

**Allocation of Wildfire Special Session Funding**  
**Arizona Department of Forestry and Fire Management**  
**Program Summary**

**Program Overview**

The Department of Forestry and Fire Management (DFFM) was appropriated \$75,000,000 from the General Fund in FY 2021 pursuant to Section 1 of Laws 2021, 1<sup>st</sup> Special Session, Chapter 1. The FY 2023 budget appropriated another \$65,000,000 from the General Fund for the same purposes as the FY 2021 appropriation. As a condition of these appropriations, the department is required to limit their spending of these monies to 6 purposes related to ongoing efforts to mitigate wildfires. Another condition of this appropriation requires that the department submit a monthly report detailing its expenditures in each of the 6 spending categories permitted by the statute.

The 6 categories of spending to which the department is permitted to allocate funds are as follows:

- Fire suppression and pre-positioning of fire suppression equipment and staff
- Capital expenditures and equipment associated with fire suppression and pre-positioning activities for fire suppression
- Mitigation projects to address post-fire flooding and other damage that may occur as a result of fires or fire suppression activities
- A state or local government agency's emergency liabilities related to emergency sheltering, wraparound services and support activities
- Financial assistance to public and private landowners for emergency repairs for infrastructure damage resulting from fires or fire suppression activities
- Reimbursement to a state agency or political subdivision for the state agency's or political subdivision's cost-share of eligible claims arising from an emergency declared pursuant to A.R.S. § 35-192, or a federal declaration of emergency or major disaster

In addition to limiting the spending of the appropriated monies to these 6 categories of spending, 2 constraints were imposed on individual categories. The department may not spend more than \$10,000,000 for capital expenditures and \$10,000,000 for financial assistance to landowners from each of the 2 appropriations. The FY 2023 appropriation also specified that \$3,000,000 of that appropriation had to be used for purposes related to the Woodbury Fire.

**Expenditures**

DFFM submitted its latest report on March 17, 2023, reporting the following expenditures by category through February 2023 as shown in *Table 1* on the following page.

DFFM reported net expenditures of \$760,810 in February 2023. Total expenditures have reached \$45,299,646; the remaining balance of funds from both appropriations is \$94,700,354. These expenditures do not reflect all commitments made by DFFM, which reports total encumbrances of \$95,001,210 to date.
