its useful life. The estimated cost is $\$ 400,000$. The roof is 60,000 square feet, which results in an estimated cost per square foot of $\$ 6.67$ for the repairs.
2. Water Treatments for Coolers

The coolers the fairgrounds use require water to refrigerate. The hard water causes wear on the units and a water treatment system would filter the water so it is less corrosive to the coolers. The estimated cost is $\$ 100,000$.
3. Backflow Preventers

Backflow preventers protect the freshwater system and pipes from waste water. The City of Phoenix identified 21 freshwater lines on the fairgrounds that needed this protection and AESF believes they must comply with the city's recommendations. This will be the first phase of the project covering 8 freshwater lines. Estimated project cost is $\$ 70,000$.

## 4. Portable Restrooms

Attendance at the fairgrounds has exceeded the capacity of the stationary restrooms. Up to 3 portable restrooms will be purchased, which will allow AESF to discontinue renting portable restrooms for events. Each portable restroom contains 4-8 units/stalls and AESF anticipates the need for additional purchases in the future. The total cost is $\$ 60,000$.

## 5. Wireless Network

AESF uses vendor wireless networks to scan tickets and process ticket sales. This network has become inadequate for the data needed to perform this task. Additionally, the current, rented network does not comply with new security guidelines credit card companies require to make transactions. This purchase will create an in-house wireless network operated by AESF and remove the need for rented vendor networks. This request is the first of 2 phases. The total cost of Phase 1 of the project is $\$ 50,000$.

## 6. Portable Misting Fan and Coolers

AESF currently rents coolers and misting fans for events. They are seeking to purchase them to eliminate rental costs in future years. The total cost is $\$ 50,000$.
7. Drinking Fountains

AESF is installing drinking fountains to reduce the number of empty water bottles in and around the fairgrounds. This project was planned with the assistance of the Department of Environmental Quality (ADEQ). The total cost is $\$ 20,000$.
8. Ground Fault Interrupters (GFI)

A GFI is a circuit breaker that shuts off electricity in certain circumstances, such as when an electrical device encounters too much water or moister. AESF is installing them in areas with high traffic volume and in areas where barns and water are present. The total cost is $\$ 20,000$.
9. Illuminated Cable Covers

Cable covers protect electrical cables from damage. New covers are needed to comply with the Americans with Disabilities Act and illuminated covers are needed so vendors and fairgoers can see them in dimly lit areas. The total cost is $\$ 20,000$.
10. Pull Tubes and Utility Installation

AESF is installing tubes underneath the surface of walkways to avoid trip hazards for electrical cables that are installed during events. Additionally, water and electrical utilities will be installed in the same areas so utilities do not run unnecessarily long distances. The total cost is $\$ 20,000$.

## Reasonableness of Cost Estimates

The expenditure plan represents AESF's estimated cost of the proposed projects. Costs of the projects are based on contracted services and estimates for in-house construction when possible. AESF has indicated it will use ADOA General Services to identify the most expedient and least costly processes to accomplish these projects, whether through bid, state contracts, or in-house labor.

## Works Progress Administration Civic Building Renovations

The FY 2017 Capital Outlay Bill (Laws 2016, Chapter 126) allocated $\$ 120,000$ from the ADOA building renewal appropriation to repair the 1938 Works Progress Administration (WPA) Civic Building on the State Fair grounds. These monies have not yet been expended. AESF reports that no significant activity has occurred since the April 2018 Committee meeting, when the Committee reviewed an AESF capital request and received background information and updates about the Civic Building.

## Backaround

Chapter 126 stipulated that ADOA may not spend the monies allocated for this purpose unless the department receives matching monies from the City of Phoenix to repair the building and the state maintains control and ownership of the building. ADOA requested review of this funding at the June 2016 JCCR meeting. The Committee did not review the request since the statutory conditions had not been met.

The City of Phoenix approved $\$ 200,000$ for the historical preservation and renovation of the 1938 WPA Civic Building, contingent upon the state signing a conservation easement. ADOA subsequently determined it is against state policy to enter into such an agreement, resulting in an impasse with conversations ongoing.

The FY 2019 Capital Outlay Bill (Laws 2018, Chapter 277) contains a provision that extends the $\$ 120,000$ from lapsing until the end of FY 2020. The appropriation was originally scheduled to lapse at the end of FY 2018.

Given the current lack of activity on the project, the Committee may consider a provision prohibiting any of the FY 2018 or FY 2019 AESF capital appropriations from being spent on the 1938 WPA Civic Building without prior Committee review.

The Committee may also consider a provision requiring ADOA and the Arizona Exposition and State Fair to report on how total project funds will be spent and if the repairs will be sufficient to make the building operational when they request review of the $\$ 120,000$ allocation for the WPA Building Project. This report would be due when this item is resubmitted at a later time for JCCR review. This provision is identical to the one adopted at the April 2018 JCCR meeting.

CG:kp

May 29, 2018

The Honorable David Livingston Joint Committee on Capital Review Arizona House of Representatives 1700 W. Washington, Room 224 Phoenix, AZ 85007

Re: Request for the Placement on Joint Committee of Capital Review Agenda
Dear Representative Livingston:
The Arizona Exposition and State Fair (AESF), respectfully requests a favorable review for the expenditure from the FY18 appropriation in the amount of $\$ 810,000$ for the following capital improvements and building renewal projects:

1. Ag Center Roof Repair
2. Water Treatment for Coolers
3. Backflow Preventers - Phase 1
4. Portable Restrooms
5. Portable Misting Fans and Coolers
6. Wireless Network - Phase 1
7. Drinking Fountains
8. Ground Fault Interrupter Circuits
9. ADA and Illuminated Cable Covers
10. Utility installation and Electrical Pull Tubes
$\$ 400,000$
\$100,000
\$70,000
$\$ 60,000$
$\$ 50,000$
$\$ 50,000$
$\$ 20,000$
$\$ 20,000$
\$20,000
\$20,000

A brief description follows:

## 1. Ag Center Roof Repair - $\$ 400,000$

The roof in the Ag Center is over 25 years old and has several major leaks. This building is used for most events hosted on the fairgrounds. The leaks have become problematic for the promoters who contract to rent the building as the promoters have vendors whose merchandise has been damaged as a result of the leaks.

This repair is needed to be able to meet contractual obligations and to continue to attract business.

1826 West McDowell Road | Phoenix, Arizona 85007 | Phone 602-252-6771 | Fax 602-495-1302
www.AzStateFair.com

## 2. Water Treatment for Coolers - $\mathbf{\$ 1 0 0 , 0 0 0}$

The fairgrounds has installed new coolers in several buildings recently. The effect of hard water causes advance wear on the units. Installing a water treatment system would reduce the effects and help achieve maximum life of the units.

This purchase is necessary to maximize the value of the investment in equipment and reduce maintenance costs.

## 3. Backflow Preventers - Phase 1-\$70,000

There are 21 fresh water lines on the property that the City of Phoenix has determined require backflow preventers to protect the freshwater system. This is a first phase of installation. Backflow preventers will be installed on one of two of the primary lines. Additional backflow preventers will be installed in future phases.

This repair and improvement is being required by City of Phoenix and sought for safety of the public.

## 4. Portable Restrooms $-\$ 60,000$

Fairgrounds attendance for events and the fair exceed the capacity of current restroom facilities. The Fair and contracted shows currently rent temporary portable restrooms as a solution. The purchase of up to three portable restroom units will allow the Fairgrounds to offer a more pleasant experience for guests while at the same time reducing agency cost associated from rental, delivery and service used to manage the current solution.
This purchase is needed and being sought to reduce costs and for the convenience of the public.

## 5. Portable Misting Fans and Coolers - $\$ 50,000$

The fair currently rents portable misters and Porta-Cool units to help maintain guest comfort. These units also supplement areas with coolers or building that have no cooling systems to make the buildings usable during periods of high temperatures. Coolers are put in the barns for animal safety.
This purchase is being requested to reduce the cost of units the fairgrounds rents for fairgrounds use, create a new revenue stream by renting fairgrounds owned units to promoters and to provide comfort and safety of the public and animals.

1826 West McDowell Road | Phoenix, Arizona 85007 | Phone 602-252-6771 | Fax 602-495-1302 www.AzStateFair.com

## 6. Wireless Network for Grounds- Phase 1-\$50,000

Tickets to fairgrounds events and parking are sold using an internet-based solution. The current wireless system is incapable of managing data traffic necessary to facilitate the high volumes experienced during major events. Additionally, this first phase is necessary for future PCl compliance needs.

This purchase is necessary to conduct normal business operations.

## 7. Drinking Fountains $\mathbf{-} \mathbf{\$ 2 0 , 0 0 0}$

The fairgrounds is working with ADEQ to address the environmental impact caused by events at the fairgrounds. The installation of drinking water fountains will help reduce the number of empty water bottles entering the waste stream. The fountains will also improve customer satisfaction by providing an alternative to purchasing water while at events.

This improvement is needed and being sought for waste reduction as well as comfort and convenience of the public.

## 8. Ground Fault interrupters - $\$ 20,000$

Several areas are in need of GFI outlets and breakers to insure safe operation of electrical devices. These areas are heavily used by youth exhibiting livestock and are in around barns or areas with water use.

This repair and improvement is needed and being sought for safety of the public.

## 9. ADA and Illuminated Cable Covers - $\mathbf{\$ 2 0 , 0 0 0}$

The Fair and show promoters use cable covers to protect electrical cables from damage and to reduce trip hazards. ADA compliant sections are needed to improve accessibility, and illuminated sections are needed to increase visibility in low light situations.

This purchase is being requested to meet ADA requirements and for safety of the public.
10. Utility installation and pull tubes in the Plaza and north of the Wesley Building - $\$ 20,000$

During the fair and events, temporary electrical cabling and water lines are needed. Installation results in utilities crossing primary walkways. Electrical pull tubes will allow cables to be installed below the surface to reduce trip hazards. Needed permanent water and electric utilities will be installed at the same time to reduce cost of future projects.

This purchase is being sought for safety of the public.

The costs of the above projects are based on contracted services and estimates for in-house construction as much as possible. AESF will utilize ADOA General Services to identify the most expedient and fiscally responsible processes to accomplish these projects, whether through bid, state contracts, or in-house labor.

If you have any questions or require additional information concerning the requests, Please contact me at 602-252-6771

DATE: July 17, 2018

TO: Members of the Joint Committee on Capital Review
FROM: Micaela Larkin, Senior Fiscal Analyst JB for
SUBJECT: Arizona Department of Corrections - Review of FY 2019 Building Renewal Allocation Plan and Capital Projects

## Request

A.R.S. § 41-1252 requires Committee review of expenditure plans for building renewal monies. The Arizona Department of Corrections (ADC) is requesting the Committee review its FY 2019 Building Renewal Allocation Plan. The FY 2019 Capital Outlay Bill (Laws 2018, Chapter 277) appropriated $\$ 5,464,300$ from the Department of Corrections Building Renewal Fund to ADC for general building renewal.

The expenditure plan has 11 projects at 6 state prison facilities.

## Committee Options

The Committee has at least the following 2 options:

1. A favorable review of the request.
2. An unfavorable review of the request.

Under either option, the Committee may also consider the following provisions:
A. ADC shall report any reallocations between projects to the JLBC Staff as part of its existing semiannual building renewal status report.
B. If an emergency arises that is not addressed by the existing expenditure plan:

1. $A D C$ shall notify the Chairman and the JLBC Staff that they plan to spend less than $\$ 50,000$ on an emergency project. ADC can proceed without Committee review.
2. The Chairman can allow ADC to move forward with an emergency project of greater than $\$ 50,000$ without Committee review.
3. The Chairman will notify ADC if he does not agree that the project is an emergency and that the project will require full Committee review.

An "emergency" project is defined as unforeseen, critical in nature, and of immediate time sensitivity.
C. If ADC adds a new non-emergency project of more than $\$ 200,000$ not listed in this request, the department must submit the proposed project and expenditure plan for Committee review. Projects may not be subdivided as to fall below the $\$ 200,000$ threshold.

## Key Points

1) The FY 2019 budget appropriated $\$ 5.4 \mathrm{M}$ for ADC building renewal. The ADC proposal includes:

- $\$ 1.5 \mathrm{M}$ for fence repairs.
- $\quad \$ 1.4 \mathrm{M}$ for updating locking systems.
- \$1.3 M for large equipment purchases and repairs.
- $\$ 652,000$ for air conditioning and ductwork.
- $\$ 555,000$ for all other projects.

## Analysis

The FY 2019 Capital Outlay Bill (Laws 2018, Chapter 277) appropriated a total of $\$ 5.5$ million from the Department of Corrections Building Renewal Fund to ADC for general building renewal.

## FY 2019 Building Renewal Plan

Unless specifically noted, ADC estimates the costs of the bids based on ongoing similar work that the department has conducted or already initiated work at the site.

The FY 2019 ADC Building Renewal Plan displayed in Table 1 includes monies for the following projects:

- Perimeter Security
$\$ 1.5$ million for upgrading fencing and perimeter underground electronic systems. Of this amount, $\$ 705,000$ is to replace buried cables that allow the prison staff to monitor activity on the perimeter of the area at the Bachman, Stiner and Barchey units at ASPC - Lewis. The remaining $\$ 825,000$ is for replacing fencing at ASPC - Eyman SMU I.
- Locking and Control Systems
$\$ 1.4$ million for updating locking systems at Eyman SMU I. The locking system, which includes cell doors, shower doors and locks was built in 1987. For this unit, ADC estimated a total cost of \$8.3 million for the repairs. Including this allocation of $\$ 1.4$ million in the FY 2019 Building Renewal Plan allocation, ADC will have spent or allocated $\$ 6.8$ million for this project from these additional appropriations:
- $\$ 1.3$ million from ADC's FY 2014 building renewal appropriation.
- $\$ 1.2$ million from ADC's FY 2015 building renewal appropriation.
- $\$ 1.2$ million from ADC's FY 2016 building renewal appropriation.
- $\$ 250,000$ from ADC's FY 2018 building renewal appropriation and a special appropriation in the FY 2018 Capital Outlay Bill of $\$ 1.5$ million for this project.

The FY 2019 Building Renewal Plan consists of the following projects:

| Table 1 |  |
| :---: | :---: |
| FY 2019 Building Renewal Plan |  |
| Perimeter Security |  |
| Fence Upgrade - Eyman SMU I | \$ 825,000 |
| Fence Electronics Upgrade - Lewis | 705,000 |
| Subtotal | \$ 1,530,000 |
| Locking \& Control Systems |  |
| Locking Systems - Eyman SMU I | \$ 1,412,300 |
| Equipment Replacement and System Improvements |  |
| Water Tank Refurbishment - Yuma | \$ 400,000 |
| Walk-in Cooler and Freezer Replacement - Florence Central | 385,000 |
| Walk-in Cooler and Freezer Replacement - Florence North | 375,000 |
| Emergency Generator Replacements - Perryville | 155,000 |
| Subtotal | \$1,315,000 |
| Air Conditioning and/or Ductwork - Select Units |  |
| Air Conditioning - Eyman Cook | \$ 487,000 |
| Rooftop Ductwork - Tucson | 165,000 |
| Subtotal | \$ 652,000 |
| Infrastructure |  |
| Electrical Upgrades - Florence Central Unit | \$ 305,000 |
| Renovation |  |
| ADA Upgrades - Florence South Unit | \$ 250,000 |
| Building Renewal Subtotal | \$5,464,300 |
| Contingency | \$ 0 |
| total | \$5,464,300 |

Based on their original estimate, ADC estimates a remaining cost of $\$ 1.4$ million to complete the updating of this unit.

- Equipment Replacement and Systems Improvements
\$1.3 million for upgrading equipment. This amount includes the following projects:
- $\$ 400,000$ for the refurbishment of a water tank at APSC - Yuma. ADC replaced the other main water tank with monies from the FY 2016 Building Renewal appropriation at a cost of $\$ 397,000$. The underground water storage tank includes a protection system to prevent deterioration that can occur when the water, metal container, and soil interact. The refurbishment includes the repair of the tank itself and the upgrading of the protection system.
- $\$ 760,000$ to replace the freezer and walk-in coolers at 2 units that no longer properly function and keep food at the necessary temperatures, which includes $\$ 385,000$ at Florence Central and $\$ 375,000$ at Florence North.
- $\$ 155,000$ for the replacement of emergency generators at Perryville. The generators were purchased in 1981 and have exceeded their useful life.
- Air Conditioning and Ductwork

Of the $\$ 652,000$ allocated for air conditioning and heating/cooling system ductwork, ADC will use $\$ 487,000$ at ASPC - Eyman Cook to convert the evaporative coolers (installed in 1993) to air conditioning to improve the care of inmates with medical conditions and $\$ 165,000$ to replace ducts on the rooftop of ASPC - Tucson.

- Infrastructure

At the September 21, 2016 JCCR meeting, the Committee favorably reviewed the reallocation of $\$ 1.2$ million from other projects in the FY 2017 building renewal plan for electrical upgrades to the ASPC - Florence Central Unit. The unit experienced power failure for 5 days, and needed the replacement of equipment and electrical components. This FY 2019 allocation of $\$ 305,000$ is for additional wiring to complete the upgrade.

- Upgrades for Disabled Prisoners
$\$ 250,000$ is allocated for renovations to the South Unit at ASPC - Florence to meet the needs of disabled prisoners. ADC indicates these renovations are required to comply with the Americans With Disabilities Act (ADA).

Re: Submission for review of FY 2019 Building Renewal Plan
Dear Representative Livingston:
The Arizona Department of Corrections (ADC) requests placement on the next meeting agenda of the Joint Committee on Capital Review (JCCR) for its review of the ADC FY 2019 Building Renewal Plan.

ADC was appropriated $\$ 5,464,300$ from the Building Renewal Fund (2551) for FY 2019. Supporting documentation for the plan is enclosed.

If you have any questions, please contact Michael Kearns, Division Director, ADC Administrative Services Division, at (602) 542-1160.

| TOTAL FUND |  | \$ | 5,464,300 |

## ADC Building Renewal - Laws 2018, 2 ${ }^{\text {nd }}$ Reqular Session, Chapter 277, Section 5

## Eyman SMU I Perimeter Fence Upgrades

\$825,000
The perimeter fence at this maximum custody unit is in need of an upgrade. The fence which was original installed in 1987 no longer meets the needs of the unit and the unit's inmate management plan.

## Eyman SMU I Locking System Controls

\$1,412,290
Locking system controls at this maximum custody unit need to be upgraded. The original locking control system was installed in 1987 and has reached the end of its service life.

Eyman Cook Unit Air Conditioning Upgrade
\$487,010
The evaporative cooling system at the Cook Unit building 5, originally installed in 1993, needs to be upgraded to provide better cooling for inmates with health issues.

## Florence Central Unit Electrical Upgrades

\$305,000
During the initial phase of this project in 2017 additional issues were identified that need to be repaired and upgraded.

## Florence Central Unit Walk-in Cooler and Freezer Replacement <br> \$385,000

Originally installed in 1960, the walk-in cooler and freezer in the Central Unit need to be replaced as they have outlived their service life.

## Florence North Unit Walk-in Cooler and Freezer Upgrades

\$375,000
Originally installed in 1998, the walk-in cooler and freezer in the North Unit need to be replaced as they have outlived their service life.

## Florence South Unit ADA Upgrades

\$250,000
Provide additional ADA accommodations for inmates with disabilities in the South Unit.

## Lewis Perimeter Electronics Upgrades

\$705,000
The Stiner, Barchey and Bachman Units at the Lewis prison have perimeter electronic security systems that have reached then end if their service life and are in need or replacement.

## Perryville Generators Replacement <br> \$155,000

The emergency generators at four of the Perryville prison units have reached the end of their service life and need to be replaced. Originally installed in 1981 the current generators cannot be relied on to provide emergency backup power during power failures.

## Tucson Cimarron Unit Ductwork Replacement

\$165,000
The roof top ductwork at the Cimarron Unit has reached the end of its service life and needs to be replaced. The ductwork was originally installed in 1986.

CHAIRMAN
JOHN M. ALLEN
LELA ALSTON MARK CARDENAS HEATHER CARTER VINCE LEACH rebecca rios

DATE: July 17, 2018
TO: $\quad$ Members of the Joint Committee on Capital Review
FROM: Ben Murphy, Fiscal Analyst JB for
SUBJECT: Arizona Game and Fish Department - Review of Ben Avery Shooting Facility Operation Center and Store

## Request

A.R.S. § 41-1252 requires Committee review of the scope, purpose and estimated cost of any capital project over $\$ 250,000$. The Arizona Game and Fish Department (AGFD) is requesting Committee review of $\$ 1,250,000$ for its expenditure plan for construction of a store and operation center at its Ben Avery Shooting Facility.

## Committee Options

The Committee has at least the following 2 options:

1. A favorable review of the request.
2. An unfavorable review of the request.

Under either option, the Committee may also consider the following provisions:
A. AGFD shall report to the Committee if the Ben Avery Shooting Facility operation center/store construction project's total cost exceeds $20 \%$ of the estimate. The JCCR Chairman shall determine whether the project requires further review.
B. On or before January 31, 2019 and July 31, 2019, AGFD shall report to the JLBC Staff on the status and expenditures of the Ben Avery Shooting Facility operation center/store construction project. This conforms with a FY 2019 Capital Outlay Bill footnote that requires the same information for building renewal projects.

## Key Points

1) Using Federal Funds, AGFD is constructing a new $\$ 1.3 \mathrm{M}$ store/operations center building for its shooting facility in North Phoenix.
2) The existing 1970's building has an inefficient design, limited space for retail sales and outdated IT infrastructure.
3) The average total cost per square foot of the building is $\$ 284$.

## Analysis

Located in North Phoenix, the Ben Avery Shooting Facility provides the public with a wide variety of recreational shooting ranges. The 1,700-acre facility includes public use ranges for general firearms and specialty ranges for firearms requiring a higher skill level.

The main source of contact for customers entering the facility is the shooting sports center, which includes a public shooters check-in station and a retail store. At the check-in, customers pay for their shooting passes; buy items they may need, such as ear plugs, eye protection or targets; and rent certain equipment such as rifle rests. The department does not sell or rent firearms and ammunition. The store sells branded items like hats, shirts, cups and mugs.

AGFD reports that the constrained size and layout of the shooting sports center results in customers forming excessively long queues. Additionally, the lack of space for retail operations adversely affects the department's desire to increase retail sales. The 1970s-constructed building is also presenting increased maintenance needs due its age.

To address these concerns, the department plans to spend $\$ 1,250,000$ in Federal Funds for the construction of a new 4,400 square foot store and operations center. The building will feature office space, conference rooms, administrative support spaces, storage, customer service areas, public restrooms, landscaping and additional parking.

Table 1

| Ben Avery Shooting Facility Operation Center and Store Expenditure Plan |  |
| :---: | :---: |
| Category | Cost |
| Construction |  |
| Structure | \$ 143,300 |
| Building Exterior | 47,400 |
| Roofing, Insulation and Waterproofing | 27,600 |
| Interior | 166,300 |
| Plumbing | 80,400 |
| HVAC | 104,500 |
| Electrical/Fire Alarm | 122,000 |
| Earthwork | 89,500 |
| Exterior Improvements | 133,100 |
| Site Utilities | 63,200 |
| Subtotal | 977,300 |
| Other |  |
| Contingency | 48,900 |
| Taxes, Fees, Insurance and Other | 220,100 |
| Subtotal | 269,000 |
| Total | \$1,246,300 |

Table 1 presents a categorical summary of AGFD's expenditure plan. The bid estimates are from a design firm on state contract. The department will go out to bid for construction.

The Federal Funds are from the Pittman-Robertson Act monies, which are funded from a federal excise tax on firearms and ammunition. These monies are distributed to states and are eligible for construction of public target ranges.

Structural construction costs include concrete footing to avoid floor settlement, a concrete slab foundation, stem walls to join walls with the base and a pre-engineered metal building. The building exterior will consist of metal panels, windows, side lights, doors and paint. The building will be thermally insulated and waterproofed with roofing, gutters and downspouts.

Interior costs will make up the largest part of the building's cost, consisting of carpentry, doors, sidelights, drywall, ceilings, flooring, cabinets, caulking, painting, restrooms installation, signage, shelving and window treatment. To outfit the building with proper plumbing, the department will need equipment, sanitary fixtures, waste pipes, vents and drainage. HVAC costs include air-conditioning systems, freon piping, ductwork and controls. The main components of the building's electrical costs include service and distribution, equipment connections, convenience power, general lighting and control and a fire alarm system.

To prepare the site, AGFD will remove trees, demolish existing structures and parking lots, and excavate earth. The expenditure plan also includes exterior improvements, such as sidewalks, stairs, paving, fencing, landscaping and signage. The department will connect waterlines to existing sources, connect sewage pipes to an existing septic tank, and set up communications infrastructure.

In addition to the construction costs, the department will also pay fees associated with contingency, taxes, insurance and other factors.

BM:kp

May 29, 2018
Representative David Livingston, Chairman
Joint Committee on Capital Review
Capitol Complex
1700 W . Washington
Phoenix, AZ 85007-2890

Re: Request for Placement on Joint Committee on Capital Review Agenda
Honorable Representative Livingston:
In accordance with A.R.S. § 41-1252 A(4), the Arizona Game and Fish Department respectfully requests to be on the next scheduled agenda of the Joint Committee on Capital Review to review the Arizona Game and Fish FY 19 Capital Project Expenditure Plan for the Ben Avery Shooting Facility Store and Operation Center.

The following information for this review includes four attachments:

1. Arizona Game and Fish Ben Avery Shooting Facility Store and Operation Center Capital Project Expenditure Plan - FY 19 Non-appropriated funds
2. Ben Avery Shooting Facility Store and Operation Center Preliminary Design
3. Ben Avery Shooting Facility Store and Operation Center Artist's Conception
4. Ben Avery Shooting Facility Store and Operation Center Preliminary Cost Estimate
Ty E. Gray

Director
cc: Senator John Kavanagh, Vice Chairman, JCCR
Richard Stavneak, Staff Director, JLBC
Matthew Ores, Director, OSPB

## Arizona Game and Fish FY18 Final Capital Project Expenditure Plan

Project: Ben Avery Shooting Facility Store and Operation Center

## Category: Capital Improvement

Need: Founded in 1957, the Ben Avery Shooting Facility (BASF), formerly the Black Canyon Shooting Range, has received a five star rating from the National Association of Shooting Ranges. It is the first government facility to receive this designation. BASF is a world-class shooting range, City of Phoenix Point of Pride, and one of the largest publicly operated shooting facilities in the country. BASF offers a wide array of target shooting opportunities to the public, averaging more than 120,000 shooters per year, and is home to a number of regional and national class competitions and other major events.

The Arizona Game and Fish Department Ben Avery Operation Center was constructed in the early 1970s to facilitate customer use of BASF. The existing operation center is insufficient for the current level of use as is illustrated by complications in check-in and check-out, especially during peak use times. Demand often results in queues out the door both for customers seeking to use the range and users of the range seeking to pay invoices and to return products they have checked out.

The Department is a self-funded agency and is seeking to grow retail operations at BASF. The operation center is the logical location for retail sales as the central point of contact for customers; however the space was not designed for this use and is insufficient for current customer volume, precluding the Department from offering products and services which may be in demand.

The Department's customer service goals are continually impacted by delays in processing requests and user frustration resulting from the age and obsolete design of the current Facility Store and Operation Center. It is not possible to alleviate the situation due to the physical limitations of the current structure.

The age of the building has also posed challenges, such as increased maintenance needs and compliance with modern building requirements. For example, the operation center maintains an ADA compliant portable toilet due to the prohibitive nature of upgrading building restroom facilities. While this satisfies ADA requirements it is not consistent with the expected operation of a world-class shooting facility.

It is imperative that the Department provide a facility that is an appropriate a point of contact for the customers of BASF.

## Arizona Game and Fish FY18 Final Capital Project Expenditure Plan

Solution: Construct an approximately 4,400 square foot store and administration building. Customer facing improvements include specifically designed storage and customer service areas, public restrooms, offices, landscaping and additional parking. Operations will be enhanced by the inclusion of office space, conference rooms and administrative support spaces such as secure money counting room and work room. A modern facility will also provide electrical and IT infrastructure superior to that of the current building.

## Cost Estimate

| Activity | Quantity | Unit | Cost |
| :---: | :---: | :---: | :---: |
| Construction of BASF Store and Operation <br> Center | 1 | LS | $\$ 1,250,000$ |
| TOTAL ESTIMATE: |  |  |  |
| Estimates based on Design Consultants Opinion of Probable Cost (attached) |  |  |  |

Funding: The Arizona Game and Fish Department receives no State General Funds and must operate within the revenue it generates. Funding for this project will be provided by revenues generated by the shooting sports program, federal grants authorized for shooting range improvement, sponsorships and donations.

Impact of Not Approving this Request: By failing to approve this project, the customers of the Department will continue to have a customer experience that is not consistent with the high standards of customer service set forth by the Department; the ability of the Department to generate revenue will be negatively impacted; the opportunity to expand existing products and services will be diminished; and costs associated with maintaining an aging structure will increase.

## Clarifications \& Exclusions

## Clarifications:

1. This estimate is an opinion of probable construction cost, and represents in our best judgement, what we believe would be a fair price for the work involved as we understand the schematic design. Market conditions, special phasing requirements, unforeseen conditions, and modifications to the scope of work could impact the estimated cost.
** Due to the current labor shortage in the Arizona construction market, projects are currently experiencing a wide range bid numbers. One of the biggest challenges we have in this type of environment is vendors and subcontractors are keenly aware of who is bidding the project and poor coverage by general contractors, subcontractors or vendors will lead to escalated numbers. We encourage the Owner to advertise the project well and give GC's adequate time to prepare bids.
2. Documents used to prepare this estimate are curranty Preliminary Design.

The specifications are currently not provided See estimate for detailed cost for any assumptions.
3. The estimate is based on Hard bid delivery method with at least 6 qualified bidders.
4. Proprietary Vendors are not assumed.
5. Utility company tap/connection fees, impact fees and/or assessment fees are not included.
6. The estimate includes the cost of a $100 \%$ performance and payment bond, builder's risk insurance and any insurance deductible expenses.
7.The estimate includes allowances and assumed conditions which are identified as such in the estimate detail.
8. Door hardware is currently not listed in schedules and are included as an allowance.

## Plumbing, (Plumbing plans are not included in the preliminary set)

9. Domestic water is based on type $L$ copper piping.
10. Waste and vent piping is based on ABS plastic below and above grade, sewer to $5^{\prime}$ outside building.
11. Condensate piping is based on type $M$ copper.
12. Natural gas piping system is not included in the estimate.
13. Piping insulation is included for how water only.
14. No reclaimed water, grey water, rainwater collection or slat hot water is included.
15. Equipment capacities are not yet present for all devices and pricing is based on conceptual.

## HVAC, (Mechanical HVAC plans are not included in the preliminary set)

16. It is anticipated that the specification will be "open" for most major equipment.
17. The heating/cooling system is anticipated as split system heat pump DX.
18. Ductwork is to be galvanized steel with insulation for the supply and return only except as shown otherwise.
19. It is anticipated the controls are to be electronic only (no DDC).

## Marc Taylor Inc.

| BASF STORE AND OPERATIONS CENTER |  |  | Preliminary Design |
| :--- | :--- | ---: | ---: |
| BEN AVERY SHOOTING FACILITY | Gross Floor Area (sf): | Date: | 2-Oct-17 |
| BASF STORE AND OPERATIONS CENTER |  |  |  |
|  | Glarifications \& Exclusions |  |  |

20. LEED requirements are not included.
21. Building Information Modeling (BIM) is not included.

## Electrical

16. Emergency power is not included in the estimate.
17. Distribution equipment is assumed as copper bussed.
18. LEED requirements are not included.
19. Tel/Data, AV, CCTV and Security access controls are included as infrastructure only, conduit, boxes with pull strings. Equipment assumed by Others.

## Exclusions

Building permit cost is not included (by Owner).
Does not include owner contingencies.
Furnishings and Equipment are only included as detailed in the estimate. Movable furnishings are not included.
