## \*\* REVISED \*\*

JOINT COMMITTEE ON CAPITAL REVIEW Monday, November 10, 2025 1:00 P.M. Senate Appropriations, Room 109

#### **MEETING NOTICE**

- Call to Order
- Approval of Minutes of April 23, 2025.
- 1. ARIZONA DEPARTMENT OF ADMINISTRATION Review of FY 2026 Building Renewal Allocation.
- 2. ARIZONA DEPARTMENT OF CORRECTIONS Review of FY 2026 Building Renewal and Yuma Fire Alarm Projects.
- 3. DEPARTMENT OF HEALTH SERVICES Review of Arizona State Hospital (ASH) Projects.
- 4. DEPARTMENT OF JUVENILE CORRECTIONS Review of Adobe Mountain School Capital Projects.
- 5. ARIZONA STATE PARKS BOARD Review of Buckskin Mountain Boat Ramp Replacement.
- 6. PRESCOTT HISTORICAL SOCIETY Review of Territorial Governor's Mansion Restoration.
- 7. DEPARTMENT OF PUBLIC SAFETY Review of FY 2026 Headquarter Electrical Upgrade Project.

- 8. ARIZONA DEPARTMENT OF TRANSPORTATION
  - A. Review of FY 2026 Building Renewal Allocation Plan.
  - B. Review of ADOT Capital Projects.
- 9. NORTHERN ARIZONA UNIVERSITY Review of Capital Infrastructure Projects.
- 10. UNIVERSITY OF ARIZONA Approval of SPEED Bond Deferred Maintenance Projects.

11. ARIZONA GAME AND FISH DEPARTMENT - Review of FY 2025 and FY 2026 Building Renewal Allocations.

The Chairman reserves the right to set the order of the agenda.

10/30/2025 11/07/2025

## MINUTES OF THE MEETING

#### JOINT COMMITTEE ON CAPITAL REVIEW

April 23, 2025

The Chairman called the meeting to order at 9:03 a.m., Wednesday, April 23, 2025 in Senate Hearing Room 1. The following were present:

Members:

Senator Kavanagh, Chairman

Senator Alston Senator Farnsworth Senator Finchem

Senator Kuby

Absent:

Senator Shamp

Senator Sundareshan

Representative Livingston, Vice-Chairman

Representative Carbone

Representative De Los Santos

Representative Stahl-Hamilton

Representative Way

Representative Gress Representative Travers

#### **APPROVAL OF MINUTES**

Representative Livingston moved that the Committee approve the minutes of January 21, 2025. The motion carried by voice vote.

#### **CONSENT AGENDA**

The following items were considered without further discussion:

## 1. ARIZONA STATE LOTTERY COMMISSION - Review of FY 2025 Building Renewal Allocation Plan.

A.R.S. § 41-1252 requires Committee review of expenditure plans for monies appropriated for building renewal. The Arizona State Lottery Commission requested review of the \$218,200 appropriated from the Lottery Fund for the Commission's proposed FY 2025 building renewal allocation plan. The JLBC Staff provided options.

## 2. ARIZONA PIONEERS' HOME (APH) - Review of FY 2025 Elevator Replacement Project.

A.R.S. § 41-1252 requires Committee review of expenditure plans for monies appropriated for building renewal and capital projects with an estimated cost of more than \$250,000. The Pioneers' Home requested review of the \$413,800 appropriated Miners' Hospital for Miners with Disabilities Land Fund for APH's planned elevator modernization project. The JLBC Staff provided options.

## 3. ARIZONA STATE UNIVERSITY (ASU) - Review of Polytechnic Campus Chilled Water Expansion.

A.R.S. § 15-1683 requires Committee review of any university projects financed with system revenue bonds. ASU requested review of \$10,200,000 in bond issuances to expand the infrastructure of the Chilled Water Plant on the Polytechnic campus. The JLBC Staff provided options and potential provisions:

## Standard University Financing Provisions

- A. A favorable review by the Committee does not constitute endorsement of General Fund appropriations to offset any revenues that may be required for operations and maintenance costs when the project is complete.
- B. ASU shall provide the final debt service schedule and interest rate for the project as soon as they are available.
- C. On or before October 15 of each year until completion of the project, ASU shall report to the JLBC Staff on the status and expenditures of the project. The report shall include the project expenditures to date, any changes to the planned construction timeline, the expected completion date, and any change to the scope of the project.

<u>Representative Livingston moved</u> that the Committee give a favorable review of the agency requests in consent agenda items 1 through 3 with the JLBC Staff provisions. The motion carried by a voice vote.

Without objection, the meeting adjourned at 9:04 a.m.

Respectfully submitted:

| Jennifer Burns |
| Jennifer Burns, Secretary |
| Richard Stavneak |
| Richard Stavneak, Director |
| Senator John Kavanagh, Chairman

SUBJECT:

Arizona Department of Administration - Review of FY 2026 Building Renewal Allocation

Plan

#### Request

A.R.S. § 41-1252 requires Committee review of expenditure plans for monies appropriated for building renewal and capital projects and for any capital project with an estimated cost of more than \$250,000. The FY 2026 Capital Outlay Bill appropriated \$21,913,500 to the Arizona Department of Administration (ADOA) for building renewal projects. The department is requesting review of its allocation plan for the entire FY 2026 appropriation.

## **Committee Options**

The Committee has at least the following 2 options:

- 1. A favorable review of the request.
- 2. An unfavorable review of the request.

A.R.S. § 41-794 requires ADOA to report quarterly on the status of all capital projects, such as building renewal projects, including its actual spending relative to its plan.

### **Key Points**

- 1) The FY 2026 budget included \$21.9 million for ADOA building renewal.
- 2) ADOA's proposal allocates \$20.3 million across the following project categories:
  - \$9.8 million for HVAC, elevator, plumbing, and electrical upgrades.
  - \$4.7 million for fire and life safety projects.
  - \$2.5 million for roof replacements, paint, and other exterior upgrades to existing buildings.
  - \$1.8 million for preventative maintenance.
  - \$1.5 million for parking lot/road, security, electrical, and other infrastructure upgrades.
  - \$69,000 for ADA compliance projects.
- 3) The remaining \$1.6 million would be allocated as follows:
  - \$900,000 million for project management expenses.
  - \$250,000 for project scoping and professional services.
  - \$71,400 for the risk management construction insurance premium.
  - \$329,300 for an emergency contingency.

#### **Analysis**

Building renewal appropriations provide for the major maintenance and repair of state-owned buildings. ADOA is proposing to allocate its \$20.3 million of its \$21.9 million appropriation across 5 project categories: Major Building Services, Fire and Life Safety, Building Shell, Preventative Maintenance, Infrastructure, and ADA compliance. The remaining \$1.6 million is allocated for various administrative expenses and an emergency contingency.

The ADOA Building Renewal Allocation Plan lists planned projects within each category for which funds are intended to be used. The listed projects are not guaranteed funding, however, and monies may be reallocated as necessary.

### Major Building Services Projects

A total of \$9.8 million will be allocated to major building services projects. The department provided a list of 17 specific projects for which these monies will be used. Priorities include various HVAC, plumbing, electrical and elevator upgrades at state-owned buildings.

## Fire and Life Safety Projects

A total of \$4.7 million will be allocated to fire and life safety system replacements. ADOA provided a list of 8 specific projects for which these monies will be used. The listed projects include fire sprinkler repairs, fire alarm upgrades, and installation of new fire suppression systems at state-owned buildings.

### **Building Shell Projects**

A total of \$2.5 million will be allocated to building shell projects, which will include roof, window, paint and other building exterior upgrades. ADOA has identified 9 specific projects for which these monies will be used, primarily consisting of roof repairs at various state-owned buildings.

## Preventative Maintenance Projects

A total of \$1.8 million is allocated for planned electrical, mechanical, fire, and plumbing maintenance for ADOA-managed properties on the Capitol Mall and the Tucson Complex. As permitted by A.R.S. § 41-793.01D, ADOA may set aside up to 8% of its FY 2026 building renewal appropriation for preventative maintenance. This amount reflects 8% of the FY 2026 appropriation. The agency did not list any specific buildings or projects for which these monies will be used.

## Infrastructure Projects

A total of \$1.5 million will be allocated to infrastructure projects. This amount will be used to upgrade security systems, electrical systems, parking lots, and other equipment. ADOA identified 5 specific projects for which these monies will be used.

## **ADA Compliance Projects**

A total of \$69,000 is allocated for statewide ADA compliance projects. ADOA has identified two specific projects for which these monies will be used.

#### Administrative Expenses

The FY 2026 Capital Outlay bill continues a footnote allowing ADOA to allocate up to 5% of its capital appropriations for project management. ADOA has allocated \$900,000 for project management expenses, which amounts to 4% of the FY 2026 appropriation.

Because some of the project costs listed above were based solely on agency estimates, \$250,000 will be allocated for contractors to better develop detailed scopes of work to implement projects in a cost-effective manner. An amount of \$71,400 will be allocated for a Construction Insurance Premium.

## **Emergency Contingency**

A total of \$329,300 will be set aside as an emergency contingency. The Committee may consider a provision requiring that ADOA report on the use of these funds to JLBC Staff prior to expenditure.

Table 1	
FY 2026 Building Renewal Allocation Plan	1
Project Expenses	
Major Building Services Projects	\$ 9,842,800
Infrastructure Projects	1,540,000
Building Shell Projects	2,508,000
Fire & Life Safety Projects	4,653,000
Preventative Maintenance Projects	1,750,000
ADA Compliance	\$ 69,000
Subtotal	\$ 20,362,800
Administrative Expenses	
Project Management Expenses	\$ 900,000
Building Renewal Project Scoping	250,000
Risk Management Insurance Premium	71,400
Subtotal	\$ 1,221,400
Emergency Contingency	\$ 329,300
TOTAL	\$21,913,500 <sup>1</sup> /
1/ Total does not sum due to rounding.

ADOA Director

Nola Barnes
Assistant Director

September 23, 2025

The Honorable David C. Farnsworth, Chairman Joint Committee on Capital Review Arizona State Senate 1700 West Washington Street Phoenix, Arizona 85007

The Honorable David Livingston, Vice Chairman Joint Committee on Capital Review Arizona House of Representatives 1700 West Washington Street Phoenix, Arizona 85007

Dear Senator Farnsworth and Representative Livingston:

Arizona Revised Statutes, Title 41, Section 1252, requires the Joint Committee on Capital Review (JCCR) to review the expenditure of all monies appropriated for building renewal. Laws 2025, First Regular Session, Chapter 235, (SB 1737) appropriated \$21,913,500 to the Arizona Department of Administration (ADOA) to allocate to the ADOA Building System for building renewal projects.

ADOA requests placement on JCCR's October 2025 agenda for review of ADOA's FY 2026 Building Renewal Allocation Plan for \$21,913,500 to the ADOA Building System.

To the extent possible, ADOA completes major maintenance and replacements to the building systems before failures occur. Given the years of deferred major maintenance of an aging building infrastructure, it is difficult, if not impossible, to anticipate the timing and nature of building component failure. In the event of one or more unexpected critical breakdowns or imminent failures, ADOA may redirect all or some monies from an allocation to address critical priorities.

If you have any questions regarding ADOA's FY 2026 ADOA Building System Building Renewal Allocation Plan, please contact Nola Barnes, Assistant Director, ADOA General Services Division (GSD), at 602-361-1636.

Sincerely,

Elizabeth Alvarado-Thorson

Director

Laws 2025, First Regular Session, Chapter 235, (SB 1737) \$21,913,500

## FY 2026 Building Renewal Allocation Plan

Project Category	Allocation
Fire & Life Safety	\$ 4,653,000
Building Shell (Asset Preservation)	\$ 2,508,000
Major Building Services	\$ 9,842,800
Infrastructure	\$ 1,540,000
ADA Renovation	\$ 69,000
Project Scoping/Professional Services	\$ 250,000
Preventive Maintenance	\$ 1,750,000
Risk Management Construction Insurance Premium	\$ 71,446
Project Management Services	\$ 900,000
Building Renewal Emergency & Contingency Allocation	\$ 329,254
Total FY 2026 Building Renewal Allocation Plan	\$ 21,913,500

Laws 2025, First Regular Session, Chapter 235, (SB 1737) \$21,913,500

## \$ 4,653,000 FIRE AND LIFE SAFETY SYSTEMS

The purpose of these projects is to improve or eliminate an impending condition that threatens life or property within the ADOA Building System. A.R.S. § 41-793.D. requires that the Arizona Department of Administration (ADOA) should give priority to fire and life safety projects. When fire alarm systems are out of commission for extended repair times, agencies must employ 24-hour fire watch personnel, usually on an overtime basis, to achieve fire and life safety standards. ADOA has been using Building Renewal allocations to upgrade fire alarm and suppression systems in the ADOA Building System that have exceeded their life expectancy, are functionally obsolete and in various stages of failure. This project will upgrade remaining fire alarm and suppression systems as necessary to bring state facilities into compliance with Federal, State, and local fire and life safety regulations.

## Project deficiencies include:

Agency/ Tenant	Description	Estimated Costs
	F&LS Fire & Life Safety Allocation Contingency	\$ 423,000
LEG	F&LS - LEG - 1700 W Washington Museum - Fire Sprinkler Repairs	\$ 300,000
Capitol Mall	F&LS - ADOA - Capitol Mall Fire Alarms - Upgrade to EST4 Fire Alarm System	\$ 750,000
DHS	F&LS - ADOA - 250 N 17th Ave - Replace Dry Fire Suppression System	\$ 300,000
AHS	F&LS - AHS - Tempe Museum Replace Pre-Action System Main Line	\$ 400,000
AHS	F&LS - AHS - Tucson Museum Attic Sprinkler System	\$ 200,000
ASDB	F&LS - ASDB - Tucson School - Upgrade to EST4 Fire Alarm System	\$800,000
DEMA	F&LS - DEMA - State Emergency Operations Center - Install Fire Suppression	\$ 580,000
DEMA	F&LS - DEMA - MCEOC BLDG - Install Fire Suppression	\$ 900,000

## \$ 2,508,000 **BUILDING SHELL**

Building Shell improvements are to address deficiencies in existing roofs, exterior enclosures, walls, windows and/or doors. The deficiencies addressed here represent a small portion of the deteriorating exterior systems where continuing maintenance-based repairs are not cost effective nor prevent leaks. Neglect of exterior roofs, walls, windows and doors escalates deterioration of building structural systems, leads to potential mold growth, and increases the risk of damage to interior contents. Further, the costs of structure damage and mold abatement can often exceed the cost of replacing a roof membrane. This project category is dedicated to proactively replacing failing roof and exterior systems throughout the ADOA Building System to mitigate negative impacts of interruption to mission critical functions and

## Laws 2025, First Regular Session, Chapter 235, (SB 1737) \$21,913,500

expensive "crisis-mode" abatements, emergency repairs, and replacements.

Project deficiencies include:

Agency/ Tenant	Description	Estimated Costs
	SHEL Shell Allocation Contingency	\$ 228,000
ADOA	SHEL - ADOA - 1802 W Jackson St - Replace West Storefront and Wall Repairs	\$ 50,000
ADJC	SHEL - ADJC - Adobe Mountain Structural Repairs for Enterprise Housing Unit	\$ 330,000
ADJC	SHEL - ADJC - Adobe Mountain Kitchen Roof Repair and Re-Coat	\$ 180,000
ASDB	SHEL - ASDB - PHX School - Roof Replacements (Pre-Vocational BLDG, Elementary)	\$ 750,000
DES	SHEL - DES - Globe - Roof Replacement	\$ 120,000
DES	SHEL - DES - ATPC - Reshingle Ann C Drew Building and Gym	\$ 320,000
DPS	SHEL - DPS - Statewide Roof Replacements	\$ 300,000
PHS	SHEL - PHS - Sharlot Hall Transportation Building Roof Replacement	\$ 150,000
PHS	SHEL - PHS - Sharlot Hall Bashford House Exterior Paint and Repairs	\$ 80,000

## \$ 9,842,800 MAJOR BUILDING SERVICES

The deficiencies in the Major Building Services category reflect worsening conditions of HVAC, electrical, plumbing, and elevator components across the ADOA Building System.

Many of the HVAC systems include failing chillers, air handler units (AHUs), and cooling towers that are original to building construction. These systems have surpassed their useful lives and can no longer meet the cooling demands of the structures they support. Many systems are so weakened that unpredictable and imminent failure conditions threaten mission critical functions of public safety and institutional operations. Replacing aged and inefficient systems with new and more efficient systems will generate energy savings, protect assets, and provide comfortable climate control in Arizona's extreme environment.

HVAC and energy management system (EMS) controls throughout the ADOA Building System are lacking and/or equipped with disparate "front-ends," requiring multiple computers, workstations, and hardware to control HVAC systems. Some current HVAC system components are inefficient, lack interconnectivity, and are failing. Replacing and integrating multiple EMS into a single processing source will provide a centralized control of HVAC systems, reduce energy consumption, decrease equipment downtimes, and improve allocation of personnel resources. Failure to address aging and disparate systems may result in a shutdown of mission

# Laws 2025, First Regular Session, Chapter 235, (SB 1737) \$21,913,500

critical State services and expensive emergency basis procurements.

Plumbing systems throughout the ADOA Building System are original to building construction. These aging systems, in particular, the waste and vent piping, are failing at an increasing rate. Failure to replace deteriorating piping, especially the waste lines, will result in further damage to ceilings, walls, flooring and mechanical and electrical building systems.

Elevator control systems in the ADOA Building System are obsolete and replacement parts are not available. Failure of elevator controls will leave buildings without passenger or freight elevator services, creating out of compliance conditions for ADA requirements, increase emergency repair costs, and have a detrimental effect on operations.

## Project deficiencies include:

Agency/ Tenant	Description	Estimated Costs
	BSVC - Building Services Allocation Contingency	\$ 894,800
Board & Commissions	BSVC - ADOA - 1740 W Adams St - Replace Chillers	\$ 1,500,000
DES	BSVC - ADOA - 1789 W Jefferson St - Replace Generator	\$ 320,000
ADOA, DES, OEO	BSVC - ADOA - 1400 W Washington St - Fan Wall Repair	\$ 20,000
ADCRR	BSVC - ADOA - 701/801 E Jefferson St - Replace Cooling Towers, Pumps and Electrical	\$ 2,200,000
ADE, AG	BSVC - ADOA - 416 W Congress St - Elevator Modernization	\$ 600,000
Multiple Agencies	BSVC - ADOA - 400 W Congress St - Replace Failing Lighting with LED	\$ 550,000
AG	BSVC - ADOA - 402 W Congress St - Replace Failing Water Line	\$ 25,000
ADOA	BSVC - ADOA - 1919 W Jefferson St - Replace Swamp Coolers	\$ 200,000
Executive/ Multi Agency	BSVC - ADOA - 1700 W Washington St Tower - Replace Failing VAV Boxes	\$ 500,000
DOR	BSVC - ADOA - 1600 W Monroe St - Replace Air Handler Units (AHU)	\$ 500,000
Capitol Mall	BSVC - ADOA - Capitol Mall HVAC Control Upgrades	\$ 400,000
ADJC	BSVC - ADJC - Adobe Mountain - Replace Cooling tower	\$ 350,000
ASDB	BSVC - ASDB - PHX/Tucson - HVAC Replacements	\$ 393,000 *
DHS	BSVC - DHS - ASH Agave/Indigo Air handler Unit (AHU) Replacement	\$ 1,000,000
DPS	BSVC - DPS - Statewide HVAC Replacements	\$ 300,000

## Laws 2025, First Regular Session, Chapter 235, (SB 1737) \$21,913,500

PHS	BSVC - PHS - Sharlot Hall Museum Lawler Building HVAC Heat Pumps	\$ 65,000
PHS	BSVC - PHS - Sharlot Hall Lawler Building Humidifier Replacements	\$ 25,000

<sup>\*</sup>Telecommunication Fund for the Deaf (TCFD)

## \$ 1,540,000 INFRASTRUCTURE

This project can include existing roadways, parking lots, sidewalks and walkways, electrical service entrances (SES) and mechanical utilities, water supply and distribution, sanitary and storm sewers, waste treatment, electrical distribution, site lighting, fencing, communications, and security systems such as access control, locks, and camera devices. Many of these type systems have been in a "deferred indefinitely" status for many years and are in an exhausted state of deterioration. Parking lot surfaces have succumbed to long-term erosion, shifting, and settling caused by water penetration of the pavement base and extreme weather conditions exacerbated by the weight of passing traffic. Underground infrastructure for buildings can often be overlooked, however failure of these systems can shut down entire facilities and often require expensive reactive repairs. The proposed allocation will address critical infrastructure needs throughout the ADOA Building System.

Project deficiencies include:

		Estimated
Agency/ Tenant	Description	Costs
	INFR Infrastructure Allocation Contingency	\$ 140,000
LEG	INFR - LEG - 1700 W Washington St Museum - Sewer Line Replacement	\$ 220,000
LEG	INFR - LEG - 1101 W Washington St - Repair/Replace Perimeter Fencing	\$ 190,000
Capitol Mall	INFR - ADOA - Capitol Mall Security Upgrades	\$ 490,000
ASDB	INFR - ASDB - Tucson School - Replace Clifford BLDG SES Switchgear	\$ 400,000
Judiciary	INFR - SCT - Supreme Court Generator Controls Replacement	\$100,000

## \$ 69,000 ADA COMPLIANCE

There are numerous ADA deficiencies in the ADOA Building System that require remedy. Deficiencies include building access ramps, sidewalks, bathroom fixtures, drinking fountains, handrails, parking spaces, sites/amenities, and general reconfigurations of entrances and other areas in buildings to facilitate access to services and workplaces for persons with disabilities.

Project deficiencies include:

## Laws 2025, First Regular Session, Chapter 235, (SB 1737) \$21,913,500

Agency/ Tenant	Description	Estimated Costs
	ADA Access Allocation Contingency	\$ 9,000
DES	ADA - DES - 1924 E University Dr - Employee ADA Entrance	\$ 40,000
PHS	ADA - PHS - Sharlot Hall Museum ADA Entry Upgrades	\$ 20,000

## \$ 250.000 PROJECT SCOPING/PROFESSIONAL SERVICES

This allocation is for scoping, assessment and design services for potential and emergency building renewal projects. Some of the building renewal requests ADOA receives for funding consideration have deficient, vague, or very broad scopes of work, no supporting documentation, and insufficient, unreliable, or aged cost estimates. The proposed allocation supports ADOA in the development and implementation of detailed scopes of work that adequately and cost effectively address the requirements of an agency project request.

## \$1,750,000 PREVENTATIVE MAINTENANCE

ADOA plans to spend this allocation over two years on preventative maintenance for planned electrical, mechanical, fire, and plumbing maintenance for ADOA-managed facilities on the Capitol Mall and Tucson Complex.

## \$ 71,446 RISK MANAGEMENT CONSTRUCTION INSURANCE PREMIUM

The ADOA General Services Division (GSD) pays a 0.34% Construction Insurance Premium from each fiscal year's building renewal appropriation to ADOA State Risk Management for Errors and Omissions (E&O) insurance premiums associated with Construction, Engineering and Architectural (A&E) services contracts.

Laws 2025, First Regular Session, Chapter 235, (SB 1737) \$21,913,500

## \$ 900,000 BUILDING RENEWAL PROJECT MANAGEMENT EXPENSES

This allocation is to pay for personnel services and employee related expenses (ERE) and other project management related expenses associated with managing building renewal projects. Of the amount appropriated to ADOA for FY 2026 Building Renewal, ADOA may allocate up to five percent for project management related expenses. ADOA is allocating four percent (4%) of the appropriated amount for building renewal project management expenses.

## \$ 329,254 BUILDING RENEWAL EMERGENCY/CONTINGENCY ALLOCATION

ADOA will expend monies from this allocation to repair or replace failed or failing fire and life safety, HVAC, plumbing, electrical, and other building systems in mission critical structures as the need arises.

TO:

Members of the Joint Committee on Capital Review

FROM:

Jordan Johnston, Principal Fiscal Analyst

SUBJECT:

Arizona Department of Corrections - Review of FY 2026 Building Renewal and Yuma Fire

**Alarm Projects** 

## Request

The Arizona Department of Corrections (ADC) is requesting review of \$14,364,300 in capital expenditures. There are 2 components to the department's request.

A.R.S. § 41-1252 requires Committee review of expenditure plans for building renewal monies. ADC is requesting the Committee review its FY 2026 allocation plan for \$5,864,300. The expenditure plan includes a total of 23 projects across state prisons and the Correctional Officer Training Academy (COTA).

A.R.S. § 41-1252 also requires Committee review of capital projects with estimated costs exceeding \$250,000. ADC is requesting the Committee review its expenditure plan to upgrade the fire system at the Yuma prison. The FY 2026 Capital Outlay Bill appropriated \$8,500,000 to ADC for this purpose.

## **Committee Options**

The Committee has at least the following 2 options:

- 1. A favorable review of the requests.
- 2. An unfavorable review of the requests.

#### **Key Points**

- 1) The FY 2026 Capital Outlay Bill appropriated \$5.9 million for ADC building renewal. ADC's proposed expenditure includes:
  - a. \$2.7 million for plumbing and water projects.
  - b. \$1.0 million for facility improvements (restrooms, generators, ramp, furniture).
  - c. \$940,000 for building system upgrades (lighting, HVAC, roof repairs, flooring).
  - d. \$700,000 to convert kitchen to medical space.
  - e. \$400,000 to install a dialysis structure.
  - f. \$125,000 for security upgrades.
- 2) The FY 2026 Capital Outlay Bill included \$8.5 million to upgrade the fire alarm system at the Yuma prison. The FY 2026 funding will complete upgrades at all state-operated prisons.

## **Analysis**

## FY 2026 Building Renewal

The FY 2026 Capital Outlay Bill appropriated \$5.9 million from the Department of Corrections Building Renewal Fund to ADC for general building renewal. This amount represents 14.4% of their FY 2026 building renewal formula.

The request includes 23 individual projects totaling \$5.8 million, with the remaining amount set aside as contingency. *Table 1* below provides a summary of the planned expenditures by project type. For a detailed list of projects, please see the attached agency submission.

Table 1 FY 2026 Building Renewal Plan	
Plumbing and Water Projects Facility Improvements (restrooms, generators, ramp, furniture) Building System Upgrades (lighting, HVAC, roof repairs, flooring) Convert Kitchen to Medical Space Install Dialysis Structure Security Upgrades	\$ 2,650,000 985,000 940,000 700,000 400,000 125,000 64,300
Contingency  Building Renewal Total	\$5,864,300

In FY 2025, ADC received \$8.6 million in building renewal monies, of which \$4.4 million has been spent or encumbered to date.

#### Fire System Replacements

The FY 2026 Capital Outlay Bill appropriated \$8.5 million from the General Fund to ADC to replace the fire alarm systems at the Yuma prison. ADC plans to use this funding to repair and replace fire alarms and sprinkler systems at Yuma prison, which would complete the department's multi-year project to replace these systems at all 9 of the state-operated prisons.

The FY 2024 budget appropriated \$48.7 million to ADC for this same purpose at the Tucson, Perryville, Douglas, Winslow, and Safford prisons. To date, ADC reports it has spent or encumbered \$3.5 million of the FY 2024 funding.

Subject: Review of FY 2026 Building Renewal and Capital Project Appropriations

Dear Senator Farnsworth and Representative Livingston:

The Arizona Department of Corrections, Rehabilitation, and Reentry (ADCRR) requests placement on the next meeting agenda of the Joint Committee on Capital Review (JCCR) to review plans for the FY 2026 Building Renewal and Capital Project Appropriations from Laws 2025, Chapter 235. The enclosure summarizes the projects planned from these appropriations.

If I can provide additional information, please do not hesitate to contact me.

Sincerely,

Ryan Thornell Director

FROM:

Maggie Rocker, Principal Fiscal Analyst

SUBJECT:

Department of Health Services - Review of Capital Improvement Projects

## Request

A.R.S. § 41-1252 requires Committee review of expenditure plans for monies appropriated for building renewal and capital projects. The Department of Health Services (DHS) requests review of \$958,700 for 2 capital projects appropriated in the FY 2024 and FY 2026 Capital Outlay Bills:

\$695,000 appropriated from the Arizona State Hospital (ASH) Land Earnings Fund in FY 2026 for antiligature renovations.

\$263,700 for ASH water pump replacements, of which \$209,000 was appropriated from the ASH Fund in FY 2024 for this purpose and \$54,700 was appropriated from the Capital Outlay Stabilization Fund in FY 2026 to the Arizona Department of Administration (ADOA) for building renewal projects.

## **Committee Options**

The Committee has at least the following 2 options:

- 1. A favorable review of the request.
- 2. An unfavorable review of the request.

## **Key Points**

- 1) The FY 2026 budget appropriated \$695,000 from the ASH Land Earnings Fund to DHS for antiligature renovations at the state hospital. Anti-ligature renovations would remove or minimize the risk of self-inflicted injuries by hospital patients.
- 2) The FY 2024 budget included \$209,000 from the ASH Fund for ASH water pump replacements. DHS reports the cost estimate has since increased to \$263,700. To fund the difference, ADOA plans to utilize \$54,700 of its building renewal appropriation.

## **Analysis**

## Anti-Ligature Renovations

The FY 2026 budget appropriated \$695,000 from the ASH Land Fund for DHS to renovate patient care areas at ASH, including restrooms, on the civil and forensic campuses with ligature-resistant fittings. Approximately \$395,000 would support the replacement of 122 toilets with anti-ligature toilets and concealed flush valves to reduce the risk of patient self-harm. The remaining \$300,000 would be used for additional anti-ligature renovations, such as ligature-resistant partitions, plumbing, and door hardware. These renovations would comply with ligature-resistant environment standards recommended by regulatory bodies such as the Joint Commission and the Centers for Medicare & Medicaid Services.

## **ASH Water Pump Replacements**

The FY 2024 budget appropriated \$209,000 for replacement of 9 heated and chilled water pumps on ASH's campus that are past their lifespan. The pumps provide heating and cooling water to multiple buildings across the ASH campus. Since that time, DHS has received a revised estimate of \$263,700, which would be funded by the \$209,000 FY 2024 appropriation and \$54,700 from ADOA's building renewal allocation.

MR:jbu

August 22nd, 2025

The Honorable John Kavanagh, Chairman Joint Committee on Capital Review Arizona State Senate 1700 West Washington Street Phoenix, Arizona 85007

The Honorable David Livingston, Vice Chairman Joint Committee on Capital Review Arizona State Senate 1700 West Washington Street Phoenix, Arizona 85007

Dear Senator Kavanagh and Representative Livingston:

The Department of Health Services (DHS) respectfully requests placement on the upcoming agenda of the Joint Committee on Capital Review (JCCR). Laws 2025, First Regular Sessions, Chapter 235, (SB 1737) appropriated \$695,000 from the Arizona State Hospital (ASH) Land Fund in FY 2026 for capital improvement projects. A.R.S. § 41-1252 requires the agency to submit the scope, purpose, and estimated costs to the JCCR. The Arizona State Hospital is requesting a favorable review of \$695,000 of the \$695,000 capital appropriation.

## **Anti-Ligature Improvement Projects**

Estimated Cost: \$695,000

Regulatory authorities such as the Bureau for Medical Facilities Licensing, the Joint Commission and the Centers for Medicare and Medicaid Services (CMS) have standards requiring inpatient treatment facilities take necessary precautions in order to create a ligature-resistant environment. ASH has patient care areas in need of ligature-resistant retrofitting, which

Katie Hobbs | Governor

Sheila Sjolander | Interim Director

increases the safety of the environment by mitigating the likelihood of patient suicide via strangulation. The proposed project will allow ASH to renovate patient care areas, primarily restrooms, within the Civil and Forensic campuses with ligature-resistant improvements. Planned renovations include removing ligatures from partitions in restrooms, plumbing, door hardware, etc.

## **ASH Water Pump Replacement Projects**

Estimated Cost: \$263,678.08

DHS also respectfully requests placement on the upcoming agenda of the JCCR for a review of a previously appropriated capital outlay project for ASH Water Pump Replacements. Originally budgeted for \$209,000 in FY 2024, the updated cost estimate of the work has increased to \$263,678.08. The difference between the appropriation and the total anticipated cost will be bridged with non-appropriated *building renewal funding*.

If you have any questions regarding the Hospital's FY 2026 allocation plan, please contact Michael Sheldon@azdhs.gov or 602-220-6000.

Sincerely,

Sheila Sjolander

The Honorable David Livingston, Vice Chairman Joint Committee on Capital Review Arizona House of Representatives 1700 West Washington Street Phoenix, Arizona 85007

Dear Senator Farnsworth and Representative Livingston:

The Arizona Department of Administration, on behalf of the Department of Health Services (DHS), respectfully requests placement on the October agenda of the Joint Committee on Capital Review (JCCR). Laws 2023, First Regular Session, Chapter 135, (SB 1722) appropriated \$209,000 from the Arizona State Hospital Fund to the Department of Health Services in FY 2024 for water pump replacements. A.R.S. § 41-1252 requires the agency to submit the scope, purpose, and estimated costs to the Joint Committee on Capital Review (JCCR). ADOA is managing the project for DHS.

Department of Health Services - Arizona State Hospital (ASH) - Water Pump Replacements

Estimated Costs: \$263,680

The Arizona State Hospital (ASH) campus requires the replacement of nine (9) heated and chilled water pumps, as they have exceeded their anticipated operational lifespan. These pumps are critical infrastructure to supply heating and cooling to various hospital buildings and the Department of Corrections Rehabilitation and Reentry facilities situated on the ASH campus. The estimated costs for the pump replacements are approximately \$263,680. ADOA will fund

the approximately \$54,680 in excess of DHS' original \$209,000 appropriation from an ADOA Building System Building Renewal Appropriation.

If you have any questions regarding the DHS water pump replacement please contact Michael Sheldon, Deputy Director DHS, at Michael.Sheldon@azdhs.gov or 602-220-600.

Sincerely,

Elizabeth Alvarado-Thorson

SUBJECT:

Department of Juvenile Corrections - Review of Adobe Mountain School Capital Projects

## Request

A.R.S. § 41-1252 requires Committee review of the expenditure of monies appropriated for land acquisition, capital projects and building renewal. The Department of Juvenile Corrections (DJC) requests committee review of its plan to spend \$1,480,600 from the Criminal Justice Enhancement Fund (CJEF) and the DJC Local Cost Sharing Fund to complete 3 capital projects at the Adobe Mountain School facility.

## **Committee Options**

The Committee has at least the following 2 options:

- 1. A favorable review of the request.
- 2. An unfavorable review of the request.

## **Key Points**

- 1) The FY 2026 Capital Outlay bill appropriated \$1.5 million to DJC to complete 3 projects at the Adobe Mountain School facility.
- 2) The funding consists of \$1.4 million from the Criminal Justice Enhancement Fund and \$118,700 from the Department of Juvenile Corrections Local Cost Sharing Fund.
- 3) The projects are as follows:
  - \$641,000 to replace the make-up air unit in the kitchen.
  - \$536,600 to replace the Fire Line Booster Pumps within the water distribution system.
  - \$303,000 to replace the doors and locking systems in one of the West Housing Units.

## Analysis

The FY 2026 Capital Outlay appropriates a total of \$1,480,600 for three projects. This funding consists of \$1,361,900 from the Criminal Justice Enhancement Fund and \$118,700 from the Department of Juvenile Corrections Local Cost Sharing Fund as shown in *Table 1*.

Table 1						
Adobe Mountain School Facility Projects						
		DJC Local				
Project Name		CJEF	<b>Cost Sharing</b>	<u>Total</u>		
Kitchen Make-Up Air Unit Replacement	\$	522,300	\$118,700	\$ 641,000		
Fire Line Booster Pumps Replacement		536,600	0	536,600		
School Door and Lock Replacements		303,000	0	100,000		
Total	\$1	,361,900	\$118,700	\$1,480,60		

## Kitchen Make-Up Air Unit Replacement

A make-up air unit is an air circulation system that replaces air removed by exhaust fans in an indoor space. In the Adobe Mountain School's kitchen, DJC plans to replace the current make-up air unit installed in 1995 that has rusted sections with a new unit, which would have service life of up to 30 years.

## Fire Line Booster Pumps Replacement

Fire line booster pumps are intended to increase water pressure within a fire protection system. DJC plans to replace the damaged fire line booster pumps and install variable frequency drives (VFDs) to better regulate water pressure within the fire protection system at the Adobe Mountain School.

## School Door and Lock Replacement

The FY 2026 Capital Outlay bill included \$303,000 to continue work on replacing doors and locking systems in the West Housing units. DJC used a FY 2022 capital appropriation of \$2.5 million to replace the door and locking system in 3 of the 4 units. DJC plans to replace as many doors and locking systems in the remaining West Housing unit as possible with the FY 2026 capital outlay appropriation.

The Honorable David Livingston, Vice Chairman Joint Committee on Capital Review Arizona State House of Representatives 1700 West Washington Street Phoenix, Arizona 85007

Dear Senator Kavanagh and Representative Livingston:

A.R.S. 41-1252 requires the Joint Committee on Capital Review (JCCR) to review the expenditure of all monies appropriated for capital projects. The FY 2026 Capital Outlay Bill (Laws 2025, Chapter 235) appropriated \$1,480,600 to the Arizona Department of Juvenile Corrections (ADJC) for 3 capital projects. This amount consists of an appropriation of \$1,361,900 from the Criminal Justice Enhancement Fund (CJEF) and \$118,700 from the Local Cost Sharing Fund.

ADJC requests placement on JCCR's next agenda for review of its FY 2026 Capital Project Allocation Plan.

If you have any questions or concerns regarding this request, please contact Art Smith, Business and Finance Administrator, at 602-542-0461 or <a href="mailto:awsmith@azdic.gov">awsmith@azdic.gov</a>.

Respectfully submitted,

Doug Sargent

Director

### Replace Kitchen Make-Up Air Unit

Funding Source: Criminal Justice Enhancement Fund and Local Cost Sharing Fund

**Problem:** The Make-Up Air Unit (MAU) is the air circulation system used by ADJC Food Services in the kitchen at the Adobe Mountain School. MAU systems are designed to replace air in an interior space that has been removed by exhaust fans. The current MAU was installed in 1995 and is at the end of its service life. The cooling and blower sections of the MAU are significantly rusted/corroded and covered in calcium. The two heating sections of the unit are rusted and it is highly likely that the heat exchangers are cracked, which releases carbon monoxide into the air.

**Solution:** Replace the current MAU with a new unit. The new unit would have a service life of up to 30 years.

Cost Estimate: \$641,000

### Replace Fire Line Booster Pumps

Funding Source: Criminal Justice Enhancement Fund

**Problem:** The fire line booster pumps at the Adobe Mountain School have been damaged due to pressure effects (water hammer) within the water distribution system. The damage from the water hammer is most attributable to the lack of variable frequency drives (VFDs) to regulate the water pressure within the system appropriately. The fire pumps should be able to escalate to intended water flow rather than the current operation where the pumps turn on at full speed, which is the cause of the water hammer.

**Solution:** Replace the fire line booster pumps and install VFDs. The VFDs that are included in this replacement will ensure that the system functions correctly. The system would have a service life of up to 30 years.

Cost Estimate: \$536,600

Page 2 August XX, 2025 FY 2026 JCCR Project Descriptions

### Replace Doors and Locking Systems in Housing Unit

Funding Source: Criminal Justice Enhancement Fund

**Problem:** The FY 2022 Capital Outlay Bill (Laws 2021, Chapter 406) appropriated \$2.5 million to ADJC to replace doors and locking systems in the four West Housing Units of the Adobe Mountain School. These four units have identical floor plans and were identified during an assessment as being the housing units with doors and locks that were most vulnerable to tampering. Due to cost increases between the original replacement estimate and actual construction, the appropriation was sufficient to cover 3 of the 4 units.

**Solution:** Utilize the appropriation to replace as many doors and locks as possible within the housing unit that could not be addressed using the FY 2022 capital appropriation.

Cost Estimate: \$303,000

FY 2026 ADJC Building Renewal Summary				
Project	CJEF	Local Cost Share	Totals	
Kitchen Make-Up Air Unit	\$522,300	\$118,700	\$641,000	
Fire Line Booster Pumps	\$536,600	\$0	\$536,600	
Doors and Locks (Quest)	\$303,000	<u>\$0</u>	\$303,000	
Totals	\$1,361,900	\$118,700	\$1,480,600

SUBJECT:

Arizona State Parks Board - Review of Buckskin Mountain Boat Ramp Replacement

### Request

A.R.S. § 41-1252 requires Committee review of expenditure plans for monies appropriated for building renewal and capital projects. The Arizona State Parks Board (ASPB) requests Committee review of \$1,614,900 from the non-appropriated State Lake Improvement Fund (SLIF) and federal Land and Water Conservation Fund (LWCF) to replace a boat ramp at Buckskin Mountain State Park.

The Parks Board had also requested review of \$500,000 for the Verde River State Park and \$3,633,300 for general capital improvements, but these two items are not on the agenda.

#### **Committee Options**

The Committee has at least the following 2 options:

- 1. A favorable review of the request.
- 2. An unfavorable review of the request.

A.R.S. § 41-794 requires ASPB to report quarterly on the status of all appropriated capital projects, such as building renewal projects, including actual spending.

### **Key Points**

- 1) The Arizona State Parks Board (ASPB) is seeking review of \$1.6 million from the State Lake Improvement Fund (\$842,200) and federal grants (\$772,700) for projects at Buckskin Mountain State Park.
- 2) The project will include replacement of a boat ramp, as well as ADA compliant parking spaces and an ADA compliant path.

### **Analysis**

ASPB is requesting review of \$1.6 million to remove and replace an existing two-lane boat ramp which is currently experiencing structural issues at Buckskin Mountain State Park located on the Colorado River near Parker. Parks reports that the existing ramp is damaged, steeper than recommended, and has lost surface roughness, making it unsafe to launch boats from. The project also includes adding Americans with Disabilities Act (ADA) compliant parking and an ADA compliant path to the beach and patio area. Of the total project cost, \$842,200 would be funded by SLIF and the remaining \$772,700 would be sourced from federal LWCF monies. ASPB did not provide details as to how they arrived at the estimated project cost.

NB:jbu

## ARIZONA STATE PARKS & TRAILS

**Bob Broscheid**Executive Director

October 17, 2025

The Honorable Senator David Farnsworth, Chairman Chairman, Joint Committee on Capital Review Arizona State House of Representatives 1700 West Washington Street Phoenix, Arizona 85007

RE: Arizona State Parks Board FY26 Capital Projects for the Joint Committee on Capital Review

Dear Senator Farnsworth:

The Arizona State Parks Board (Arizona State Parks & Trails - ASPT) respectfully requests to be placed on the agenda of the next Joint Committee on Capital Review (JCCR) meeting being held October 2025 for review of funding to complete the projects outlined in the table on the following pages.

ASPT is requesting Committee review on these capital projects pursuant to A.R.S § 41-1252(A)(4) & (C). Upon such review, ASPT will proceed with construction activities for these projects.

Thank you for your consideration of this request. If you have any questions or need additional information, please contact Tom Kmetz, Chief of Development, at 602-542-6920.

Sincerely,

Robert Broscheid
Executive Director

Arizona State Parks Board

**Bob Broscheid**Executive Director

# Arizona State Parks & Trails Capital Improvement Projects Appropriations Brief project descriptions follow below

CIP Project	FY26
Buckskin Mountain State Park Boat Ramp Replacement	\$1,614,900
Verde River state park construction (Upper Verde/Del Rio Property)	\$ 500,000
Capital Improvements - Major Maintenance	\$3,633,300

### Buckskin Mountain State Park Boat Ramp Replacement

ASPT is requesting \$1,614,900 to be used for the replacement of an existing two-lane boat ramp at Buckskin Mountain State Park. The ramp is very steep, slick and being undermined. This project includes the removal of the existing (badly damaged) boat ramp and installation of a new boat ramp to improve park visitor safety.

This project is vital to the park, visitors, and boaters. The scope of work is to replace the existing boat ramp, add ADA parking, both trailer and standard spots, to the existing parking lot and add ADA path of travel to the existing beach and patio area.

Funding will consist of \$335,000 left over from a prior State Lake Improvement Fund (SLIF) appropriation for Buckskin Mountain State Park redevelopment projects, \$507,200 additional SLIF, and \$772,700 federal Land and Water Conservation Fund (LWCF) grant monies. We hope to start work on this project in the fall of 2025.

If this work is not done, ASPT visitors will not be able to launch boats from the park. The next closest access would be River Island SP which has a limited access boat ramp due to the slope of the ramp and river, which only allow shallow hull and shorter boats to launch safely.

### Upper Verde/Del Rio Property (Verde River state park construction)

ASPT received a FY26 appropriation of \$500,000 for Verde River State Park construction. These funds will be used for securing the property/sites, safety around attractive nuisances, soil conditions, water table evaluation, floodplain analysis, water and wastewater investigation, along with other due diligence work to help secure the property.

These safety and due diligence items are critical to securing the property and reducing liabilities and risk.

Without these funds the property will continue to have attractive nuisances that leave the State vulnerable. In additional these funds will help collect valuable and needed knowledge for moving forward with additional planning.

### Capital Improvements- Major Maintenance

CATEGORY CODES	
Fire & Life Safety	\$ 290,000
Shell: Superstructure; Exterior Walls & Roofing	\$ 730,000
Major Building Services	\$ 365,000
Interiors: Interior Construction Stairs; Finishes	\$ 290,000
Special Construction & controls; Hazardous Abatement	\$ 110,000
ADA accessibility	\$ 725,000
Infrastructure & Building Sitework	\$ 725,000
Preventative maintenance	\$ 290,664
Other Projects	\$ 107,636
Total	\$ 3,633,300

### Fire and Life Safety

The purpose of these deferred maintenance tasks are to improve or eliminate an impending condition that threatens life or property within the ASPT Building System or infrastructure statewide. ASPT utilizes the ADOA Quadrennial reports, State Fire Marshal Report, and Risk Management assessments to help prioritize improvements; in addition to self-identification of areas of concern. Types of deferred maintenance tasks can include, but are not limited to: Fire alarm systems, fire suppression systems, security alarm systems, air quality systems, water supply for fire suppression and potable quality, wastewater treatment and compliance, security systems such as access control, locks, and camera devices and footage storage systems, and building egress routes.

Deferred maintenance tasks will include:

- Tombstone Court House fire alarm replacement
- Slide Rock security camera replacement
- Fort Verde Commanding quarters egress route
- McFarland egress routes
- Statewide cabin fire alarm replacements
- Other Fire and Life Safety deferred maintenance tasks will be reported on the CIP quarterly report per A.R.S. 41-794

### **Building Shell**

Building Shell improvements are to address deficiencies in existing roofs, exterior enclosures, walls, windows and/or doors. Neglect of exterior roofs, walls, windows and doors escalates deterioration of building structural systems, leads to potential mold growth, and increases the risk of damage to interior contents. Further, the costs of structure damage and mold abatement can often exceed the cost of replacing a roof membrane. This deferred maintenance task category is dedicated to proactively replacing failing roof and exterior systems throughout the ASPT Building System to mitigate negative impacts of interruption to mission critical functions and expensive "crisis-mode" abatements, emergency repairs, and replacements.

Deferred maintenance tasks will include:

Lyman Lake restroom exterior doors

## ARIZONA STATE PARKS & TRAILS

**Bob Broscheid** Executive Director

- Picacho Peak shop roof replacement
- Lyman Lake residence roof replacements
- Tonto Natural bridge exterior siding replacement and painting
- Lyman lake Restroom roof replacement
- Other Building Shell deferred maintenance tasks will be reported on the CIP quarterly report per A.R.S. 41-794

Major Building Services

The deficiencies in the Major Building Services category reflect worsening conditions of HVAC, electrical, plumbing, and structural components across the ASPT Building System. Many of the systems are original to building construction. These systems have surpassed their useful lives and can no longer meet the demands of the facilities they support. Many systems are so weakened that unpredictable and imminent failure conditions threaten mission critical functions of public safety and institutional operations. Replacing aged and inefficient systems with new and more efficient systems will generate energy savings, protect assets, and provide comfortable climate control in Arizona's extreme environment. Failure to address aging and dilapidating systems may result in a shutdown of mission critical State services and expensive emergency basis procurements. Numerous systems throughout the ASPT Building System are original to building construction. These aging systems, in particular, the waste and vent piping, are failing at an increasing rate. Failure to replace deteriorating piping, especially the water and wastewater lines, will result in further damage to ceilings, walls, flooring and mechanical and electrical building systems.

Deferred maintenance tasks will include:

- Oracle Lake boiler repairs
- Oracle group area electrical replacement for restroom and ramadas
- Fool Hollow restroom water heaters
- Fool hollow residence water piping replacement
- Other Major Building Services deferred maintenance tasks will be reported on the CIP quarterly report per A.R.S. 41-794

**Building Interior** 

Replacement of worn interior flooring, stairway treading, and wall finishes have been in a "deferred indefinitely" status for many years. Many floor coverings, many over 20 years old, have long been in a deferred status and are in such poor condition they require immediate attention to avert or eliminate safety hazards. Conditions inside ASPT buildings include floor coverings completely worn through, ongoing patch maintenance, extensive damage to common hallway walls, missing or damaged ceiling tiles, stains, unraveling seams and tears, delaminating stairway treads, unsuccessful duct tape repairs, and extensive rippling. Paint is not matching and faded, as well as, walls marked and scraped. ASPT will use these funds to provide a safe and presentable work environment for all ASPT employees and visitors.

Deferred maintenance tasks will include:

- Slide Rock Restroom floor re-surface
- Buckskin residence interior replacement (flooring, millwork, fixtures etc.)
- Homolovi Ruin residence interior replacement (flooring, millwork, fixtures etc.)
- Other Building Interior deferred maintenance tasks will be reported on the CIP quarterly report per A.R.S. 41-794

### Infrastructure

### ARIZONA STATE PARKS & TRAILS

**Bob Broscheid**Executive Director

Infrastructure deferred maintenance tasks can include existing roadways, parking lots, sidewalks and walkways, electrical service entrances (SES) and mechanical utilities, water supply and distribution, sanitary and storm sewers, waste treatment, electrical distribution, site lighting, fencing, and communications. Many of these type systems have been in a "deferred indefinitely" status for many years and are in an exhausted state of deterioration. These aging systems are failing at an increasing rate. Failure to replace deteriorating piping, will result in further damage to State property and may create an environmental impact or reporting condition. Electrical systems are rusting out, rodent damaged, and are long overdue for replacement; from both a code safety concern to park operation being out of service.

Deferred maintenance tasks will include:

- Kartchner Cavern Cave entry main electrical switch gear replacement
- Patagonia Lake beach restroom sewer line work
- Roper Lake well head pipe replacement
- Slide Rock main entry access replacement
- Lake Hayasu water line and valve replacement
- Other Infrastructure deferred maintenance tasks will be reported on the CIP quarterly report per A.R.S. 41-794

### Special Construction & controls; Hazardous Abatement

This will be for special construction and hazardous abatement priority deferred maintenance tasks. This can include, but not limited to, design and implementation of shoreline stabilization efforts to prevent continued erosion at ASPT's water parks; marina repair for maintenance for break walls and or dredging efforts; as well as repairing and/or replacing dilapidated boat docks causing safety, liability, or long-term maintenance issues; repair or replacement of boat ramps. This also consists of building/infrastructure or special construction and hazardous abatement mitigation effort of existing sites.

Deferred maintenance tasks will include:

- Kartchner Cave cave entry stabilization
- Roper lake Boat dock bumper replacement
- Deadhorse lake Boat ramp surfacing
- Alamo Lake boat ramp erosion protection
- Other Special Construction & Controls: Hazardous Abatement deferred maintenance tasks will be reported on the CIP quarterly report per A.R.S. 41-794

### ADA Accessibility

There are numerous ADA deficiencies in the ASPT Park's System that require remedy. Deficiencies include building access ramps, sidewalks, bathroom fixtures, drinking fountains, handrails, parking spaces, sites/amenities, and general reconfigurations of entrances and other areas in buildings to allow or facilitate access to services and workplaces for persons with disabilities. In addition, many recreational areas within the ASPT system need to be ADA compliant.

#### Preventative Maintenance

Arizona Revised Statue 41-793.01D The agency responsible for a building system shall allocate and expend the amounts appropriated for building renewal within the building system. The department may use up to eight per cent of the amount appropriated for routine preventive maintenance. Preventive maintenance which can include preventive maintenance contracts for HVAC, backup power generators, pavement maintenance (small repairs), wastewater pump stations, septic systems, Termite treatment, etc.

## ARIZONA STATE PARKS & TRAILS

**Bob Broscheid**Executive Director

Other Projects - Building Renewal Scoping

This is for scoping and design services for potential and emergency projects. Some of the requests received for funding consideration have deficient, vague, or very broad scopes of work, no supporting documentation, and insufficient, unreliable, or aged cost estimates. The proposed allocation supports ASPT in the development and implementation of detailed scopes of work that adequately and cost effectively address the requirements of current and future project request.

SUBJECT:

Prescott Historical Society – Review of Territorial Governor's Mansion Restoration

### Request

A.R.S. § 41-1252 requires Committee review of the expenditure of monies appropriated for land acquisition, capital projects and building renewal. The Prescott Historical Society - Sharlot Hall Museum requests committee review of its plan to spend a FY 2026 budget appropriation of \$500,000 from the General Fund for restoration of the museum's Territorial Governor's Mansion.

### **Committee Options**

The Committee has at least the following 2 options:

- 1. A favorable review of the request.
- 2. An unfavorable review of the request.

#### **Key Points**

- 1) The Prescott Historical Society Sharlot Hall Museum requests review of a FY 2026 operating appropriation of \$500,000 from the General Fund for restoration work on the Territorial Governor's Mansion in Prescott.
- 2) The mansion was built from logs in 1864. In the late 1920s, Sharlot Hall opened the Gubernatorial Mansion Museum in the building to display Arizona artifacts and collectibles.
- 3) A 2025 assessment projected a cost of \$493,000 for restoration efforts.
- 4) Monies will be spent to replace deteriorating chinking and daubing between the logs and conduct other repairs that stabilize the building and prevent future water damage.

### **Analysis**

Based on a 2025 restoration assessment of the Territorial Governor's Mansion, the Prescott Historical Society- Sharlot Hall Museum estimates expenditures of \$493,000 and requests approval to use the \$500,000 appropriation.

The project will be managed by the Arizona Department of Administration (ADOA) and a vendor will be selected to complete the repairs. Assuming \$500,000 in expenditures, the projected cost of the repairs is \$250 per square foot for the 2,000 square foot building. The agency reports the appropriation will allow work to be completed within 2 years.

The projected work costs are \$335,000. Of the \$271,000 shown in *Table 1* for waterproofing, \$207,500 is for replacing chinking and daubing across the building's interior and exterior. Chinking is the fill between logs (various materials hard like other wood and soft like pine needles) and daubing is the outer clay/lime/mixture spread over the chinking. This is susceptible to deterioration over time. The remaining \$63,500 is for additional waterproofing efforts including treatment and replacement of wood as well as sealants. An additional \$64,000 in the Architectural, Electrical, and Structural Repairs line includes work to improve building stability, prevent exposure to elements or replacing missing/deteriorated materials. Examples including beam shoring or replacement, repainting peeled trim, and replacing deteriorated boards and siding.

As shown in *Table 1*, the plan anticipates \$116,000 for contingency costs and \$49,000 for consulting and engineering fees.

Table 1	
Prescott Historical Society Expenditure	Plan
Work Waterproofing Architectural, Electrical, Structural Repairs Subtotal	\$ 271,000 <u>64,000</u> \$ 335,000
Consulting and Engineering Fees	\$ 49,000
Contingency Unexpected labor, materials, or logistical costs Additional Contingency Subtotal	\$ 50,500 65,500 \$ 116,000
Total	\$ 500,000

AN ARIZONA HISTORY ADVENTURE

September 30, 2025

The Honorable Senator David C. Farnsworth, Chairman Joint Committee on Capital Review Arizona State Senate 1700 West Washington Street Phoenix, AZ 85007

Subject: JCCR Agenda Request

Dear Senator Farnsworth:

In accordance with ARS 15-1683, the Prescott Historical Society requests that the following Prescott Historical Society's state-funded capital project to conserve and preserve the State of Arizona's Historic Governor's Mansion project be placed on the next Joint Committee on Capital Review Agenda.

Enclosed is pertinent information on this key state preservation/conservation project of our state treasure. If you have any questions or desire any clarification on the enclosed material, please contact me at 480-820-5545 (cell).

Sincerely,

Stuart Rosebrook, Ph.D.

Executive Director

Cc: Vice-Chairman David Livingston (dlivingston@azleg.gov)

JLBC Director, Richard Stavneak (jblcdirector@azleg.gov)

OSPB Director, Ben Henderson (bhenderson@az.gov)

JLBC Asst. Director Micaela Larkin Andrews (mandrews@azleg.gov)

Leg. Asst. to Senator Farnsworth, Bonny Solheim (bsolheim@azleg.gov)

### Sharlof Hall MUSEUM

**Overview:** The Prescott Historical Society, dba Sharlot Hall Museum, manages 11 buildings and four acres on our campus in Prescott, Arizona, including the Territorial Governor's Mansion, built in 1864. These facilities range in age from two historic structures dating back to 1864 to our most recent building, The Fred Veil Education Center, completed in 2020. Maintaining these assets is crucial for Sharlot Hall Museum's operations and service to the State of Arizona and its citizens as one of its primary state museums, archives and libraries. We were founded in 1928 by Sharlot M. Hall, our namesake, the former Territorial Historian of Arizona, 1909-1912.

The following outlines Prescott Historical Society's planned capital project to preserve and conserve the Historic Governor's Mansion in Fiscal Year 2026 with necessary work continuing into Fiscal Year 2027, as needed, as the allocation for the preservation work is non-lapsing. According to our ISA with ADOA, "The parties may extend the term of this Agreement annually for one (1) year by written amendment for a total period not to exceed five (5) years. If so amended, the first one (1) year renewal period shall begin on July 1, 2026."

### Project: Historic Governor's Mansion

The Governor's Mansion, which is the oldest building associated with Arizona Territory still standing in its original location, was originally constructed from ponderosa pine logs in 1864. The Mansion is a single-story log cabin with an attic, measuring approximately 2,000 square feet in area, and is listed on the National Historic Register.

History of Renovation: The structure has undergone various repairs and modifications over the years. Notably, in 1963, steel framing was installed to support the roof via steel beams, with attic floor beams reinforced using tension rods anchored to these beams. In 1981, Schuman Larsen Architects designed overall exterior repairs. Additionally, stabilization efforts included raising the wood framing off of the soil and installing a CMU and stone foundation. Recently, the floors were refinished in 2018.

Because the mansion is listed on the National Historic Register, any repair project would be subject to applicable sections of the Secretary of the Interior's Standards for the Treatment of Historic Properties ("Standards") with Guidelines for Preserving, Rehabilitating, Restoring & Reconstructing Historic Buildings, as documented by the U.S. Department of the Interior National Park Service Technical Preservation Services. These Standards apply to all grants-in-aid projects assisted through the Historic Preservation Fund (which are authorized by the National Historic Preservation Act). The Treatment Standards, developed in 1992, were most recently revised in 2017. Please note that the requirements of the standards may vary depending upon the finalized selections for the scope of work and treatment approach selected, as described in the Discussion section of this report. We have been working closely with the State Historic Preservation Office throughout this process.

### Sharlst Hall MUSEUM

**Allocation:** As part of the FY26 approved budget, the Prescott Historical Society received a capital outlay appropriation of \$500,000 for conservation and preservation of the Historic Governor's Mansion.

Cost estimates were provided by Walker Consultants. Their final report is titled Condition Assessment of the Historic Governor's Mansion, dated May 27, 2025. It is attached herewith as an appendix for more detailed information.

### Basic Scope of Work Cost Estimate \$500,000

- 1. Recondition interior and exterior chinking between logs.
- 2. Structure beam shoring.
- 3. Roof/dormer repairs

Walker Consultants Opinion of Probable Repair Costs (in 2025 dollars) for the recommended, 5-year phased preservation project is shown below.

- A. Immediate- Limited structural and waterproofing repairs: \$27,000
- B. Years 1-2 Exterior chinking and daubing, and selective exterior repairs: \$238,500
- C. Years 3-5 Interior chinking and daubing, and selective interior repairs: \$227,500

A detailed description, including breakdown of probable project repair costs and other allowances (including consultant fees) is presented in the attached, detailed Appendix A table.

**Outcome:** Addressing these infrastructure challenges is essential to ensure the safety and operational integrity of the Historic Governor's Mansion at Prescott Historical Society's Sharlot Hall Museum. The restoration, conservation and preservation of the crown jewel of Arizona's Territorial history during our year-long celebration of America's 250th anniversary is a project all Arizonans can take pride in knowing honors the historic beginnings of the 48th State.

Is the goal of the Prescott Historical Society, working with ADOA, to complete this five-year scope of work, with the allocation of the \$500,000, in two years for three primary reasons:

- 1. The Historic Governor's Mansion is an identified AZ250 project and its conservation and preservation is a centerpiece project for the citizens of Arizona that honors, celebrates and commemorates our state's grand heritage and Arizona's important role in our nation's 250th anniversary.
- 2. The construction process should be continuous on the exterior and interior conservation and preservation for greatest cost savings and efficiency.
- 3. Prescott Historical Society does not want to delay the conservation and preservation of the Historic Governor's Mansion any further to prevent any further architectural issues and use the state's \$500,000 FY26 allocation prudently, understanding that the allocation of \$500,000 does not lapse on June 30, 2026.

TO:

Members of the Joint Committee on Capital Review

FROM:

Jordan Johnston, Principal Fiscal Analyst

SUBJECT:

Department of Public Safety - Review of FY 2026 Headquarter Electrical Upgrade Project

### Request

A.R.S. § 41-1252 requires Committee review of capital projects with estimated costs exceeding \$250,000. The Department of Public Safety (DPS) is requesting review of \$11,227,100 from the General Fund to upgrade the electrical system at the department's headquarters in Phoenix. The FY 2026 Capital Outlay Bill appropriated \$11,227,100 to DPS for this purpose.

DPS had also requested review of \$2,000,000 to replace the Sanders and Payson Area Offices, but this item is not on the agenda.

### **Committee Options**

The Committee has at least the following 2 options:

- 1. A favorable review of the requests.
- 2. An unfavorable review of the requests.

#### **Key Points**

- 1) A recent assessment of the department's headquarters indicated issues with an out-of-code electrical system, which is 48 years old (23 years past its estimated useful life).
- 2) The FY 2026 Capital Outlay Bill included \$11.2 million from the General Fund to upgrade the electrical system at the department's headquarter facilities in Phoenix.
- 3) The department plans to repair and replace the electrical systems at the training compound, criminal investigations building, central regional crime lab, and headquarters office which are all co-located on the same property.

### **Analysis**

The DPS headquarters in Phoenix provides a central location for various department functions. A recent assessment of the facilities on this property raised concerns about the out-of-code electrical system, which is 48 years old (23 years past its estimated useful life). In particular, the assessment noted the age of the equipment and deemed it unsafe, out of code, and lacking proper protection for electrical equipment.

The FY 2026 Capital Outlay Bill appropriated \$11.2 million from the General Fund to DPS to upgrade the electrical system at the department's headquarters in Phoenix. DPS plans to use this funding to repair and replace the electrical systems, including upgrading switchboards, transformers, and panelboards, at their training compound, criminal investigations building, central regional crime lab, and headquarters office which are all co-located on the same property. *Table 1* below provides a summary of the planned expenditures.

T 11-4	
Table 1	la Evnanditura Plan
FY 2026 Headquarter Electrical Upgrad	ie expenditure rian
Training Compound	\$ 5,076,100
Criminal Investigations Building	1,071,100
Central Regional Crime Lab	2,561,200
Headquarters Building	2,518,700
Total	\$11,227,100

The department estimates that project will be completed by December 2027.

### ARIZONA DEPARTMENT OF PUBLIC SAFETY

2102 WEST ENCANTO BLVD. P.O. BOX 6638 PHOENIX, ARIZONA 85005-6638 (602) 223-2000

"Courteous Vigilance"

KATIE HOBBS Governor JEFFREY GLOVER
Director

September 25, 2025

Senator David C. Farnsworth, Chairman Joint Committee on Capital Review 1716 West Adams Phoenix, Arizona 85007

Dear Chairman Farnsworth:

Laws 2025, Chapter 235 (Senate Bill 1737) appropriates \$11,227,100 from the General Fund to the Department of Public Safety (DPS) to replace the Service Entrance Sections (SES) at our buildings at the DPS Headquarters.

Per A.R.S. § 41-1252, the JCCR must review the intended scope, purpose, and estimated cost of this project before the Department can expend the monies for construction. With this letter, we request placement on the next available agenda.

If necessary, the Department can provide additional information to your staff prior to the meeting date. Any questions may be addressed to Mike Dodd, DPS Budget Officer, at (602) 223-2463.

Sincerely,

Jeffrey Glover, Colonel

Director

cc: Representative David Livingston, Vice-Chairman Ben Henderson, OSPB

Richard Stavneak, JLBC

Attachment

Arizona Department of Public Safety (DPS) Service Entrance Section Replacements Laws 2025, Chapter 235 (Senate Bill 1737) \$11,227,100

### Summary

Laws 2025, Chapter 235 (SB 1737)) appropriated \$11,227,100 from the General Fund to the Arizona Department of Public Safety (DPS) to replace the Service Entrance Sections (SES) at the Phoenix Headquarters, Compound, Criminal Investigations, and Crime Lab buildings. Prior to the expenditure of the funds, A.R.S. § 41-1252 requires DPS to present the scope, purpose, and estimated cost to the Joint Committee on Capital Review (JCCR) for review.

### Purpose

The switchboards, step-down transformers, panelboards, and associated feeders at the Phoenix Headquarters, Compound, Criminal Investigations and Crime Lab buildings must be replaced. Most of the equipment is 48 years of age which is 23 years past its useful life. The age of the equipment and the arc flash testing revealed much of the equipment to be unsafe, out of code, and lacking the proper protection required for electrical equipment. A single fault incident could render the system beyond the point of operation. Simply opening the panels could result in serious bodily injury or death. The replacement of this equipment is critical to sustaining the 24-hour-a-day, 365-days-a-year operation of the buildings. Not only DPS, but other agencies use the vital services provided from these buildings. A shut down could be catastrophic. The updated equipment will increase cost-effective operations and employee safety.

The SES replacement project includes replacing the four SES panels and associated systems that are not within code. The approximate cost for the new panels and associated systems is \$11,227,100.

### Procurement Method Pricing and Cost Breakdown

Below is the estimated cost breakdown for the new panels and associated systems, installation, and removal of the current panels and associated systems:

Compound	\$5,076,100
Criminal Investigations Building	\$1,071,125
Central Regional Crime Lab	\$2,561,175
Headquarters Building	\$2,518,700
TOTAL	\$11,227,100

#### Timeline/Conclusion

The timeline to complete the project is dependent on the lead time of the SES panels and is expected to be completed by December 2027.

Jordan Johnston, Principal Fiscal Analyst

SUBJECT:

Arizona Department of Transportation - Review of FY 2026 Building Renewal Allocation

Plan

### Request

A.R.S. § 41-1252 requires Committee review of expenditure plans for building renewal monies prior to expenditure. The Arizona Department of Transportation (ADOT) is requesting that the Committee review its \$23,385,300 FY 2026 Building Renewal Allocation Plan.

ADOT has allocated \$22,990,400 from the State Highway Fund among 175 projects, leaving a contingency balance of \$40,000, \$704,700 for statewide building inventory, and \$500,000 for project management support. ADOT has also allocated \$394,900 from the State Aviation Fund for 16 projects, with no contingency funding.

### **Committee Options**

The Committee has at least the following 2 options:

- 1. A favorable review of the request.
- 2. An unfavorable review of the request.

A.R.S. § 41-794 requires ADOT to report quarterly on the status of all nonhighway construction capital projects, such as building renewal projects, including its actual spending relative to its plan.

### **Key Points**

- 1) ADOT Building Renewal projects span a range of categories including remodeling, safety improvements, compliance, and roofing replacements.
- 2) The \$23.0 million State Highway Fund and \$394,900 State Aviation Fund Building Renewal appropriations equate to 100% of the respective formula requirement.
- 3) The largest expenditure categories include \$6.9 million for infrastructure (sewers, wells, parking lots), \$4.4 million for roofs, \$4.1 million for building systems (HVAC, electrical, plumbing), and \$4.0 million for remodeling.
- 4) ADOT's proposal consists of 175 separate projects from the State Highway Fund and 16 separate projects from the State Aviation Fund.

### **Analysis**

The FY 2026 Capital Outlay Bill appropriated a total of \$23.4 million for ADOT building renewal in FY 2025, including \$23.0 million from the State Highway Fund and \$394,900 from the State Aviation Fund. The FY 2026 Building Renewal appropriation represents 100% of the amount generated by the building renewal formula for the ADOT Building System and 100% for the Grand Canyon Airport building renewal formula for FY 2026. The formula is based on the square footage and replacement cost of existing buildings.

ADOT expects to allocate the Building Renewal monies from the State Highway Fund in the following categories for 175 projects:

Table 1			
State Highway Fund Building Renewal Project Categories			
C-1	Projects	State Highway Fund	% of Total
Category			
Fire/Life/Safety	5	\$410,000	2%
Roof Repairs/Replacement	14	4,365,000	19%
Exterior Preservation (Doors, Windows, Siding)	41	1,637,000	7%
Building Systems (HVAC, Electrical, Plumbing)	49	4,065,600	17%
Interior Finishes (Paint, Carpet, Tile)	7	215,000	1%
Remodels and Reconfigurations	11	3,976,100	17%
Americans with Disabilities Act	5	170,000	1%
Infrastructure (Sewers, Wells, Parking Lots)	43	6,907,000	30%
Project Management Support	N/A	40,000	1%
Statewide Building Inventory	N/A	500,000	2%
Contingency	N/A	704,700	3%
Total	175	\$22,990,400	100%

Of the 175 State Highway Fund projects, the 29 building projects shown in *Table 2* have a cost of \$250,000 or more.

Table 2	
Major State Highway Fund Building Renewal Projects	
Project	Allocation
Roof Repairs/Replacement	
Bouse Wash Rest Area, Building 2012 Restrooms – Repair/replace roof	300,000
Bouse Wash Rest Area, Building 2014 Restrooms – Repair/replace roof	300,000
Central Materials Lab Building 1121 – Reseal roof	300,000
Flagstaff Offices Building 3884 – Repair/replace roof	2,000,000
West Phoenix MVD Building 1651 – Replace roof and wood fascia	600,000
Building Systems (HVAC, Electrical, Plumbing)	
Administration Building 1005B – Install electrical service phase 2	450,000
Administration Building 1005B – Repairs to chiller piping	475,000
Central Materials Lab Building 1121 – Replace waste piping	500,000
Engineering Building 1004 – Renovate cooling tower	380,000
Flagstaff Offices Building 3884 – Replace HVAC unit support curbs	350,000
Remodeling and Reconfigurations	
East Flagstaff Maintenance Yard – Renovate restrooms and breakroom	470,000
Kingman Complex Building 3051 – Renovate building	600,000
Nogales Port of Entry Building 2270 – Replace flooring, lighting, fixtures, painting	250,000
Old MVD Building 1001D – Renovate/relocate modular building to Payson	750,000
Show Low Yard – Renovate/relocate office	300,000
Young Maintenance Camp – Convert storage into office, renovate restroom	300,000
Yuma Maintenance Complex – Renovate modular building	700,000
ECD Inspection Facility Building 1815 – Design renovation of ECD office	300,000
Statewide – Perform general repairs	250,000
Infrastructure (Sewers, Wells, Parking Lots)	
Administration Building 1005B – Repair/replace pavement	600,000
Camp Verde Maintenance Yard – Pave remaining half of yard	250,000
Canoa Rest Area – Replace water service piping	300,000
Colcord Maintenance Yard – Renovate building and replace potable water tank	275,000
Gray Mountain Maintenance Yard – Design/repair fire hydrant storage tank	350,000
Phoenix Equipment Services – Repair/replace pavement	300,000
Sonoita Maintenance Yard – Install water storage tank	375,000
Sunset Point Rest Area Building 3084 – Design/install water filtration system	260,000
Tucson Regional MVD – Repave parking lot, replace curbing	400,000
Statewide – Repair site wells, gas, water and wastewater system deficiencies	600,000
Total	\$13,285,000

ADOT expects to allocate the Building Renewal monies from the State Aviation Fund for 16 projects at the state-owned Grand Canyon Airport in the following categories:

Table 3 State Aviation Fund Building Renewal Projects				
Category Projects State Aviation Fund % of Total				
Fire/Life/Safety	2	\$20,000	5%	
Roof/Repairs Replacement	1	10,000	3%	
Exterior Preservation (Doors, Windows, Siding)	2	40,000	10%	
Building Systems (HVAC, Electrical, Plumbing)	4	71,000	18%	
Interior Finishes (Paint, Carpet, Tile)	2	20,000	5%	
Reconfigure or Remodel	1	61,000	15%	
Americans with Disabilities Act	1	10,000	3%	
Infrastructure	_3	162,900	41%	
Total	16	\$394,900	100%	

The attached materials submitted by ADOT list each project and its estimated cost.

The Honorable John Kavanagh Chairman, Joint Committee on Capital Review 1716 West Adams Phoenix, AZ 85007

### Dear Senator Kavanagh:

Pursuant to Laws 2025, Chapter 235 (SB 1737), Section 7(F), the Arizona Department of Transportation (ADOT) received an FY 2026 Building Renewal appropriation of \$22,990,400 from the State Highway Fund and \$394,900 from the State Aviation Fund. A.R.S. § 41-1252 requires JCCR review of expenditure plans for building renewal monies prior to expenditure. ADOT respectfully requests placement on the next JCCR agenda for review of its FY 2026 Building Renewal Allocation.

The following summary outlines ADOT's FY 2026 Building Renewal by major category:

	State	State
Category	Highway	Aviation
	Fund	Fund
CATEGORY 1 - FIRE & LIFE SAFETY	\$410,000	\$20,000
CATEGORY 2 - ROOFS	\$4,365,000	\$10,000
CATEGORY 3 - BUILDING SHELL -PRESERVATION OF ASSET	\$1,637,000	\$40,000
CATEGORY 4 - MAJOR BUILDING SYSTEMS	\$4,065,600	\$71,000
CATEGORY 5 - BUILDING INTERIOR	\$215,000	\$20,000
CATEGORY 6 - BUILDING RECONFIGURE OR REMODEL	\$3,976,100	\$61,000
CATEGORY 7 - ADA COMPLIANCE	\$170,000	\$10,000
CATEGORY 8 - INFRASTRUCTURE	\$6,907,000	\$162,900
PROJECT MANAGEMENT SUPPORT	\$40,000	\$0
CONDUCT BUILDING ASSET INVENTORY	\$500,000	\$0
CONTINGENCY	\$704,700	\$0
Total FY 2026 Building Renewal	\$22,990,400	\$394,900

Attached is a listing of FY 2026 Building Renewal projects by major category and fund.

Thank you for your consideration of this request. If you have any questions or need additional information, please contact David Bolter, Budget Manager, at (602) 712-8917.

Sincerely,

Jennifer Toth Director

Project Description	Estimated Cost
STATE HIGHWAY FUND (SHF)	
CATEGORY 1 - FIRE/LIFE/SAFETY	
ENGINEERING BLDG, Bldg. 1004 Office - Replace fire riser	\$100,000
State Wide - ADOT statewide - Asbestos abatement & repair	\$40,000
State Wide - ADOT statewide - Lead paint abatement & repair	\$20,000
State Wide - ADOT statewide - Mold abatement & repair	\$10,000
State Wide - ADOT statewide - Repair fire alarm & suppression systems	\$240,000
TOTAL CATEGORY 1 - FIRE/LIFE/SAFETY	\$410,000
CATEGORY 2 - ROOFS	\$50,000
AGUA FRIA HWY MAINT, Bldg. 1617 Canopy - Repair roof	\$300,000
BOUSE WASH REST AREA, Bldg. 2012 RESTROOMS (E/B) - Repair / replace roof	\$300,000
BOUSE WASH REST AREA, Bldg. 2014 RESTROOMS (W/B) - Repair / replace roof	\$120,000
BURNT WELL REST AREA, Bldg. 2041 RESIDENCE (E/B) - Repair / replace roof	\$120,00
BURNT WELL REST AREA, Bldg. 2043 RESIDENCE (W/B) - Repair / replace roof	\$300,000
CENTRAL (MATERIALS) LAB, Bldg. 1121 Laboratory - Reseal roof	\$150,000
CORDES JCT. MAINT. YARD, Bldg. 3088 STORAGE / EQUIPMENT - Replace metal roofing	\$2,000,00
FLAGSTAFF OFFICES, Bldg. 3884 Office Complex - Repair & replace roof GREY PEAK MAINT CAMP, Bldg. 2146 OFFICE / EQUIPMENT STORAGE-Repair & recoat foamed metal roof	\$20,00
NOGALES PORT OF ENTRY, Bldg. 2270 INSPECTION BAY / OFFICES - Repair & replace roof and roof safety access	\$200,00
PHOENIX MAINT. DIST. HDQ., Bldg. 1701 Office/Lab - Repair roof	\$85,00
SAFFORD ANNEX COMPLEX, Bldg. 2137 OFFICE / EQUIPMENT STORAGE (S & S) - Repair & replace asphalt shingle roof	\$20,00
WEST PHOENIX MVD, Bldg. 1651 Office - Replace roof and wood fascia	\$600,00
State Wide - ADOT statewide - Repair roofs	\$100,00
TOTAL CATEGORY 2 - ROOFS	\$4,365,00
CATEGORY 3 - PRESERVATION OF ASSET	
BOUSE STORAGE YARD, Bldg. 2228 Storage - Replace building tie downs	\$2,50
CAMP VERDE MAINT. YARD, Bldg. 3104 STORAGE / SIGN - Remove rust spots & touch up paint on roof	\$10,00
CAMP VERDE MAINT. YARD, Bldg. 3859 - Install concrete landing at entrance door	\$2,50
CANOA REST AREA - Replace dumpster enclosure	\$75,00
CASA GRANDE CONSTR YARD (OLD), Bldg. 2637 PUMP HOUSE - Repair & paint exterior	\$5,00
CASA GRANDE CONSTR YARD, Bldg. 2064 OFFICE / S & S - Replace windows	\$30,00
CASA GRANDE CONSTR YARD, Bldg. 2371 CANOPY - Install structural strapping to prevent wind damage	\$2,50
CASA GRANDE MAINT YARD, Bldg. 2379 STORAGE / TANK / FUEL - Remove containment wall	\$35,00
COLCORD MAINT. YARD, Bldg. 3846 STORAGE / LIQUID DEICER - Renovate containment area	\$185,00
COOLIDGE MAINT / MVD COMPLEX, Bldg. 2386 STORAGE / SIGN - Repair exterior wall	\$60,00
CORDES JCT. MAINT.YARD, Bldg. 3088 STORAGE / EQUIPMENT - Repair / replace Insulation	\$100,00 \$2,50
CORDES JCT. MAINT.YARD, Bldg. 3824 TRUCK WASH - Remove rust spots & touch up paint on handrails	\$2,50
ENGINEERING BLDG, Bldg. 1010 Office/Modular - Repair & paint exterior and doors	\$30,00
ENGINEERING BLDG, Bldg. 1011 Office/Modular - Repair & paint exterior and doors	\$20,00
GILA BEND MAINT. YARD, BIdg. 2056 STORAGE / EQUIPMENT - Replace exterior Windows	\$10,00
GILA BEND MAINT, YARD, Bldg. 2359 STORAGE - Repair & paint exterior	\$10,00
GILA BEND MAINT. YARD, BIdg. 2360 STORAGE - Repair & paint exterior and doors GREY PEAK MAINT CAMP, BIdg. 2705 Storage/Spreader - Install 4 spreader suspension points	\$10,00
KAYENTA MAINT.YARD, Bldg. 3865 Storage / Deicer Liquid - Repair containment area	\$230,00
KAYENTA MAINT.YARD, Bidg. 3866 Storage / Deiter Liquid - Nepair Containment area  KAYENTA MAINT.YARD, Bidg. 3866 Storage / Asphalt Tank - Repair containment area	\$230,00
N.W. PHOENIX REGIONAL MVD, Bldg. 1431 Office/MVD - Repair and paint exterior metal surfaces	\$7,00
NORTH PHOENIX MAINT. YARD, Bldg. 1241 Office - Repair & paint exterior and doors	\$8,00
NORTH PHOENIX MAINT. YARD, Bldg. 1243 Storage - Repair & paint exterior and doors	\$8,00

FROM:

Jordan Johnston, Principal Fiscal Analyst

SUBJECT:

Arizona Department of Transportation - Review of ADOT Capital Projects

A.R.S. § 41-1252 requires Committee review of expenditure plans for monies appropriated for capital projects. The Arizona Department of Transportation (ADOT) requests review of 2 capital projects totaling \$13,812,000 from the State Highway Fund, which were funded in the FY 2026 Capital Outlay Bill:

- \$6,951,000 for a new vehicle repair shop in Avondale, and
- \$6,861,000 for new maintenance facilities in Little Antelope and Gray Mountain.

#### **Committee Options**

The Committee has at least the following 2 options:

- 1. A favorable review of the request.
- 2. An unfavorable review of the request.

#### **Key Points**

The Arizona Department of Transportation (ADOT) is seeking review of the following \$13.8 million in State Highway Fund appropriations:

- 1) \$6.9 million for the construction of a new 10,000 square foot vehicle repair shop located in Avondale that services over 265 department and state fleet vehicles and heavy equipment.
- 2) \$6.9 million for the construction of 2 new 3,500 square foot maintenance facilities located in Little Antelope and Gray Mountain to facilitate road maintenance services in northern Arizona.

#### **Analysis**

The department has requested review of the following projects pursuant to statutory provisions requiring JCCR review of any capital project with an estimated cost over \$250,000:

#### Vehicle Repair Shop in Avondale

ADOT currently manages a facility in Avondale that services over 265 department and state fleet vehicles and heavy equipment. The department reports that this facility includes a storage canopy with no doors, securable areas, climate control, restrooms, or administrative support spaces. The department further reports that this facility provides challenging working conditions, particularly in inclement weather during the hot summer months.

ADOT is proposing to spend \$6.9 million to construct a new 10,000 square foot vehicle repair shop in Avondale with a secure, enclosed structure with the comparable maintenance spaces, equipment, and other amenities. *Table 1* below breaks down the cost of constructing the vehicle repair shop in Avondale by category.

Table 1	
Vehicle Repair Shop Expenditure	Plan
Item	<b>Cost Estimate</b>
Construction	\$ 5,346,000
Design and Construction Administration	535,000
Information Technology	100,000
Furniture, Fixtures, and Equipment	435,000
Contingency	<u>535,000</u>
Total Appropriated Budget	\$6,951,000

#### Maintenance Facilities in Little Antelope and Gray Mountain

ADOT utilizes approximately 45 maintenance buildings throughout the state. Constructed in 1960's and 1970's, the department reports that the maintenance facilities in Little Antelope and Gray Mountain are too small for current staff size and for equipment to be enclosed during the winter months.

ADOT is proposing to spend \$6.9 million to construct 2 new 3,500 square foot maintenance facilities to coordinate highway maintenance services in northern Arizona. The new office space and crew area will provide employees with ADA-compliant restrooms, a breakroom, computer workstations, and a training area. In addition, the new facilities will include 1,000 square feet of space to be outfitted by the Department of Public Safety (DPS) to support highway patrol operations. *Table 2* below breaks down the cost of the new maintenance facilities in Little Antelope and Gray Mountain by category.

Table 2 Little Antelope/Gray Mountain Maintenance	Facilities Expenditure Plan
Item	Cost Estimate
Construction	\$ 5,322,000
Design and Administration	532,000
Information Technology	75,000
Furniture, Fixtures, and Equipment	400,000
Contingency	532,000
Total Appropriated Budget	\$6,861,000

206 S. 17<sup>th</sup> Ave Phoenix, AZ 85007 KATIE HOBBS GOVERNOR

JENNIFER TOTH DIRECTOR

July 31, 2025

The Honorable John Kavanagh Chairman, Joint Committee on Capital Review 1716 West Adams St. Phoenix, AZ 85007

#### Dear Senator Kavanagh:

The Arizona Department of Transportation (ADOT) respectfully requests to be placed on the agenda of the next Joint Committee on Capital Review (JCCR) meeting for review of the following projects:

	FY 2026 Capital
Capital Improvement Project	Appropriation
Improvements to vehicle repair shop in Avondale	\$6,951,000
Construct New Maintenance Offices/Crew Rooms in Little	\$6,861,000
Antelope and Gray Mountain	\$6,861,000

#### Improvements to vehicle repair shop in Avondale

Laws 2025, Chapter 235 (SB 1737), Section 8 appropriates \$6,951,000 to construct a new 10,000 square foot equipment repair facility in Avondale. Currently, the equipment maintenance technicians are working on vehicles under a storage canopy with no doors, securable areas, climate control, restrooms, or administrative support areas.

With over 150 days a year above 90 degrees, working outdoors without any climate control does not provide an adequate environment for quality vehicle maintenance work. The new facility will provide a secure, enclosed structure with the comparable maintenance spaces, equipment, and amenities found in other vehicle repair shops. The new shop will support seven to nine staff maintaining over 265 vehicles and heavy equipment.

Item	Amount
Construction	\$5,346,000
Design and Construction Administration	\$535,000
Information Technology/Security	\$100,000
Furniture, Fixtures & Equipment	\$435,000
Contingency	\$535,000
FY 2026 Appropriation Total	\$6,951,000

Construct New Maintenance Offices and Crew Rooms in Little Antelope and Gray Mountain Laws 2025, Chapter 235 (SB 1737), Section 8 appropriates \$6,861,000 to construct two new 3,500 square feet Roadway Maintenance Offices located in Northern Arizona, one at Little Antelope and one at Gray Mountain.

The current facilities at Little Antelope and Gray Mountain are outdated and insufficient, consisting of mobile homes from the 1960's, 1971, and 1988. These locations lack the space and infrastructure to support assigned staff (12 positions at Little Antelope and 11 at Gray Mountain) and equipment, and the upgrades will greatly improve working conditions, especially during snow removal season when augmented staff are on site.

Leveraging their proximity, this project will deliver two distinct facilities, one at each site, using a single, standardized design to reduce costs and improve operational efficiency.

Item	Amount
Construction	\$5,322,000
Design and Construction Administration	\$532,000
Information Technology/Security	\$75,000
Furniture, Fixtures & Equipment	\$400,000
Contingency	\$532,000
FY 2026 Appropriation Total	\$6,861,000

Thank you for your consideration of this request. If you have any questions or need additional information, please contact David Bolter, Budget Manager, at (602) 712-8917.

Sincerely,

Jennifer Toth Director

FROM:

Ethan Scheider, Fiscal Analyst

SUBJECT:

Northern Arizona University – Review of Capital Infrastructure Fund Projects

#### Request

A.R.S. § 15-1671 requires Committee review of cash projects funded by the Capital Infrastructure Fund (CIF). Northern Arizona University (NAU) requests committee review of \$5,142,200 for capital improvement projects funded via CIF cash.

#### **Committee Options**

The Committee has at least the following 2 options:

- 1. A favorable review of the capital projects.
- 2. An unfavorable review of the capital projects.

Under either option, the Committee may also consider the following standard university financing provisions:

#### Standard University Financing Provisions

- A. A favorable review by the Committee does not constitute endorsement of General Fund appropriations to offset any revenues that may be required for debt service or any operations and maintenance costs when the projects are complete.
- B. On or before October 15 of each year until completion of the projects, NAU shall report to the JLBC Staff on the status and expenditures of the capital projects. The report shall include the project expenditures to date, any changes to the planned construction timeline, the expected completion date, and any change to the scope of the projects.

#### **Key Points**

- 1) NAU plans to complete capital projects using \$5.1 million from the university's FY 2026 CIF appropriation.
- 2) CIF consists of statutory General Fund appropriations for university capital and deferred maintenance projects. Universities may use these monies to pay 50% of the debt service on bond issuances or for cash-funded construction projects.
- 3) The projects consist of:
  - \$4.8 million for renovations to the heating and cooling systems in the Forestry Sciences building.
  - \$222,000 for installation of electronic card access control and security cameras at the Forestry Sciences building.
  - \$120,000 for the repair of IT systems at the Science Annex buildings.

#### **Analysis**

NAU is proposing 3 capital projects totaling \$5.1 million:

• NAU will spend \$4.8 million for phase one of a Forestry Sciences building renovation, which will include approximately \$3.8 million to connect the heating and cooling lines from the South Campus Energy Plant to the Forestry Science Complex facility, \$300,000 to replace the current boiler with heating and cooling exchangers in the Forestry building mechanical room, \$300,000 for design costs, \$120,000 for commissioning to ensure compatibility, and \$280,000 for contingency funding. NAU expects the project to be completed by the Fall 2026 semester.

NAU anticipates phase two of the project to include additional upgrades to plumbing, lighting, flooring, and mechanical systems in the building at a cost of approximately \$3.5 million in FY 2027, which would be reviewed by the Committee at a later date.

- NAU will spend \$222,000 for security upgrades at the Forestry Sciences building, which includes
  replacing failed security cameras and electronic card access control at the entrances of the building.
  NAU expects the project to be completed by this winter.
- NAU will spend \$120,000 for the repair of IT systems at the Science Annex buildings. NAU will
  replace a failed IT system, which supports building operations and network stability. NAU expects
  work to begin in Summer of 2026 following a procurement process.

#### Financing

NAU plans to pay cash for the projects using the entirety of its \$5.1 million FY 2026 CIF Appropriation.

Laws 2017, Chapter 328 established A.R.S. § 15-1671, which provides General Fund appropriations from FY 2019 to FY 2043 for new university research facilities, building renewal, or other capital construction projects. The law appropriates \$27.0 million to the universities in FY 2019 and increases the appropriation each year thereafter by 2.0% or the rate of inflation, whichever is less.

The FY 2026 appropriations are allocated to each university as follows:

ASU: \$13,566,700
NAU: \$5,142,200
UA: \$12,001,900
Total: \$30,710,800

The universities may use these monies for debt service on infrastructure long-term financing and for cash construction costs. New debt issued under this program may not exceed \$1.0 billion.

Under the law, each university's General Fund appropriation is deposited into a newly-created Capital Infrastructure Fund (CIF). Each university must match any General Fund contributions to its fund that are used for debt service payments at a 1:1 rate. In this instance, there is no match requirement as NAU is not using its appropriation to issue debt.

CIF cash projects are subject to JCCR review, while university bonding projects financed with CIF monies require committee approval.

September 30, 2025

The Honorable David C. Farnsworth, Chair Joint Committee on Capital Review Arizona State Senate 1700 W. Washington Phoenix, AZ 85007

#### Dear Senator Farnsworth:

Pursuant to Arizona Revised Statute §15-1671 Northern Arizona University (NAU) submits this letter on the proposed use of University Capital Infrastructure monies for Fiscal Year 2026.

NAU is appreciative of the state's investment in Arizona's public universities' infrastructure through the ongoing allocation of the Capital Infrastructure Funds (CIF) funds. In previous years, NAU has taken advantage of the cash option for CIF funds to address several deferred maintenance projects spanning multiple buildings on the Flagstaff Campus in the North Science Corridor. Those projects were favorably reviewed by the Joint Committee on Capital Review (JCCR) with the most recent project reviewed in September 2024. NAU now requests favorable review to use the Fiscal Year 2026 allocation of \$5.1M to fund renovations in the Forestry building as well as several deferred maintenance and electronic card access projects in STEM buildings as detailed in the attached materials.

Thank you for your consideration. If you have any questions, please feel free to contact me at (928) 523-4240 or bjorn.flugstad@nau.edu.

Sincerely,

Bjorn Flugstad

Senior Vice President, Chief Financial Officer

## FY26 State Capital Infrastructure Funds

## Forestry Building Renovations (Phase 1)

#### Project Scope

Phase 1 of the Forestry Science Complex Renovations will replace the outdated boiler and wet-wall system and connect the facility to the South Campus distributed hot water and chilled water system. Work includes replacement of boilers, associated piping, and integration into the Building Automation System (BAS). Phase 2, anticipated in the following fiscal year (~\$3.5M), will complete the remainder of the scope outlined in the Owner's Project Requirements (OPR), including additional distribution upgrades, plumbing, lighting, flooring, and lab-specific mechanical requirements.

#### **Project Justification**

The Forestry Science Complex, constructed in 1992, contains original HVAC components which are failing and past useful life. The 2022 Facility Condition Assessment (FCA) identified all major HVAC systems that are due for replacement. The building is shared with the USDA Forest Service, whose components are also in failure, making this a critical shared-use infrastructure upgrade. Phase 1 addresses the highest-priority items (connection to distributed system and boiler replacement), while Phase 2 will follow in FY27 to complete the full OPR-defined scope.

#### **Estimated Project Cost:**

\$4.8M (Phase 1) \$3.5M (Phase 2, FY27)

#### **Basis of Cost Estimate:**

Costs are based on design team estimates. The final construction estimate will be provided once design documents are completed.

#### Cash vs Bonding:

This project is funded with cash, utilizing the State Capital Infrastructure funding.

#### Life of the project components:

All work will be designed to NAU's Technical Standards, providing long-term maintainability, energy efficiency, and durability. The project emphasizes sustainable systems designed for a multi-decade lifecycle.

#### Project Delivery

This project will utilize a Construction Manager at Risk delivery method.

#### Renovation vs. new construction:

This project is a renovation of the existing building. The renovation of this space is a costeffective solution to maintain the square footage on campus as compared to building a new building of similar square footage and will reduce the deferred maintenance costs on campus.

#### **Timeline**

Procurement of the CMAR team will begin after funding approval. Design is scheduled to complete by the end of 2025, with construction beginning in Spring 2026 and completing before the Fall 2026 semester.

### STEM Buildings (Science Annex) Maintenance

#### **Project Scope**

This project focuses on replacing the failed passive optical network (PON) system at the Science Annex. The current system failure is causing significant operational disruptions. The FY26 funding request provides initial funding to begin this critical repair. The remaining funds will be allocated in FY27.

#### **Project Justification**

The failed PON system impacts building operations, network stability, and functionality for faculty and students. Addressing this failure is critical to restore reliable systems performance and maintain the operational capacity of the facility. Spreading the cost over multiple years provides financial flexibility while ensuring urgent work begins immediately.

#### **Estimated Project Cost:**

\$0.120M (initial FY26 funding)
Additional funding anticipated FY27 (\$0.080M)

#### **Basis of Cost Estimate:**

These costs are based on contractor's estimates. Final costs are dependent on timeline and final designs.

#### Cash vs Bonding:

This project is funded with cash, utilizing the State Capital Infrastructure funding.

#### Life of the project components:

Replacement PON equipment will provide reliable performance for an expected 10–15 years with routine IT maintenance and upgrades.

#### **Project Delivery**

This project will utilize a job order contracting delivery method.

#### Renovation vs. new construction:

This project encompasses renovations of existing infrastructure. New construction is not applicable.

#### Timeline

Procurement of the job order contractors and design professional firms (where necessary) will begin shortly after funding approval. Construction is anticipated in Summer 2026.

## STEM Building Electronic Card Access Install, Phase 2

Project Scope

This continuation of campus security upgrades will install electronic card access control and security cameras at the Southwest Forest Science Complex (Forestry). This replaces outdated lock-and-key methods with modern, technology-integrated building security systems.

**Project Justification** 

Building safety and security is paramount to the success of the students, faculty, and staff on campus. Electronic access and security cameras are a more effective method of building security over the traditional lock and key as this approach offers enhanced security including preventing unauthorized access, access tracking and audit trails, and integration into other smart technologies. Further, maintenance and operations efforts are reduced by removing the need to have an individual physically lock and unlock the exterior doors every day.

#### **Estimated Project Cost:**

\$0.222M

#### **Basis of Cost Estimate:**

The estimated project cost is derived from a contractor's estimate.

#### Cash vs Bonding:

This project is funded with cash, utilizing the State Capital Infrastructure funding.

#### Life of the project components:

The conservative expectation of useful life for the hardware is 10 years considering the outdoor elements, technology updates, functionality, and compatibility.

#### **Project Delivery**

This project will utilize an electronic safety and security vendor procured under a purchase order in accordance with ABOR policy.

#### Renovation vs. new construction:

This project is a modification to existing buildings for safety and security enhancements. New construction is not applicable.

#### Timeline

Completion date is expected for Winter 2025.

Members of the Joint Committee on Capital Review

FROM:

Grace Timpany, Fiscal Analyst

SUBJECT:

University of Arizona – Approval of SPEED Bond Deferred Maintenance Projects

#### Request

A.R.S. § 15-1682.03 requires Committee <u>approval</u> of any projects financed with lottery revenue (SPEED) bonds. The University of Arizona (UA) requests Committee approval of \$38,750,000 in SPEED bonds for deferred maintenance projects across multiple campus buildings. The debt service for SPEED bonds is paid 80% by state lottery revenues and 20% by university resources. Lottery revenues used to pay debt service would otherwise be deposited into the General Fund.

#### **Committee Options**

The Committee has at least the following 2 options:

- 1. Approval of the request.
- 2. Disapproval of the request.

Under either option, the Committee may also consider the following provisions:

#### Standard University Financing Provisions

- A. A favorable review by the Committee does not constitute endorsement of General Fund appropriations to offset any revenues that may be required for operations and maintenance costs when the project is complete.
- B. UA shall provide the final debt service schedule and interest rate for the projects as soon as they are available.
- C. On or before October 15 of each year until completion of the project, UA shall report to the JLBC Staff on the status and expenditures of the project. The report shall include the project expenditures to date by type of building system, any changes to the planned construction timeline, the expected completion date, and any change to the scope of the project.

#### **Additional Provision**

D. UA shall report to the Chairman and the JLBC Staff prior to reallocating monies between projects as listed in the agency submission materials.

#### **Key Points**

- 1) UA plans to complete deferred maintenance projects across multiple buildings including upgrades to HVAC and cooling systems, fire safety systems, plumbing, campus streets, roofing, and other utility infrastructure projects.
- 2) These projects will be funded with \$38.8 million in lottery revenue (SPEED) bonds.
- 3) The annual debt service will be \$3.1 million with 80% paid by lottery revenues and 20% paid by tuition revenue.

#### **Analysis**

UA intends to complete deferred maintenance projects across multiple buildings to address the university's aging building infrastructure needs. Of the total \$38.8 million cost, \$13.4 million will be used for 12 HVAC and cooling system upgrades, \$7.0 million will be for 8 utilities infrastructure projects and \$6.0 million will be for student union projects.

The remaining \$12.4 million will be for various projects including upgrades to fire and public safety items, plumbing, electrical and emergency power, building automation, roofing, elevators, campus streets, and asbestos removal. UA states that the existing systems have reached the end of their useful life and upgrades are necessary for safety and Americans with Disabilities Act (ADA) compliance.

Table 1 displays estimated project costs by category. Please see the agency submittal letter for a more detailed list of specific projects in each category.

Table 1		
University of Arizona		
FY 2026 Deferred Maintenance Projects		
HVAC & Cooling Upgrades	\$13,376,298	
Utilities Infrastructure	7,000,000	
Student Union	6,026,650	
Fire Safety System Upgrades	3,900,000	
Public Safety Upgrades	2,000,000	
Plumbing Upgrades	1,942,000	
Electrical and Emergency Power	1,403,689	
Building Automation Upgrades	1,000,000	
Roofing	830,000	
Elevator Upgrades	760,000	
Campus Street Upgrades	411,363	
Asbestos Removal	100,000	
Total	\$38,750,000	

#### Financing

UA plans to issue \$38.8 million in lottery revenue (SPEED) bonds with an anticipated rating of Aa3 (Moody's)/AA- (S&P) and an estimated interest rate of 5.00% over a 20-year term. Estimated issuance costs are \$310,000.

The annual debt service will be \$3.1 million from FY 2027 to FY 2046. Of the total \$62.7 million in debt service costs, \$50.1 million (80%) will be paid for with lottery revenue and the remaining \$12.6 million (20%) with tuition revenue. (See Table 2 for a summary of the bond financing terms).

SPEED bonds are excluded from each university's statutory debt ratio. UA's current projected FY 2026 debt ratio is 3.28%. If SPEED bonds were included, this project would increase the debt ratio by 0.46%.

#### **University SPEED Bonds**

Pursuant to A.R.S. § 15-1682.03, the Arizona Board of Regents (ABOR) is authorized to enter into lease-to-own and bond transactions up to a certain maximum to pay for building renewal projects and new facilities. Annual debt service payments on these transactions are funded 80% by lottery revenues and 20% by other university revenues. Any lottery revenue used for debt service payments would otherwise be deposited into the General Fund. The program began in 2010, allowing universities to bond for up to \$800.0 million. The universities have committed all the original allocation.

The FY 2026 budget increased the maximum of SPEED bond transactions from \$800.0 million to \$1.125 billion. Of the \$325.0 million increase, \$162.5 million became available in FY 2026 and \$162.5 million becomes available in FY 2027. ABOR approved allocation of the increased bonding authority at its September 2025 board meeting, distributing \$123.5 million (38%) to ASU, \$87.8 million (27%) to NAU, and \$113.8 million (35%) to UA.

The FY 2026 UA deferred maintenance project would utilize \$38.8 million from the newly authorized bonds, leaving \$75.0 million in UA's SPEED bonding capacity.

Table 2		
UA Deferred Maintenance Financing Terms		
Issuance Amount	\$38.8 million	
Issuance Date	Early 2026	
Issuance Transaction Fees	\$310,000	
Rating	Aa3 (Moody's)/AA- (S&P)	
Interest Rate	5.00%	
Term	20 years	
Total Debt Service Costs	\$62.7 million	
Debt Service Payments	\$3.1 million	
Payment Source	\$50.1 million lottery revenue (SPEED) \$12.6 million tuition revenue	
Debt Ratio Increase	SPEED Bonds are excluded from debt ratio calculation	

**BUSINESS AFFAIRS** 

Old Main 1200 East University Boulevard PO Box 210021 Tucson, Arizona 85721

Ofc: 520-621-5977 businessaffairs.arizona.edu

September 29, 2025

The Honorable David Farnsworth Chairman, Joint Committee on Capital Review Arizona State Senate 1700 West Washington St. Phoenix, Az 85007-2890

#### Dear Senator Farnsworth:

In accordance with A.R.S. §15-1682.03, the Arizona Board of Regents requests the Center for Advanced Molecular Immunological Therapies (CAMI) and upcoming deferred maintenance projects be placed on the next Joint Committee on Capital Review agenda for approval so that the University of Arizona may utilize Stimulus Plan for Economic and Educational Development (SPEED) bonds for these projects. The committee previously approved the CAMI project in January 2025 as a system revenue bond (SRB) project. Since that review, the university has reworked the project and is requesting to change the financing mechanism from SRB to SPEED. This change will offset millions in annual debt service allowing the university to invest in other student success initiatives.

To finance these projects, the University of Arizona will issue SPEED bonds across two fiscal years in the following manner:

	Center for Advanced Molecular	Deferred Maintenance	Total
	Immunological Therapies	Deferred Maintenance	Total
Fiscal Year 2026	\$56,875,000	\$0	\$56,875,000
Fiscal Year 2027	\$18,125,000	\$38,750,000	\$56,875,000
	\$75,000,000	\$38,750,000	\$113,750,000

Included with this request, please find summaries of both projects and details on the issuance of bonds for each.

Thank you for your support of the University of Arizona's land-grant mission, as we provide access to a world-class education, research with real-world impact, and service to the state of Arizona and its people.

Sincerely,

CC:

John S. Arnold
Chief Financial Officer

Representative David Livingston, Vice-Chairman

Richard Stavneak, Director, JLBC Grace Timpany, Fiscal Analyst, JLBC

### Project Summary: Center for Advanced Molecular Immunological Therapies<sup>1</sup>

The Committee originally reviewed this project in January 2025. Since that review, U of A went through a value engineering process to reduce costs and decided to stage the interior buildout of the building. At this stage of the project, U of A will complete the buildout of 2 of the 7 floors. These changes reduced the project cost from \$290 million to \$232 million. \$75 million of the project will be financed through SPEED Bonds issued by the University of Arizona. U of A plans to use indirect cost recovery funds to pay the university portion of the debt service. The estimated annual debt service for the project is \$4.9 million. The remainder of the project will be paid for as follows:

- \$57 million in State of Arizona American Rescue Plan Act (ARPA) funding
- \$8 million in Maricopa County ARPA funding
- \$31 million from tuition and indirect cost recovery enabled through ARPA reimbursements
- \$61 million from other university funds including gifts, tuition, and indirect cost recovery

CAMI will be a national biomedical research hub on the U of A's downtown Phoenix Bioscience Core ("PBC") campus. Located on the southwest corner of Fillmore Street and 7<sup>th</sup> Street, the seven-story, 202,000 square foot building is designed to house research groups and potential private partnerships. Researchers and physician-scientists based out of CAMI will use precision medicine to develop new cell- and gene-based therapeutical options for diseases including cancer, building on the concept that the most effective defense against health issues is the body's natural immune system. CAMI will accelerate the pursuit of immunotherapies already underway at the U of A, and open new doors to advance precision medicine to improve health outcomes for people across Arizona and around the world.

#### CAMI Research & Discovery

The CAMI building will provide space focused on the following areas:

#### CANCER

Immunotherapy holds the promise of a new standard of care for treatments of cancer, a disease that disproportionately affects older people. Immunotherapy can generate precise drug treatments based on the individual patient's unique features of their cancer. The research that will take place at CAMI has the potential to fundamentally change the way cancers are treated.

#### ■ INFECTIOUS DISEASES

The relevance of classic immunological therapies has been highlighted throughout the COVID-19 pandemic. Through the discovery and interdisciplinary research done at CAMI, new immunotherapies will be able to overcome the challenges typically faced by existing infectious disease prevention, such as drug toxicity and resistance. Ultimately, this work can change how public health efforts combat communicable diseases in Arizona and around the world.

#### AUTOIMMUNE DISEASES

Living with an autoimmune disease means the body is fighting against itself every day. The body's natural defense system cannot distinguish between its own cells and foreign cells, causing it to

<sup>&</sup>lt;sup>1</sup> Revised from January 2025 JCCR Approval

mistakenly attack normal cells. Research will help the body gain control over this fight. CAMI research will create immunotherapies that target or alter components of the immune system to suppress specific autoimmune diseases such as type 1 diabetes, lupus, rheumatoid arthritis, and Crohn's disease.

#### Workforce Development

Student education will be prioritized in learning spaces dedicated to programs that will allow CAMI faculty and researchers to mentor and train the next generation of scientists. A principal function of CAMI's research laboratories and student office/cubicle space is to facilitate hands-on student participation and innovation. Students with strong experience working on multidisciplinary and application-driven project teams are highly sought in today's economy. It is estimated that 100 to 150 new, high wage research positions will be created at CAMI.

#### Access to Immunotherapies for Arizonans

CAMI will work with clinical partners in Phoenix and across the state to ensure the latest personalized treatments are made available to Arizonans. Treatments to target the specific causes of an individual's illness are becoming a reality, especially for diseases like cancer. However, these treatments are often only available at the hospitals and institutions that created the therapy because they must be personalized and cannot be mass-produced. A critical component of CAMI is to incorporate the latest basic insights and cutting-edge technologies into the facility to make these therapies available to Arizonans.

#### Project Phases and Costs

U of A is using design-build as the project delivery method, and a variety of procurement methods are being engaged for sub-contractor selection including lowest qualified bid. The entire project is scheduled to be completed in May 2027, with occupancy taking place over the summer of 2027.

Below is the estimated cost associated with each major area of the \$232 million project.

\$ 183,900,000	Construction Costs  New Construction  Fixed Equipment  Utilities extensions
\$ 33,600,000	Consultant Fees Design-Build Fees Special Consultants
\$ 11,400,000	Indirect Costs Furniture, Fixtures & Equipment Contingency, Design & Construction Phases Telecommunications Equipment
\$3,100,000	Additional Costs Surveys & Test Move-in Costs Construction Management State Risk Management Insurance

#### Project Summary: Deferred Maintenance

The total cost for the deferred maintenance projects is \$38.75 million. This includes various general deferred maintenance projects for U of A campus buildings and streets. The projects will be financed through SPEED bonds issued by the U of A. The U of A plans to use lottery revenue proceeds and retained tuition to pay the debt service. The estimated annual debt service for the project is \$3.1 million.

The general deferred maintenance projects for U of A's campus buildings and streets consist of various fire alarm and sprinkler, heating and cooling, building automation, and campus street upgrades. In addition, various plumbing and heat exchangers, roofs, and generators will be replaced. All campus systems and infrastructure receive routine preventative inspections, maintenance, and repairs. The building components being upgraded, repaired, or replaced have reached the end of their useful life and are necessary to ensure compliance with safety codes and the Americans with Disabilities Act. The various project delivery methods and processes for the projects will include competitive bids, government cooperative contracts, and job order contracting.

Total Project Cost Breakdown:

\$38,750,000

TO:

Members of the Joint Committee on Capital Review

FROM:

Nate Belcher, Senior Fiscal Analyst

SUBJECT:

Arizona Game and Fish Department - Review of FY 2025 and FY 2026 Building Renewal

Allocations

#### Request

A.R.S. § 41-1252 requires Committee review of expenditure plans for monies appropriated for building renewal and capital projects and for any capital project with an estimated cost of more than \$250,000. The Arizona Game and Fish Department (AGFD) requests the Committee review a total of \$1,972,000 for 30 projects and contingency funding, of which \$330,000 will be sourced from AGFD's FY 2025 building renewal appropriation from the Game and Fish Fund and \$1,642,000 will be funded by the Department's FY 2026 building renewal appropriation from the same fund.

#### **Committee Options**

The Committee has at least the following 2 options:

- 1. A favorable review of the request.
- 2. An unfavorable review of the request.

Under either option, the Committee may also consider the following provision:

A. In the respective quarterly capital report update, AGFD shall notify the Chairman and JLBC Staff when spending monies for an emergency maintenance and repair project. AGFD may proceed with the emergency repairs prior to Committee review.

#### **Key Points**

- 1) AGFD is seeking review of \$330,000 from Game and Fish Fund monies appropriated in the FY 2025 budget for building renewal to fund two roof repair projects at the Ben Avery Shooting Facility and AGFD's Flagstaff regional office.
- 2) AGFD also is seeking review of \$1.6 million from its \$1.8 million FY 2026 building renewal appropriation, including:
  - \$697,000 for 16 projects at 6 hatcheries across the state.
  - \$679,700 for 12 projects at various regional offices, wildlife areas, and AGFD headquarters.
  - \$145,300 for preventative maintenance.
  - \$120,000 for emergency maintenance and repairs.
- 3) The agency request lists specific dollar amounts for each individual project.

#### **Analysis**

#### FY 2025 Building Renewal Projects

The FY 2025 budget included \$1.8 million from the Game and Fish Fund for building renewal projects. In its November 2024 meeting, the Committee gave favorable review of AGFD's plans to spend \$1.4 million of that amount. AGFD is now requesting to spend \$330,000 of the \$440,100 in unallocated monies from that appropriation for 2 projects to repair roofs:

- \$180,000 to recoat the roof of AGFD's headquarters to address various leaking issues.
- \$150,000 to replace the warehouse roof at AGFD's regional office in Flagstaff.

After these to 2 projects, \$110,100 would remain from the Department's FY 2025 building renewal appropriation.

#### FY 2026 Building Renewal Projects

The FY 2026 Capital Outlay Bill appropriated a total of \$1.8 million from the Game and Fish Fund for building renewal. AGFD requests review of \$1.6 million for 29 projects and emergency maintenance. Please see *Table 1* on page 4 for a breakdown of AGFD's proposal.

#### Hatcheries

AGFD-owned fish hatcheries produce much of the sportfish stocked in Arizona lakes. The Department's plan includes \$697,000 for 16 projects at various hatcheries and associated facilities. This amount includes \$70,000 to replace windows at Bubbling Ponds, \$202,500 for 5 projects at Canyon Creek, \$25,000 to upgrade restrooms and plumbing at Page Springs, \$135,000 for 3 projects at Silver Creek, \$75,000 to replace the warehouse roof at Sterling Springs, and \$189,500 for 5 projects at Tonto Creek.

#### Regional Offices

Regional offices serve as a base of operations for AGFD personnel in their respective geographical areas and typically employ around 30 employees. AGFD's FY 2026 Building Renewal plan includes \$277,500 for 7 projects at regional offices, including \$165,000 to repair the barn at the Horseshoe Ranch, \$50,000 for ADA-compliant restrooms at the Kingman office, and \$62,500 for 4 projects at the Pinetop regional office.

#### Wildlife Areas

Wildlife areas are used for wildlife conservation and wildlife viewing and employ a full-time manager onsite. AGFD's plan includes \$120,000 for wildlife areas, including \$20,000 for phase 2 of upgrades to the bunkhouse at Raymond Wildlife Area and \$100,000 for repairs to several buildings at Whitewater Draw Wildlife Area.

#### AGFD Headquarters

The department's plan also includes \$282,200 for three projects at its headquarters at the Ben Avery campus. An \$80,000 project would replace the security camera system on site, \$50,000 would go toward replacing the campus' HVAC units, and a \$152,200 would be set aside for major maintenance at the facility.

#### Maintenance and Emergency Allocations

The plan includes an allocation of \$120,000 reserved for emergency issues and an allocation of \$145,300 (8% of the building renewal appropriation) that can be used for preventative maintenance per statute.

Table 1

Senator John Kavanagh, Chairman Joint Committee on Capital Review Capitol Complex 1700 W. Washington Phoenix, AZ 85007-2890

Re: Request for Placement on Joint Committee on Capital Review Agenda

Honorable Senator Kavanagh:

In accordance with A.R.S. § 41-1252 A(4), the Arizona Game and Fish Department respectfully requests to be on the next scheduled agenda of the Joint Committee on Capital Review to review the Department's capital projects expenditure plan, and reallocation of fiscal year 2025 building renewal funds to support the following projects: building roof resurfacing at the Department's headquarters facility and replacement of roofs at the Region 2 warehouse and bunkhouse.

Sincerely,

Joshua Hurst,

Deputy Director

cc: Senator John Kavanagh, Vice Chair, JCCR

Richard Stavneak, Staff Director, JLBC

Sarah Brown, Director, OSPB

### Arizona Game and Fish Department FY25 Building Renewal Reallocation Funds

Project: AZGFD Headquarters Building Roof Recoating

Funding Source: Game and Fish Fund - Building Renewal

Category: Shell: Superstructure; Exterior Walls & Roofing

Need: The Arizona Game and Fish Department (AZGFD) Headquarters (HQ) Building in Phoenix is experiencing worsening roof conditions, including persistent and recurring leaks in key areas such as the Quail Room, the building entry, and previously near the Draw area. These issues pose a growing risk to AZGFD's critical business operations, particularly with an active monsoon season forecast. Despite prior preventative maintenance performed in 2019, 2022, 2023, and 2024, leaks continue to occur, indicating that past repairs have not addressed the root causes.

Although the existing roof system has an estimated three years of remaining life on paper, the harsh Phoenix climate characterized by intense heat and thermal cycling has significantly accelerated the degradation of roofing materials. High summer temperatures cause expansion while cold winter nights and storm events trigger contraction, which leads to seam separation, flashing failures, and coating breakdowns. These stressors are causing roof performance to deteriorate prematurely.

Given the potential for water infiltration to impact mission-critical infrastructure, such as the Department's IT server room and other areas, immediate action is required to prevent operational disruptions and costly damage.

**Solution:** The Department requests approval to reallocate \$180,000 from FY 2025 Building Renewal funds to complete a full roof recoating of the HQ Building. The proposed \$180,000 from FY 2025 building renewal is a combination of unallocated funding and remaining balances from a couple of projects that were completed under budget. This work will include surface preparation, sealing of joints and penetrations, restoration of flashings, and application of a protective coating system that meets current durability and energy efficiency standards.

Cost Estimate: \$180,000

Impact of Not Approving this Request: AZGFD is committed to providing a quality work environment for its employees and visitors, as well as actively managing habitat to conserve and protect Arizona's wildlife. Failure to address the roof's condition now may result in worsening leaks and potential damage to AZGFD facilities, equipment, and critical infrastructure such as the IT server room. The Department's ability to function during severe weather events could be compromised, increasing emergency repair costs and affecting public services. Additionally, continued deferral of this work may reduce future funding efficiency, as incremental repairs fail to resolve underlying issues.

Project: AZGFD Flagstaff Regional Office Warehouse Building Roof Replacement

Funding Source: Game and Fish Fund - Building Renewal

Category: Shell: Superstructure; Exterior Walls & Roofing

**Need:** The existing roof on the Flagstaff Regional Office Warehouse which includes a Bunkhouse is well beyond its expected service life and has experienced significant wear and damage over time. Despite prior preventative maintenance performed in 2024 and 2025, leaks continue to occur, indicating that past repairs have not addressed the root causes. The harsh environmental conditions in Northern Arizona characterized by heavy snow loads, freezing temperatures, and intense UV exposure have contributed to the roof's accelerated deterioration.

Visible damage such as cracking, small holes, and water infiltration is present throughout the roof. Of particular concern is a recurring leak affecting the bunkhouse circuit breaker box, posing a serious electrical and life safety hazard. This situation jeopardizes the structural integrity of the building and puts personnel, equipment, and stored materials at risk. Temporary fixes are no longer viable, and continued degradation may result in more extensive and costly structural damage.

Roof replacement is essential to protect state assets, ensure the facility's long-term functionality, and remain in compliance with building and safety standards. A new roofing system, engineered to withstand Northern Arizona's extreme climate, will significantly extend the building's service life.

Given the ongoing water intrusion into critical electrical infrastructure, immediate action is necessary to eliminate serious safety risks, prevent operational disruptions, and avoid escalating repair costs.

**Solution:** The Department requests approval to allocate \$150,000 from FY 2025 Building Renewal funds to complete a full roof replacement of the Flagstaff Regional Office Warehouse and Bunkhouse. The proposed \$150,000 from FY 2025 Building Renewal is a combination of unallocated funding and remaining balances from a couple of projects that were completed under budget.

AZGFD will hire a State-contracted vendor to perform the work. This approach will ensure timely project execution, cost control, and compliance with state procurement regulations. The new roof system will restore the building's integrity, protect stored assets, and reduce future maintenance costs.

Arizona Game and Fish Department
Building Renewal and Capital Projects Expenditure Plan
Fiscal Year 2025-2026

Cost Estimate: \$150,000

Impact of Not Approving this Request: AZGFD is committed to maintaining a safe, functional work environment for its employees and visitors while supporting its mission to conserve and protect Arizona's wildlife. If this request is not approved, the roof of the Flagstaff Regional Office Warehouse and Bunkhouse will continue to deteriorate, increasing the likelihood of water intrusion, structural damage, and serious safety hazards particularly related to ongoing leaks near electrical infrastructure. Failure to act may result in damage to vital equipment and materials essential to AZGFD operations, higher future repair and replacement costs, and potential disruption of services. Delaying the project could also necessitate emergency repairs, which are typically more costly, less effective.

## AZGFD Reallocation Plan for FY25 Unallocated Building Renewal Funds

Builden Renewal Project Title	Project Category	Funding Source	Cost Estimated	FY25 Unallocated Balance
				\$440,084.00
AZGFD Headquarters Building Roof Recoating	Shell: Superstructure; Exterior Walls & Roofing	Game and Fish Fund	\$180,000.00	
Flagstaff Regional Office Warehouse Building Roof Replacement	Shell: Superstructure; Exterior Walls & Roofing	Game and Fish Fund	\$150,000.00	
		Total Projects Cost		\$330,000.00
	Remaining Balance:			\$110,084.00

## Arizona Game and Fish Department Building Renewal and Capital Projects Expenditure Plan Fiscal Year 2026

Overview: The Arizona Game and Fish Department (AZGFD) manages over five hundred facilities statewide, encompassing administrative offices, sites, shooting ranges, actively and passively managed wildlife areas, dams, boating facilities, and other recreational enhancements. These facilities range in age from historic structures dating back to the 1930s to recently constructed operational and administrative buildings. Maintaining these assets is crucial for AZGFD, necessitating a comprehensive maintenance program that includes scheduled replacement or renovation of major building systems and infrastructure. This approach minimizes costly repairs and extends the value and useful life of these critical assets. The following outlines AZGFD's planned building renewal and capital projects for Fiscal Year 2026.

## **Building Renewal Project Descriptions:**

Project: Region 1 - Pinetop Bunk House Flooring

Funding Source: Game and Fish Fund - Building Renewal

Category: Interiors: Interior Construction-Stairs; Finishes

**Need:** The regional bunkhouse serves as essential seasonal housing for interns and employees, functioning as a base of operations throughout the summer and other times of the year. Currently, the flooring in the bunkhouse presents safety concerns. One section of the floor is soft and poses a risk of injury if stepped on. In addition, several areas of the linoleum tile are peeling or lifting, which could lead to trips or further damage. Given that the building was originally constructed in 1930, and the date of the last flooring replacement is unknown, these repairs are necessary to ensure the safety and usability of the space.

**Solution:** AZGFD will hire a qualified contractor to repair or replace the existing flooring in the regional bunkhouse. Given the age and deteriorated condition of the current floor well beyond its expected lifespan, a full replacement is recommended. Installing new flooring throughout the building will not only address the immediate safety concerns but also improve the overall functionality and appearance of the interior, helping to ensure a safe and welcoming environment for interns and staff.

Cost Estimate: \$14,000

Impact of Not Approving this Request: AZGFD is committed to providing a safe and professional work environment for its employees, interns, and visitors while advancing its mission to conserve and protect Arizona's wildlife. If this floor repair project is not funded, there is a risk that someone could be injured by stepping through the soft, weakened section of the floor. Additionally, the continued deterioration of the existing linoleum presents an increasing tripping hazard. Leaving these issues unaddressed compromises both safety and the usability of the bunkhouse, potentially affecting staff productivity and the overall effectiveness of field operations.

Project: Region 1 - Pinetop Hatchery Building - Interior Walls

Funding Source: Game and Fish Fund - Building Renewal

Category: Interior: Interior Construction-Stairs; Finishes

Need: The hatchery building on the Pinetop Regional property requires significant interior wall repairs, specifically the replacement or resurfacing of existing lath and plaster walls with drywall or new plaster. The deteriorated condition of these walls has made the building unsuitable for current Department programs and presents a serious health and safety risk. Cracks and gaps in the plaster have created voids that are actively being used by rodents, leading to an ongoing infestation. This not only damages stored materials but also poses a potential human health threat, including exposure to hantavirus. As a result, otherwise usable rooms are currently left vacant due to the risk of contamination and damage to stored items.

**Solution:** AZGFD will hire a qualified contractor to install drywall or apply new plaster over the existing lath and plaster walls within the hatchery building. This approach will seal off the voids currently used by rodents, helping to eliminate the infestation and associated health risks. In addition to improving safety, the new wall surfaces will simplify future maintenance and allow previously unusable rooms to be repurposed for storage or workspace. By restoring these interior spaces, the building can once again support Department programs effectively.

Cost Estimate: \$30,000

Impact of Not Approving this Request: AZGFD is committed to maintaining a safe and functional work environment for its employees and visitors, in support of its mission to conserve and protect Arizona's wildlife. If this project is not approved, the hatchery building will remain partially unusable due to ongoing health and safety risks posed by rodent infestation. The inability to address the deteriorating interior walls will prevent the Department from fully utilizing valuable storage and workspace, limiting operational efficiency and exposing personnel to potential health hazards such as hantavirus when accessing the affected areas.

**Project:** Region 1 - Hatchery Building Stairs

Funding Source: Game and Fish Fund - Building Renewal

Category: Interior: Interior Construction-Stairs; Finishes

**Need:** The Arizona Game and Fish Department's Commission owned Pinetop Regional Office sits on approximately 35 acres within the Town of Pinetop Lakeside. Located on this property is the Region's historic hatchery building, which occupies roughly 0.25 acres. Constructed in 1931, the hatchery served as the largest and most advanced facility in the Department's fish hatchery system until 1954, and it is now listed on the National Register of Historic Places.

Today, the building is primarily used for storage; however, access to the attic once available via a permanent staircase is now limited to an extension ladder after the original stairs were deemed unsafe to use. This current method of access presents a significant safety risk for personnel and limits the effective use of the attic for storage. Replacing the damaged staircase would restore safe and reliable access, allowing the attic space to be fully and safely utilized.

**Solution:** AZGFD will hire a general contractor to replace the damaged staircase for Department personnel to safely access the storage space in the attic of the hatchery building.

Cost Estimate: \$15,000

Impact of Not Approving this Request: AZGFD is committed to providing a quality environment for employees and visitors while actively managing habitat to conserve Arizona's wildlife. Failure to approve this request will limit the Department's ability to fully utilize valuable attic storage space within the hatchery building. More importantly, continued reliance on an extension ladder for access poses an ongoing safety risk to personnel, increasing the potential for accidents or injury during routine use.

Project: Region 1 - Pinetop Regional Office - Thermostat Replacement

Funding Source: Game and Fish Fund - Building Renewal

Category: Major Building Services

**Need:** Several thermostats in the regional office are no longer functioning properly. They cannot be programmed and are unable to maintain temperatures above 67 degrees during the winter months. This creates an uncomfortably cold environment, particularly in the conference room, which negatively impacts meetings and overall workplace comfort. Replacing the damaged thermostats is necessary to restore adequate temperature control and ensure a comfortable, functional workspace for staff and visitors..

**Solution:** AZGFD will hire a qualified HVAC contractor to assess and replace the malfunctioning thermostats in the regional office. New, programmable thermostats will be installed to ensure proper temperature control throughout the building, particularly in shared spaces like the conference room. This upgrade will improve comfort during colder months, enhance energy efficiency, and provide staff with reliable control over their work environment.

Cost Estimate: \$3,500

Impact of Not Approving this Request: AZGFD is dedicated to providing a high-quality work environment for its employees and visitors, and to actively managing habitat for the conservation and protection of Arizona's wildlife. If this request is not approved, the regional office will continue to experience inadequate heating during the winter months, with some thermostats unable to maintain temperatures above 67 degrees. This will result in uncomfortable working conditions for staff and visitors, particularly during meetings in the conference room. Prolonged exposure to a cold indoor environment can negatively affect employee comfort, productivity, and overall morale.

Project: Region 2 Raymond Wildlife Area Bunkhouse Upgrade, Phase 2

Funding Source: Game and Fish Fund - Building Renewal

Category: Shell: Superstructure; Exterior Walls & Roofing

**Need:** The Raymond Wildlife Area Bunkhouse is a small structure located within the headquarters of the wildlife area, containing a bedroom, kitchen, and bathroom. It serves as essential overnight lodging for AZGFD staff and contractors conducting work on site. With support from FY24 building renewal funds, a contractor recently completed key improvements to the bathroom, including replacement of the drywall, hot water heater, shower insert, and toilet significantly enhancing the condition of the space.

Despite these improvements, additional funding is required to complete the necessary repairs and bring the bunkhouse up to a fully functional and safe standard. Remaining needs include replacing the damaged bathroom flooring, adding proper insulation to the attic, weatherproofing one exterior door and three windows, and installing adequate lighting fixtures in both the kitchen and bedroom. These upgrades are essential to ensure the bunkhouse remains a safe, comfortable, and usable facility for personnel working in this remote location.

**Solution:** AZGFD proposes using available funds to purchase the necessary materials for completing the remaining improvements to the Raymond Wildlife Area Bunkhouse. Installation work will be contracted out when possible. If no suitable contractor is available, wildlife area staff will complete the upgrades in-house. These improvements will enhance the overall functionality of the bunkhouse by providing a fully equipped kitchen, proper lighting, enabling the facility to accommodate personnel comfortably and support field operations more effectively.

Cost Estimate: \$20,000

Impact of Not Approving this Request: AZGFD is committed to maintaining a high quality work environment for its employees and supporting effective habitat management across Arizona. If this request is not approved, the Raymond Wildlife Area Bunkhouse will remain only marginally functional as an overnight facility. Staff and contractors will continue to face limited accommodations, including inadequate space for sleeping and meal preparation, which may impact their comfort, efficiency, and ability to remain on-site during extended field work.

**Project:** Region 3 - Kingman Regional Office – ADA Improvements for Men's and Women's Restrooms

Funding Source: Game and Fish Fund - Building Renewal

Category: ADA accessibility

Need: The Kingman Regional Office, serves a critical role in supporting the Arizona Game and Fish Department's (AZGFD) mission of conserving and protecting Arizona's wildlife through habitat management, public engagement, and employee operations. As identified in the 2020 ADOA Facility Assessment, the existing men's and women's restrooms at this facility do not meet current ADA accessibility standards. Specifically, the sink countertops are too high for ADA compliance, the bathroom stalls are too narrow, and the travel corridors restrict wheelchair access. These deficiencies limit accessibility for employees and visitors, creating barriers that impact both public service and the work environment.

Solution: AZGFD will hire a general contractor to perform these necessary modifications and bring the restrooms into compliance, creating a more inclusive and accessible environment for all users. In the women's restroom, the ADA stall will be widened, requiring the adjacent stall to be reduced and the loss of one of the double sinks. Sink countertops will be lowered to meet ADA height requirements, and the stem wall will be trimmed back to ensure sufficient travel corridor space for wheelchair access. In the men's restroom, the ADA stall will also be widened, which may require repositioning or removing one of the two urinals to maintain compliant spacing. The sink countertops will be adjusted to ADA height, and the stem wall will be modified to improve travel corridor accessibility.

Cost Estimate: \$50,000

**Impact of Not Approving this Request:** AZGFD is committed to providing a quality work environment for its employees and visitors actively managing habitats to conserve and protect Arizona's wildlife. If this project is not approved, the restrooms will remain out of compliance with ADA standards, limiting access for employees, visitors, and the public.

**Project:** Region 5 - Whitewater Draw Wildlife Area - Repairs to Visitor Center, Office, Main House, Bunkhouse, Barn, and Bathrooms

Funding Source: Game and Fish Fund - Building Renewal

Category: Shell: Superstructure; Exterior Walls & Roofing

Need: While FY24 Building Renewal funds have supported important upgrades such as new windows, painting, drywall, and roofing an ADOA inspection conducted in April 2022 identified several structural and safety concerns that remain unresolved. These include cracked precast awnings, failing and separating exterior and interior walls, a deformed structural post with collapse potential, and deteriorating entry doors and caulking. In addition, some electrical and plumbing systems require attention. These deficiencies pose risks to the safety and comfort of staff and visitors, and if left unaddressed, may result in further damage, increased repair costs, and disruptions to public access.

**Solution:** AZGFD will hire a general contractor to complete the necessary repairs. This work will include stabilizing structural elements, replacing damaged doors and exterior caulking, conducting electrical and plumbing repairs, and restoring these buildings to a safe, secure, and functional condition. These improvements and repairs will help ensure long-term durability and continued safe use of the facilities by staff and the public.

Cost Estimate: \$100,000

Impact of Not Approving this Request: AZGFD is committed to maintaining safe, functional, and accessible facilities for employees and the public, as part of its mission to conserve and protect Arizona's wildlife. Deferring this project increases the risk of structural failure, potential safety hazards, and higher long term costs. The potential for limited access to key facilities such as restrooms and the visitor center could negatively impact the public experience and AZGFD's ability to deliver service. Timely investment in these repairs is essential to the Department's mission of conserving Arizona's wildlife and maintaining high quality, accessible public facilities.

Project: Region 6 - Horseshoe Ranch Barn Siding

Funding Source: Game and Fish Fund - Building Renewal

Category: Shell: Superstructure; Exterior Walls & Roofing

**Need:** The Horseshoe Ranch barn is the primary location for storing tools, equipment, and assets, and serves as the main workspace for projects on the property. The barn, built 65 years ago, still has its original siding, which is now severely deteriorated. Approximately 40% of the siding has large holes and cracks, and replacement materials (dimensional lumber) are no longer commercially available. This creates significant challenges for asset protection, public safety, and the structural integrity of the building itself.

Additionally, the barn lacks insulation, causing extreme temperature swings between summer and winter that can damage equipment. The attached shade structure and storage area are also in poor condition; its roof has blown off, the framing is pulling away from the barn, and support pillars have rotted, creating the risk of collapse.

The gaps in the barn siding allow mice, pack rats, birds, and dirt to enter freely, leading to frequent rodent infestations. Employees regularly find nests, urine, and fecal matter covering tools and equipment, requiring constant cleaning. Rodents are also chewing through electrical cords and extension cords used for power in the barn, creating a significant fire hazard in a wood framed structure.

**Solution:** AZGFD will hire a contractor to replace the deteriorated siding with new panel siding that will fully seal the barn. Spray insulation will be applied inside the barn between the studs to protect equipment and help deter rodent entry. The attached shade structure and storage area will also be rebuilt to ensure safe and functional storage.

Cost Estimate: \$140,000

Impact of Not Approving this Request: AZGFD is committed to providing a quality work environment for its employees and the active management of habitat to conserve and protect Arizona's wildlife. If this project is not approved, the barn will continue to deteriorate and pose safety risks to staff and equipment. The storage area remains at risk of collapse, endangering stored assets. Uncontrolled rodent and bird infestations will continue to create health and safety hazards, requiring ongoing cleanup and exposing staff to potential disease. Tools and equipment will continue to be damaged or destroyed by rodent activity, and the risk of fire from chewed electrical wiring will persist. Additionally, the barn's current condition makes it unsuitable for painting or aesthetic improvements, further contributing to a deteriorating work environment.

Arizona Game and Fish Department
Building Renewal and Capital Projects Expenditure Plan
Fiscal Year 2026

Project: Region 6 - Horseshoe Ranch Barn Rewire

Funding Source: Game and Fish Fund - Building Renewal

Category: Infrastructure & Building Site Work

**Need:** The Horseshoe Ranch barn serves as the primary shop for all property construction, repairs, and builds, and it also hosts large events and meetings. However, the current electrical system is outdated and inadequate. The barn has only two double outlet receptacles, forcing staff to rely on multiple extension cords and power strips to power essential equipment. The existing electrical capacity is extremely limited. This means that running more than one tool or appliance at a time such as using an air compressor while the lights are on trips the breakers, significantly disrupts work.

The use of multiple extension cords creates additional risks. Pack rats frequently chew on the cords and build nests around them, exposing bare wires and creating a severe fire hazard for the barn, its occupants, and the equipment stored inside.

**Solution:** AZGFD proposes to hire a licensed contractor to troubleshoot, repair, and replace outdated circuits and outlets as needed to restore full functionality to the electrical system. This work potentially will include rewiring the barn, replacing outlets on dedicated circuits, and replacing breakers to safely handle the electrical load. The contractor will also separate the lighting from the outlets onto independent circuits, allowing equipment to be used without shutting off the lights.

Cost Estimate: \$25,000

Impact of Not Approving this Request: AZGFD is committed to providing a safe, functional work environment that supports its mission to actively manage habitat and conserve Arizona's wildlife. If this project is not approved, the barn will remain an unsafe and inefficient workspace. Extension cords will continue to create trip hazards and fire risks due to rodent damage, threatening the safety of staff, the structural integrity of the barn, and the protection of valuable equipment and assets. The barn's limited electrical capacity will also continue to hinder daily operations, forcing staff to shut off lights to run equipment, reducing productivity.

Project: Headquarters Replace Security Camera System

Funding Source: Game and Fish Fund - Building Renewal

Category: Infrastructure & Building Site Work

**Need:** To Replace the security camera system at the Department headquarters. The current security camera system at the Department's headquarters is outdated and no longer meets the security needs of the facility. The system, originally transferred from the former Greenway headquarters, has become increasingly unreliable and presents several critical challenges.

The primary issue is the poor image quality produced by the aging analog cameras, which makes it difficult to clearly monitor activity and identify potential threats or incidents. Several camera domes are faded or cracked, further degrading visibility and creating significant blind spots. Replacement parts for the analog system are no longer available, making it impossible to maintain or repair the system effectively. These limitations significantly compromise the Department's ability to protect staff, visitors, assets, and critical infrastructure.

**Solution:** AZGFD proposes hiring a state contractor to remove the outdated and damaged system and install a newer security camera system. This upgrade will improve visibility, expand coverage, and ensure the safety and security of the headquarters facility

Cost Estimate: \$80,000

Impact of Not Approving this Request: AZGFD is committed to providing a safe, secure work environment for its employees and visitors, as well as protecting its facilities and assets in support of its mission to conserve and protect Arizona's wildlife. If this project is not approved, the current system's limitations will continue to compromise the security of the headquarters, increasing the risk of theft, vandalism, or other security incidents.

Project: Headquarters Replace Old HVAC Units

Funding Source: Game and Fish Fund - Building Renewal

Category: Major Building Services

**Need:** The existing HVAC system at Headquarters consists of 14 original units of various sizes, all over 18 years old and well beyond their expected service life. These aging units have significantly decreased in efficiency, resulting in higher energy consumption, frequent breakdowns, and increased maintenance costs.

A major concern is that all 14 units rely on R-22 refrigerant, which has been phased out, making repairs increasingly expensive and unsustainable. Parts for these units are becoming harder to source, and the ongoing risk of failure grows as the system continues to age. To maintain a safe, comfortable, and energy-efficient working environment, it is critical to begin systematically replacing these outdated units with modern, energy-efficient models.

**Solution:** AZGFD proposes a phased replacement approach over the next three FY, aiming to replace all 14 units within that timeframe. This request seeks funding to replace 3 to 5 of the 14 units, depending on the tonnage and specific needs of the facility. A licensed contractor will be hired to remove the outdated units and install new, energy-efficient HVAC systems that meet current standards and eliminate reliance on R-22 refrigerant.

This phased approach will allow AZGFD to systematically upgrade the HVAC infrastructure while managing budget constraints and minimizing disruption to daily operations.

Cost Estimate: \$50,000

Impact of Not Approving this Request: AZGFD is committed to providing a safe, secure work environment for its employees and visitors. If this request is not approved, the aging HVAC units will continue to deteriorate, leading to increased maintenance costs, rising energy expenses, and a higher risk of system failures that could disrupt operations and compromise employee comfort. The continued reliance on discontinued R-22 refrigerant will make future repairs increasingly expensive, and ultimately impossible, as parts and supplies become unavailable. In addition, inefficient HVAC units contribute to poor indoor air quality, which can negatively impact staff health, productivity, and overall workplace satisfaction. Delaying the replacement of these outdated systems will result in escalating costs, greater risks, and potential service interruptions.

Project: Bubbling Ponds Hatchery - Windows Replacement

Funding Source: Game and Fish Fund - Building Renewal

Category: Shell: Superstructure; Exterior Walls & Roofing

Need: There are four residences located on the Bubbling Ponds Hatchery property. Of these, three were constructed in 1957 and are still equipped with their original single-pane windows, which were standard at the time but are now outdated and inefficient. The existing single pane windows in these residences are in poor condition. The window frames and sills have deteriorated significantly, with large gaps and voids between the frames and the structure allowing water intrusion and exposure to outside elements. Additionally, some of the windows themselves are cracked, further compromising the building envelope and creating safety and energy efficiency concerns. This combination of issues has led to ongoing damage to the structures and poses a risk of further deterioration over time. This has led to additional damage to the building envelope and poses an ongoing risk of further deterioration.

**Solution:** AZGFD will hire a contractor to replace all the windows in the three residences with double pane windows.

Cost Estimate: \$70,000

Impact of Not Approving this Request: AZGFD is committed to providing a quality work and living environment for its employees and to the active management of habitat to conserve and protect Arizona's wildlife. The exceedingly poor condition of the windows is leading to increased energy loss, higher utility costs, water intrusion, and ongoing deterioration of the building envelope. Without replacement, the gaps, cracks, and structural failures around the windows will continue to worsen, compromising the integrity of the buildings and creating potential health and safety hazards for the residents. Delaying the replacement will result in escalating repair costs, further structural damage, and increased discomfort for the occupants due to temperature fluctuations

Project: Canyon Creek Hatchery, Residences Siding and Window Installation

Funding Source: Game and Fish Fund - Building Renewal

Category: Shell: Superstructure; Exterior Walls & Roofing

**Need:** All four residences at Canyon Creek Hatchery are in urgent need of new siding and windows, with Modular Residence 2 in the greatest need of window and siding replacement. The existing siding is in poor condition, with visible cracks, missing sections, and deteriorated materials that leave the structures vulnerable to weather damage and energy loss. The current windows are also outdated, damaged, and inefficient, further compromising the comfort and energy efficiency of the residences. These issues have led to increased maintenance needs, energy costs, and potential risks to the building integrity and occupant safety.

**Solution:** AZGFD has already purchased and stored all required materials on-site to address the need of Modular Residence 2 identified as being in the greatest need. This material includes new windows, concrete fiberboard lap siding, and vapor barrier/house wrap. The request is for funding to hire a licensed contractor to complete the installation of these materials on Residence 2. This funding will also cover any small material purchases necessary to ensure a complete and professional installation. By utilizing the materials already on hand, AZGFD can efficiently address the critical condition of the residences while minimizing costs.

Cost Estimate: \$40,000

Impact of Not Approving this Request: AZGFD is committed to providing a quality work and living environment for its employees. If this request is not approved, the deteriorating condition of the windows and siding will continue to compromise the integrity of the residences at Canyon Creek Hatchery. The cracks, missing sections, and failing materials will lead to further water intrusion, energy loss, and ongoing damage to the building structure. This will result in increased maintenance needs, higher costs, and potentially unsafe living conditions for staff residing in these units. Delaying the project will escalate long term repair costs and may ultimately lead to more significant structural failures requiring extensive and costly interventions.

Project: Canyon Creek Hatchery - Raceway 2 Reuse Valve Repair/Replacement

Funding Source: Game and Fish Fund - Building Renewal

Category: Infrastructure & Building Site Work

Need: Canyon Creek Hatchery produces approximately 100,000 pounds of trout annually for recreational fishing in the White Mountains and maintains a critical Gila Trout broodstock, a native and threatened species in Arizona. The reuse water valve controlling water flow to Raceway 2 is no longer operational and is stuck in a fixed position, allowing only 400 gallons per minute of flow far below the required levels for optimal fish production. The malfunction appears to stem from a failure in the gearbox that operates the valve, but there may also be underlying issues with the sub grade valve itself, potentially leading to further system failure if not addressed.

Without a fully functional valve, the hatchery's ability to meet fish production goals and maintain broodstock health is severely limited. If the valve completely fails, it could result in catastrophic losses to fish stocks, jeopardizing both recreational fisheries and critical conservation programs.

**Solution:** AZGFD will hire a contractor to repair or replace the gearbox and the valve as necessary. The goal is to restore full operational capacity to Raceway 2 and ensure reliable water flow for fish production.

Cost Estimate: \$45,000

Impact of Not Approving this Request: AZGFD is dedicated to maintaining a high quality work environment for its employees and visitors, as well as actively managing habitats to conserve and protect Arizona's wildlife. If this project is not approved, the rearing unit will remain partially operational, severely limiting fish production capacity. This will restrict the hatchery's ability to stock recreational fisheries in the White Mountains and maintain healthy populations of Gila Trout for recreational purposes. A complete failure of the valve could result in catastrophic fish losses, significantly impacting AZGFD's mission.

Project: Canyon Creek Hatchery - Bay Doors Repair/Replacement

Funding Source: Game and Fish Fund - Building Renewal

Category: Shell: Superstructure; Exterior Walls & Roofing

Need: At Canyon Creek Hatchery, six essential bay doors across multiple buildings are in poor condition and need immediate attention. Two of the four bay doors at the Administration/Visitor Center/Shop are completely nonfunctional, while the other two require significant adjustment and repair to ensure safe and effective operation. Additionally, both roll up bay doors on the Boneyard Storage Shed need repair and adjustment to restore functionality. All these doors are critical for daily operations, including equipment storage, vehicle access, and safe work environments for staff. Their current state is limiting operations, creating energy inefficiencies, and increasing pest intrusion.

**Solution:** AZGFD will hire a licensed contractor to repair, replace, and adjust all six bay doors as needed, ensuring full functionality and weatherproofing for these critical facilities.

Cost Estimate: \$30,000

Impact of Not Approving this Request: AZGFD is dedicated to maintaining a high-quality work environment for its employees and visitors, as well as actively managing habitats to conserve and protect Arizona's wildlife. If this project is not approved, the buildings essential to hatchery operations will remain partially functional or non-operational, impacting daily activities and reducing the efficiency of hatchery operations. Gaps and cracks around the faulty bay doors lead to increased rodent intrusion, creating sanitation and maintenance issues, and the inability to properly seal these buildings results in heat loss and higher propane usage. Delayed repairs will lead to escalating deterioration of the doors and surrounding structures, resulting in higher future repair costs, potential equipment damage, and safety risks for staff.

Project: Canyon Creek Hatchery - RearTailbox Floor Valve Replacements With Standpipes

Funding Source: Game and Fish Fund - Building Renewal

Category: Infrastructure & Building Sitework

**Need:** All 12 of the existing 8" tailbox floor alfalfa valves at Canyon Creek Hatchery have failed and are no longer functional. Installed during the 1992–1993 renovation, these valves have deteriorated to the point where they cannot control water flow, leaving unsecured and unsealed valve covers precariously resting over 8" drainage holes. This creates significant operational and safety risks.

The continuous leakage from the failed valves directly impacts the hatchery's water treatment system. Excess water flows into the wastewater system and overwhelms the clarifier, preventing the system from adequately treating water before discharge. This increases the risk of violating water quality permit parameters

Previous estimates for full valve replacement exceeded \$15,000 per valve, making the project cost-prohibitive in the near term. After consultation with Department engineers, replacing the failed alfalfa valves with removable standpipes has been identified as a practical, cost effective interim solution. This approach allows continued use of the raceways while mitigating the risks and challenges posed by the failing valves until a full hatchery renovation can be pursued in future.

**Solution:** AZGFD proposes hiring a licensed contractor to remove the existing alfalfa valves and yokes bedded in concrete and replace them with removable standpipes. This solution will allow for water control in the raceways while facilitating cleaning and maintenance of the raceways and tailboxes.

Cost Estimate: \$80,000

Impact of Not Approving this Request: AZGFD is dedicated to maintaining a high quality work environment for its employees and visitors while actively managing habitats to conserve and protect Arizona's wildlife. If this project is not approved, the hatchery will continue to experience continuous, uncontrolled water leaks into the wastewater system, risking overflow of the clarifier and potential violations of the discharge permit. Uncontrolled leaks waste water that is critical for downstream fish production, directly impacting the hatchery's ability to meet its mission of producing over 100,000 pounds of trout annually for stocking in Arizona's White Mountains and maintaining the native Gila trout broodstock.

Arizona Game and Fish Department
Building Renewal and Capital Projects Expenditure Plan
Fiscal Year 2026

Project: Canyon Creek Hatchery - Boneyard Storage Shed Siding Materials

Funding Source: Game and Fish Fund - Building Renewal

Category: Shell: Superstructure; Exterior Walls & Roofing

**Need:** The exterior wooden board and batten siding on the Boneyard Storage Shed at Canyon Creek Hatchery is severely deteriorated, with multiple sections missing, cracked, or warped. This exposes the structure and its contents to water intrusion, pests, and accelerated decay, putting valuable assets at risk. Replacing the failing siding is critical to protect the integrity of the building and ensure it continues to serve its storage and operational functions.

To increase the building's longevity, reduce maintenance needs, and improve fire resistance, we recommend replacing the existing wood siding with metal panel or metal board-and-batten analog siding. Hatchery staff have the skills and capacity to install the new siding without impacting other essential duties, provided that materials are procured.

**Solution:** Provide funding to purchase metal panel or metal board and batten siding, fasteners, and vapor barrier/house wrap. Hatchery staff will install the siding, ensuring proper weatherproofing and protection of the structure.

Cost Estimate: \$7,500

Impact of Not Approving this Request: AZGFD is committed to maintaining a high quality work environment for its employees and visitors while actively managing habitats to conserve Arizona's wildlife. Without replacement, the shed's structural condition will continue to deteriorate, leading to increased water damage, loss of stored equipment and supplies, pest infestations, and eventual structural failure. Addressing the issue now will prevent more costly repairs and protect critical hatchery assets.

Project: Page Springs Hatchery - Visitor Center Restrooms/Plumbing

Funding Source: Game and Fish Fund - Building Renewal

Category: ADA accessibility

Need: Page Springs Hatchery plays a vital role in fulfilling the Department's mission by distributing catchable trout year-round across the state, contributing to over 50% of all catchable trout stocked from the Department's hatcheries. In addition to its operational importance, the hatchery is a popular destination for visitors who come to see the facility, walk the trails, and enjoy birdwatching. The Visitor Center, featuring educational signage, timelines, and videos, is a key attraction for the public. The hatchery was last renovated in 1990-1991, when the office was converted into a Visitor Center with men's and women's restrooms. However, while both restrooms include ambulatory-accessible stalls, they do not meet current ADA standards for wheelchair accessibility. This deficiency was identified during the November 2024 Civil Rights Compliance Review, and while other findings have been addressed, the restroom accessibility issues remain unresolved.

Solution: AZGFD proposes hiring a contractor to bring the restrooms into ADA compliance. In the men's room, this would include removing one of the two urinals and shifting the stall partition to create sufficient space for a compliant stall. In the women's room, the work would involve removing one of the sinks and relocating the non handicapped toilet to provide the necessary space for an ADA compliant stall. The stall partitions would also be adjusted, and wall tiles would be installed in the areas affected by the changes, ensuring the room retains both a standard stall and an ADA accessible stall.

Cost Estimate: \$25,000

**Impact of Not Approving this Request:** AZGFD is committed to providing a quality work environment for its employees and visitors, as well as actively managing habitats to conserve and protect Arizona's wildlife. If this project is not approved, the restrooms will remain out of compliance with ADA standards, limiting access for employees and visitors.

Project: Tonto Creek Hatchery - Residence Bathtub and Shower Repair or Replace

Funding Source: Game and Fish Fund - Building Renewal

Category: Major Building Services

**Need:** The main bathtub and shower in Residence GF-7-003-0060 at Tonto Creek Hatchery are in poor condition and require replacement. The tub has a hole, the valves are stripped, and the showerhead pipe is damaged, making the fixture unsafe and unusable. Without repairs, the bathroom cannot function as intended for the residents.

**Solution:** AZGFD will hire a contractor to source the necessary materials and install a new bathtub and shower in the main bathroom of Residence GF-7-003-0060. This will ensure the bathroom is fully functional and safe for use.

Cost Estimate: \$7,500

Impact of Not Approving this Request: AZGFD is committed to providing a quality work environment for its employees and visitors, as well as actively managing habitats to conserve and protect Arizona's wildlife. If this request is not approved, the bathroom will remain out of service, leaving the residence with only one functional bathroom. Additionally, the existing damage could lead to water leaks and further building degradation, resulting in higher repair costs and potential structural damage in the future.

Project: Tonto Creek Hatchery - Furnace Replacement Office/Visitor Center/Bunkhouse

Funding Source: Game and Fish Fund - Building Renewal

Category: Major Building Services

**Need:**The furnace serving the main hatchery building at Tonto Creek Hatchery (GF-7-003-0030) which includes the office, visitor center, and bunkhouse is outdated, inefficient, and unable to meet the heating demands of the facility. During the fall, winter, and early spring months, space heaters are required to maintain even minimal comfort levels for staff and visitors. This situation creates an unreliable and inefficient heating system that negatively affects both employees and the public.

**Solution:** AZGFD will hire a contractor to replace the existing furnace and install a new, properly sized and efficient furnace that will meet the heating needs of the hatchery building (GF-7-003-0030) and ensure a safe, comfortable, and welcoming environment for staff and visitors.

Cost Estimate: \$12,000

Impact of Not Approving this Request: AZGFD is committed to providing a quality work environment for its employees and visitors, as well as actively managing habitats to conserve and protect Arizona's wildlife. Delaying this project will result in continued operational inefficiencies at the hatchery, including excessive reliance on space heaters, which increases energy costs and creates safety concerns. Staff will continue to work in uncomfortable and potentially unsafe conditions during colder months, which could negatively impact both productivity and morale.

Project: Tonto Creek Hatchery - Flooring Repair and Replacement at Multiple Residences

Funding Source: Game and Fish Fund - Building Renewal

Category: Interiors: Interior Construction-Stairs; Finishes

**Need:** The flooring throughout the residences at Tonto Creek Hatchery (GF-7-003-0060 and GF-7-003-0010) is significantly degraded, lifting in places, and showing visible damage. The poor condition of the flooring not only presents a safety concern for residents but also contributes to the overall deterioration of the facilities. Repair and/or replacement of the flooring is necessary to maintain safe and functional living spaces.

**Solution:** AZGFD proposes to hire a contractor to repair and replace the flooring in the two residences, GF-7-003-0060 and GF-7-003-0010, ensuring the spaces are safe, functional, and properly maintained for long-term use.

Cost Estimate: \$40,000

Impact of Not Approving this Request: AZGFD is committed to providing a quality work environment for its employees and visitors, as well as actively managing habitat to conserve and protect Arizona's wildlife. Failure to approve this project will result in continued tripping hazards for residents, posing a risk of injury. In addition, the poor condition of the flooring will continue to contribute to the degradation of the buildings, leading to more extensive and costly repairs in the future.

Project: Tonto Creek Hatchery - Overhead Door Repair/Replace

Funding Source: Game and Fish Fund - Building Renewal

Category: Shell: Superstructure; Exterior Walls & Roofing

Need: The overhead door providing access to the fish culture tank room at Tonto Creek Hatchery is damaged and no longer functions properly, compromising building access and security. In addition, most of the facility and residential man and overhead doors across the hatchery lack proper weather seals or have seals that are damaged and ineffective at preventing rodent intrusion. This creates ongoing issues with pests entering the buildings and increases energy costs due to air leaks. Repairing the tank room overhead door and installing proper rodent-proof weather seals is critical to protect facility integrity and ensure safe and efficient hatchery operations.

**Solution:** AZGFD proposes to hire a contractor to repair or replace the overhead door in the fish culture tank room and install durable, rodent-proof weather seals made of metal or fiber impregnated materials on the bottom of all man and overhead doors on ten buildings around the facility as needed.

Cost Estimate: \$30,000

Impact of Not Approving this Request: AZGFD is committed to providing a quality work environment for its employees and visitors, as well as actively managing habitat to conserve and protect Arizona's wildlife. If this request is not approved, the facility will continue to experience rodent intrusions, resulting in damage to equipment, supplies, and potentially sensitive hatchery operations. Energy costs for heating and cooling will remain unnecessarily high due to air leaks around improperly sealed doors, further impacting operational efficiency.

Project: Tonto Creek Hatchery - Retaining Wall and Turn-around Pad Repair/Replace

Funding Source: Game and Fish Fund - Building Renewal

Category: Infrastructure & Building Site Work

**Need:** The existing retaining wall and turn around pad at Tonto Creek Hatchery are in critical condition, with significant structural failure and posing an extreme safety risk. This pad is essential for safely receiving feed deliveries by tractor trailers, which are critical for the ongoing operations of both Tonto Creek Hatchery and Canyon Creek Hatchery. The pad and retaining wall must be repaired or replaced to ensure continued safe operations. The replacement of this infrastructure is critical to maintaining safe and efficient operations.

**Solution:** AZGFD will hire a contractor to repair or replace the existing failing retaining wall and turn around pad.

Cost Estimate: \$100,000

Impact of Not Approving this Request: AZGFD is dedicated to providing a quality work environment for its employees and visitors, and to actively managing habitat to conserve and protect Arizona's wildlife. Failure to approve this project will result in the hatchery being unable to accept critical feed deliveries, severely disrupting operations at both Tonto Creek and Canyon Creek Hatcheries. Delaying this project will also lead to significant operational inefficiencies, safety hazards, and higher long term repair costs.

Project: Silver Creek Hatchery - Replace Office Flooring

Funding Source: Game and Fish Fund - Building Renewal

Category: Interiors: Interior Construction-Stairs; Finishes

**Need:** The flooring in the Silver Creek Hatchery office trailer is in severely degraded condition. The carpet is over 25 years old and heavily worn, while the vinyl plank flooring is broken, damaged, and unsafe. This creates an uncomfortable and unprofessional work environment, with increased risk of tripping hazards for both staff and visitors. Replacement of the flooring is necessary to maintain a safe, functional, and presentable workspace.

**Solution:** AZGFD will hire a state contractor to source and install new commercial grade flooring throughout the office trailer. This will ensure a durable, safe, and professional environment for staff and visitors.

Cost Estimate: \$30,000

Impact of Not Approving this Request: AZGFD is committed to providing a quality work environment for its employees and visitors, and to actively managing habitat to conserve and protect Arizona's wildlife. If this request is not approved, the flooring will continue to deteriorate, increasing the risk of tripping hazards and potential injuries for staff and visitors. Additionally, the continued degradation of the facility could lead to more costly repairs in the future.

Project: Silver Creek Hatchery - Repair Facility Doors and Replace Locks

Funding Source: Game and Fish Fund - Building Renewal

Category: Shell: Superstructure; Exterior Walls & Roofing

Need: The Silver Creek Hatchery facility buildings currently use a mix of residential grade locks and hardware that are not designed for the durability and security required in a commercial setting. The locks are inconsistent across the facility, requiring staff to carry multiple keys, which reduces operational efficiency and complicates daily operations. Replacing these locks with commercial grade locksets matching those used at Tonto Creek and Canyon Creek Hatcheries will standardize access across the three Eastside hatcheries, improve security, and reduce long term maintenance costs. Additionally, minor repairs to doors and weather seals are needed to ensure proper function and energy efficiency. The scope includes 9 doors across multiple buildings.

**Solution:** AZGFD proposes to hire a contractor to install Sargent commercial grade locksets on all designated doors, matching the lock systems at Tonto Creek and Canyon Creek Hatcheries. The contractor will also provide the necessary keys, make minor door adjustments, and install new weather seals where needed to ensure security and energy efficiency.

Cost Estimate: \$25,000

Impact of Not Approving this Request: AZGFD is committed to maintaining a quality work environment for its employees and visitors, and to actively managing habitat to conserve and protect Arizona's wildlife. If this request is not approved, staff will continue to face inefficiencies and frustration with multiple key systems, leading to operational delays and increased risk of lost keys and lock failures. Security vulnerabilities will persist due to the use of residential grade locks, and ongoing maintenance costs will continue to accumulate as locks and keys require frequent replacement. Additionally, poor weather sealing will contribute to increased heating and cooling costs, further straining resources.

Project: Silver Creek Hatchery - Residence Siding and Windows Replacement

Funding Source: Game and Fish Fund - Building Renewal

Category: Shell: Superstructure; Exterior Walls & Roofing

**Need:** Both residences at Silver Creek Hatchery are in need of new siding and window replacements due to age, wear, and weather damage. Residence 1 is in the greatest need, with deteriorated siding and failing windows that contribute to poor energy efficiency, increased propane usage, and potential water damage.

**Solution:** AZGFD proposes to hire a state contractor to purchase materials and install new siding and energy efficient windows on Residence 1. This work will help preserve the structural integrity of the residence, improve energy efficiency, and ensure the long-term usability of the building.

Cost Estimate: \$80,000

Impact of Not Approving this Request: AZGFD is dedicated to providing a quality work environment for its employees and visitors, and to actively managing habitat to conserve and protect Arizona's wildlife. Failure to complete this project will lead to continued structural degradation, increased risk of water damage, higher propane usage due to poorly sealed windows and failing siding, and ultimately, higher future repair costs. Neglecting these improvements may also compromise the safety and comfort of staff housed at the facility.

Project: Sterling Springs Hatchery - Roof Replacement

Funding Source: Game and Fish Fund - Building Renewal

Category: Shell: Superstructure; Exterior Walls & Roofing

Need: Sterling Springs Hatchery is a critical facility for the Department, receiving all trout eggs for the westside hatcheries Page Springs and Bubbling Ponds which together produce over half of Arizona's catchable trout. The hatchery's metal roof, which covers the residence, office, and bunkhouse, is approximately 25 years old and has reached the end of its service life. The roof leaks in multiple areas, creating water damage risks for the interior and threatening the structural integrity of the building. Temporary repairs by the manager have not resolved the issue, and a roofing contractor recently confirmed the roof's condition is beyond repair and must be replaced.

**Solution:** AZGFD proposes to hire a state contractor to remove the existing roof and install a new metal roof. The contractor will also inspect and replace any damaged wood under the roofing, including fascia, soffit, drip edge, and gutters. The insulation will be checked and replaced as necessary to ensure energy efficiency and building protection

Cost Estimate: \$75,000

Impact of Not Approving this Request: AZGFD is committed to providing a quality work environment for its employees and visitors, and to actively managing habitat to conserve and protect Arizona's wildlife. Failure to replace the roof will lead to continued and worsening leaks, resulting in water damage, mold, and rot that will further degrade the building's structure and interior. This puts staff living in the residence at risk and may eventually render the building uninhabitable, requiring more extensive and costly repairs.

Project: State Headquarters Major Maintenance Fund

Funding Source: Game and Fish Fund - Building Renewal

**Need:** As part of the lease purchase agreement for the AZGFD Headquarters facility, AZGFD committed to depositing a portion of its annual building renewal allocation into a sinking fund established through an indenture agreement with Wells Fargo/Computershare Corporate Trust. This fund will cover future capital expenses associated with major cyclical maintenance items.

Project Description: Scheduled major maintenance items include:

- Administration Building Roof Maintenance Foam Roof Sealant every 7 years; new roof in year 25.
- Interior Floors, Walls Replace carpet flooring every 7 years; paint interior walls every 5 years; replace other flooring every 10 15 years.
- Building Systems Assumes ongoing upgrades to lighting, HVAC (energy management), emergency generator, telecommunication and information systems; security/access control system; parking lights, fire detection and alarm system.
- HVAC Anticipated replacement of chiller in year 25; air handler unit replacements in years 20-25; independent heat pump systems every 12 years.
- Asphalt Maintenance Crack seal every 3 years; seal coat parking lots every 5 years; slurry seal main entry road every 5 years; mill and overlay parking lot and main entry road in year 20.

Cost Estimate: \$152,230

Impact of Not Approving this Request: AZGFD is committed to providing a productive and safe work environment for its employees and to the active conservation work and the continued management of habitat to conserve and protect Arizona's wildlife. Deferral of this work will result in increased future costs to bring the facility up to standard.

Project: AZGFD Building Renewal Emergency Allocation

Funding Source: Game and Fish Fund - Building Renewal

Category: Emergency Allocation

Need: AZGFD maintains more than five hundred facilities within its building and infrastructure system statewide, which includes administrative offices, administrative sites, shooting ranges, actively and passively managed wildlife areas, dams, boating facilities and other recreational improvements. Facilities range in age from historic structures constructed in the 1930's to recently constructed operational and administrative facilities. Given this maintenance burden, it is difficult to anticipate the timing and nature of all building component failures. In the event of unexpected critical breakdowns or imminent failures, AZGFD requires the fiscal agility to remedy events in an expeditious manner.

**Solution:** AZGFD will utilize the following expenditure categories to address unplanned emergencies.

- 1. Emergency Maintenance and Repairs: Unscheduled and unanticipated building system or equipment repairs requiring immediate response in order to maintain functionality of essential facilities and infrastructure.
- 2. Corrective Maintenance: These maintenance activities are typically related to health, safety or accessibility concerns as determined by the AZGFD's Loss Prevention Coordinator or Engineering Staff and require a timely response.

The distribution of the Emergency Allocation of \$120,000 shall be addressed as follows:

• AZGFD shall notify the Chairman and JLBC staff on an emergency maintenance and repair or corrective maintenance project on the respective quarterly report update. AZGFD can proceed with these emergency repairs without waiting for Committee review.

Cost Estimate: \$120,000

Impact of Not Approving this Request: AZGFD is committed to providing a productive and safe work environment for its employees and to the active conservation work and the continued management of habitat to conserve and protect Arizona's wildlife. Deferral of this work will result in increased future costs to bring the facility up to standard.

**Project:** AZGFD Preventive Maintenance

Funding Source: Game and Fish Fund - Building Renewal

**Need:** Pursuant to A.R.S. 41-793.01, AZGFD may spend up to 8% of its total building renewal appropriation on preventive maintenance which can include preventive maintenance contracts for items such as HVAC, backup power generators, pavement maintenance (small repairs), wastewater pump stations, and septic systems.

**Project Description:** Implement statewide preventive maintenance work on Arizona Game and Fish Commission owned facilities.

Cost Estimate: \$145,256

**Impact of Not Approving this Request:** AZGFD is committed to providing a productive and safe work environment for its employees and to the active conservation work and the continued management of habitat to conserve and protect Arizona's wildlife. Deferral of this work will result in increased future costs to bring the facility to standard.

Project	Cost Estimate	
Building Renewal Projects Total:	\$1,641,986.00	
Region 1 - Pinetop Bunk House Flooring	\$ 14,000.00	
Region 1 - Pinetop Hatchery Building - Interior Walls	\$ 30,000.00	
Region 1 - Hatchery Building Stairs	\$ 15,000.00	
Region 1 - Pinetop Regional Office - Thermostat Replacement	\$ 3,500.00	
Region 2 - Raymond Wildlife Area Bunkhouse Upgrade, Phase 2	\$ 20,000.00	
Region 3 - Kingman Regional Office - ADA Improvements for Men's and Women's Restrooms	\$ 50,000.00	
Region 5 - Whitewater Draw Wildlife Area - Repairs to Buildings	\$ 100,000.00	
Region 6 - Horseshoe Ranch Barn Siding	\$ 140,000.00	
Region 6 - Horseshoe Ranch Barn Rewire	\$ 25,000.00	
AZGFD - Headquarters Replace Security Camera System	\$ 80,000.00	
AZGFD - Headquarters Replace Old HVAC Units	\$ 50,000.00	
Bubbling Ponds Hatchery - Windows Replacement	\$ 70,000.00	
Canyon Creek Hatchery, Residences Siding and Window Installation	\$ 40,000.00	
Canyon Creek Hatchery - Raceway 2 Reuse Valve Repair/Replacement	\$ 45,000.00	
Canyon Creek Hatchery - Bay Doors Repair/Replacement	\$ 30,000.00	
Canyon Creek Hatchery - RearTailbox Floor Valve Replacements With Standpipes	\$ 80,000.00	
Canyon Creek Hatchery - Boneyard Storage Shed Siding Materials	\$ 7,500.00	
Page Springs Hatchery - Visitor Center Restrooms/Plumbing	\$ 25,000.00	
Tonto Creek Hatchery - Residence Bathtub and Shower Repair or Replace	\$ 7,500.00	
Tonto Creek Hatchery - Furnace Replacement Office/Visitor Center/Bunkhouse	\$ 12,000.00	
Tonto Creek Hatchery - Flooring Repair and Replacement at Multiple Residences	\$ 40,000.00	
Tonto Creek Hatchery - Overhead Door Repair/Replace	\$ 30,000.00	
Tonto Creek Hatchery - Retaining Wall and Turn-around Pad Repair/Replace	\$ 100,000.00	
Silver Creek Hatchery - Replace Office Flooring	\$ 30,000.00	
Silver Creek Hatchery - Repair Facility Doors and Replace Locks	\$ 25,000.00	
Silver Creek Hatchery - Silver Creek Hatchery - Residence Siding and Windows Replacement	\$ 80,000.00	
Sterling Springs Hatchery - Roof Replacement	\$ 75,000.00
